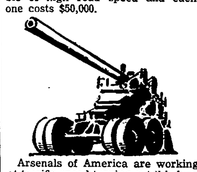
What You Buy With
WAR BONDS

The 155-millimeter gun is the modern version of the old "GPF" of World War I days. It has a range fifty percent greater than the old gun, heaving a 95-pound projectile approximately 15 miles. It is capable of high road speed and each one costs $50,000.



Arsenals of America are working at terrific speed turning out this long range, effective weapon for our armed forces. You and your neighbor working hand-in-hand in unity can make possible the purchase of an adequate number of these guns by buying War Bonds. Put 10 percent of your income in War Bonds to help reach your county quota, every pay day.

Tomato Varieties Demonstrations Established Next Week

Ten Allegany county 4-H members and cooperators will set tomato demonstration variety plants next week. If weather conditions are favorable 1,000 tomato plants will be distributed to be planted on special chosen sites within the county in order to determine this year as far as possible the most desirable tomato varieties for use by family gardeners. It has been suggested to the demonstrators that they neither prune nor stake these tomatoes but give them plenty of room in which to develop on well fertilized soils. Most of the gardeners will use a 5-10-10 commercial fertilizer with a side dressing of nitrate at the time the tomatoes are in bloom.

Emphasis will be at the time the plants are set out for the necessity of dusting with rotenone or pyrethrum dust to control the flea beetles which so often kill transplanted tomato plants. A starting solution made of 5-10-10 fertilizer will be used to water the young plants to insure an early start. The varieties used in the demonstration include the following: Marglobe, Earliana, Stokesdale or Burbank, Pritchard, Break of Day, Golden Queen, Nystate, John Bae, Victor and Rutgers.

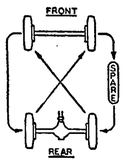
YOUR CAR

How to Get the MOST out of It

KEEP 'EM ROLLING

Did you get 10, 20 or 40 thousand miles off your last set of tires? If you want to graduate into the 40 thousand class with those on your present car, here are some things to watch:

Have your wheels balanced, and check them for alignment at least twice a year. Improper alignment causes the tires to drag instead of roll. Improper balance scrapes off the tread in waves. Watch your brake adjustment too, because uneven brakes cause wear in one spot.



Criss cross your tires every four to five thousand miles. This evens tread wear and keeps your spare in use. Five tires used 16,000 miles each is better than four tires used 20,000 miles plus one unused spare. Rubber degenerates rapidly without exercise.

Watch for tread cuts and have them repaired immediately. If you have to store tires, keep them in a dark cool room out of air currents.

Tires that have been retreaded or recapped will give many more miles of service, but don't drive at excessive speeds with them.

Elkland Journal Discontinues Publication

The Elkland (Pa.) Journal, Al Button, editor, has joined the increasing number of newspapers which have signed "30" and suspended publication because of the increasing costs and scarcity of trained help and materials and the general decrease in newspaper incomes.

Many of the newspapers that are still hanging on have been forced to raise advertising and subscription rates and drastically cut the number of pages and size of their publication in order to survive.

While the News has so far been able to maintain its usual size, the future holds no guarantee and contemplated changes are in the air now at the News office.

Bumper Crop of Maple Products

The New York State Department of Agriculture and Markets released a bulletin on the 1942 maple production this week. The report states that 3,111,000 trees were tapped, 933,000 gallons of maple syrup and 177,000 pounds of maple sugar made. With the exception of 1935 this is the largest yield of maple products in the past ten years. The crop in 1935 is listed at 3,345,000 trees tapped with a production of 987,000 gallons of syrup and 465,000 pounds of maple sugar. New York State was second to Vermont in production among the ten maple producing states.

"KEEP 'EM ROLLING"

Keeping old tires rolling—from consumers to rubber reclaiming centers to aid America's production program—are (left to right) pretty Peggy Hawkins, Janet Rowe and Peggy Kraft who have formed a committee to pet over Atlantic City's salvage drive. They were caught by the cameraman on the celebrated Wooden Way where the dimout provides an intriguing background for the 1942 version of hoop-rolling.
