HOUSEWIVES TAKE PART IN CAR-SHARING PLAN

Housewives figure prominently in the car-sharing plan, according to Local War Transportation Committee authorities.

And here's how women in this territory can help.

Form a car-sharing club among your friends and neighbors for all shopping tours, and marketing. In other words—go to market with an empty basket, but not an empty car.

But above all—Double Up! Don't Drive Alone!

Your Local War Transportation Committee Administrator has information on how to join a car-sharing club in your vicinity.

Slight Mistake

"Sorry, madam, but licenses are issued only when your form is filled out properly."

"Why. I like your nerve, sir! We can get married, no matter what I look like."

Public Welfare Committee Unites With War Activities

The Executive Committee and Children's Committee of the Allegany County Public Welfare Committee of State Charities Aid Association met at the County Court House on Friday, September 25th to plan the program for this year. Those present were, Mrs. M. E. Keenyon, Alfred, president; Mr. Knight Thornton, Wellsville, vice-president; Miss Dorothea Snyder, Andover, secretary-treasurer; Mr. Knight Thornton, Wellsville, chairman of the Children's Committee and Dr. Roland Warren, Alfred; Dr. Dorothy Grey, Belfast; Mrs. W. H. Genne, Alfred; Mrs. A. R. Sherwood, Belmont; Mr. Frank L. Gere, Cuba; Mr. Carey Drake, Friendship; Dr. I. G. Howe, Angelica; Mr. Cassar Adams, Cuba; Miss Helen Kerr of State Charities Aid Association, New York City; Mrs. Elizabeth Tyler and Miss Edith Brown, Children's Agents.

Dr. I. G. Howe, County Commissioner of Public Welfare, defined his function of Director of Emergency Welfare Services and described the plans so far completed to meet the needs of people in this county in the event of bombing or sabotage. In conjunction with this program he asked the assistance of the Public Welfare Committee in enlisting the services of experienced interviewers to be used in such an event to supplement the staff of the Welfare Department who will be operating as volunteers under the direction of Dr. Howe.

The chairman of the Children's Committee, Mrs. Knight Thornton, presented for the suggestions of the Committee the plan of a survey which is to be made at the request of Mr. M. Carey Drake, Chairman of the Community Service Division of the War Council. Mr. Drake had requested this Committee to study the needs and activities of children as related to the war, in order that this division of the War Council might have the necessary information upon which to base its plans for services to children. The survey outline was approved by the Committee and Mr. Drake, and it is expected that individuals and already existing groups interested in child welfare will be enlisted in the gathering of facts for this study. It is planned that the survey will not only be of value to the Community Services Division of the War Council but also will offer to local communities a basis for evaluating their own plans for child care and protection.

The meeting was adjourned subject to call by the officers, as it is planned to meet according to need rather than on regular schedule.

$2.85 Forecast Pool Price For September Milk

The uniform price of milk handled this month at New York-area approved plants in the six states of the metropolitan milkshed was forecast today by Charles J. Blanford, administrator of the New York metropolitan milk marketing area at $2.85 a hundredweight.

The estimated rate is not only 12.2 per cent above the uniform price of September 1941, but also higher than any price computed for any month under the terms of the federal-state orders regulating the New York market. The previous peak was a price of $2.82 that applied to milk pooled in November 1941.

"The forecast," Mr. Blanford cautioned, "is based on variables that will become known only after the tenth of October. It is to be expected, therefore, that the actual price will vary somewhat, up or down, from our preliminary figure.

"It is anticipated that September deliveries to the New York pool will range in the neighborhood of 490,000,000 pounds. The expected volume is up 4.9 per cent from the actual receipts of 466,931,894 pounds in the previous September.

"With the price estimated at $2.85 and the volume foreseen at 490,000,000, the September pool is likely to produce a farm value of $14,655,000. Included in the anticipated value are payments for butterfat in excess of the base quantity of 3.5 per cent and for delivery at plants in the location-premium areas.

Farm Machinery Rationed

The U. S. Department of Agriculture order of September 17, temporarily "freezing" all farm machinery in the hands of dealers, was described by H. L. Hodnett, Fillmore, as necessary to insure fair distribution of available equipment and its placement where it will do the most good in wartime farming production.

Administration of the farm machinery rationing program was delegated by the War Production Board to the Office of Price Administration, and redelegated to the Department of Agriculture. County rationing will be handled by a county rationing committee composed of the County AAA chairman and two farmers appointed by the County War Board. Two alternates will also be appointed.

Farm machinery in one classification (Group A), which is scarce and especially needed to meet current agricultural needs, may be sold only upon approval by the county farm machinery rationing committee. Machinery in a second category (Group B), including items somewhat less scarce, may be sold upon certification by the farmer to the dealer that it is required to meet current agricultural needs. A third classification (Group C), includes the smaller items that may be sold without restrictions.

Group A includes beet lifters, beet loaders, combines, corn pickers, disc harrows, feed grinders, fertilizer spreaders, grain drills, grain elevators, hay balers, lime spreaders, manure spreaders, milk coolers, milking machines, pickup balers, potato diggers, shredders, and tractors (including garden tractors.)

More Food Through Contour Plowing and Sowing

The U. S. Dept. of Agriculture predicts every farmer will have to do everything in his power to make every acre produce a maximum crop if we are to supply our armed forces and civilian population.

To maintain production, the New York State Soil Conservation Committee thru the Allegany County Soil Conservation District recommends:

1—Use of winter cover crop.
2—Contour planting this fall.
3—Contour fall plowing or
4—At least cross slope plowing, leaving sod waterways in the depressions to prevent gullying.

The many farmers in Allegany county who are now plowing on the contour say that it:

1—Does not increase the work.
2—Results in gasoline saving.
3—Is easier on the equipment and
4—It is the outstanding way to maintain fertility and food production without an increase in labor.

If you haven't already begun to plow and sow on the contour why don't you run a few lines in the field back of the house and plow it on the contour to see the results for yourself.

The Extension Service or the Allegany County Soil Conservation District at Belmont, will be glad to lend any assistance available.

War Postpones Annual Newspaper Institute

The annual Cornell University Newspaper Institute for editors and publishers of weekly newspapers of New York State has been cancelled this year, in the interests of saving gasoline and tires.

A poll of the weekly newsmen, conducted during the past few weeks has shown that many of them want an institute this year for the discussions of problems that confront them., but are unable to attend because of labor shortages and the gasoline and tire situation.

LOW Food Prices
