TRAMP ARRESTED.

He Was Given Thirty Days in the Bastile.

Greenwood is not a very hospitable town. Sunday evening Constable Covert got an earnest call to repair to West Hill and secure a man that was striking terror to the hearts of women and children in that locality. On reaching the scene of the disturbance, Rube found Knox Miller's barn surrounded by the neighbors claiming that they had the quarry cornered therein. Rube with his accustomed fearlessness rushed in and followed his prey up to the roof where he took him in custody and brought him to town. The prisoner was arrayed Monday morning before Esqr. Miller and was convicted, and sent over to the county boarding house for thirty days. The prisoner gave the name of W. B. Gill. Several believed he was Myers or some other famous traveler.

Young Plants

Every farmer knows that some plants grow better than others. Soil may be the same and seed may seem the same but some plants are weak and others strong.

And that's the way with children. They are like young plants. Same food, same home, same care but some grow big and strong while others stay small and weak.

Scott's Emulsion offers a easy way out of the difficulty. Child weakness often means starvation, not because of lack of food, but because the food does not feed.

Scott's Emulsion really feeds and gives the child growing strength.

Whatever the cause of weakness and failure to grow—Scott's Emulsion seems to find it and set the matter right.

Thousands Have Kidney Trouble and Don't Know it.

How To Find Out.

Fill a bottle or common glass with your water and let it stand twenty-four hours; a sediment or settling indicates an unhealthy condition of the kidneys; if it stains your linen it is evidence of kidney trouble: too frequent desire to pass it or pain in the back is also convincing proof that the kidneys and bladder are out of order.

What to Do.

There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp-Root, the great kidney remedy fulfills every wish in curing rheumatism, pain in the back, kidneys, liver, bladder and every part of the urinary passage. It corrects inability to hold water and scalding pain in passing it, and bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to go often during the day, and to get up many times during the night. The mild and the extraordinary effect of Swamp-Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases. If you need a medicine you should have the best. Sold by druggists in 50c. and $1. sizes. You may have a sample bottle of this wonderful discovery

ERIE RAILROAD WILL USE BLOCK SYSTEM

Plans To Abolish Train Orders And Registration Bureaus On The System.

BETTER TIME CAN BE MADE.

Many Wrecks Prevented Three Tracks Must Be Laid Before New Plan Is Carried Out.

The Erie Railroad Company is planning, it is learned from a reliable source, to introduce something novel in the way of railroading in the near future, says the Jamestown Morning Post. This new scheme is to eliminate train orders to a great extent and to abolish registration bureaus and use the block system entirely over the entire system.

The subject was the topic of conversation among local railroad men yesterday. They looked upon the plan as a very feasible one and a means by which much ahead time can be cut out and a faster schedule made effective.

The company sees in the scheme a means of sending better time, a preventive of many wrecks and an enormous saving of expense in operating the road. In discussing the merits of the exclusive block system a local railroad man said yesterday:

"If the company really adopts this plan it will be thousands of dollars ahead yearly. It will also undoubtedly save many serious wrecks and lives. In using the block system trains are kept at certain intervals apart. Although the system is now used on the Erie, the engineers and conductors look to their orders from the dispatcher for detailed information. It is necessary usually to make a stop for these orders at which time the engineer and conductor register their arrival, departure, etc. By doing away with these orders, it will be seen that this ahead time will be eliminated and a faster schedule will result.

Orders are oftimes misunderstood, mixed up in transmission and result in serious disasters. The Erie is ready for an engineer to misunderstand his orders and run by a target set against him, with nothing but a block to go by, he would move his train entirely by red, white and green.

Many dollars would also be saved in the dispatchers' offices where a large corps of operators is now necessary for telegraphing purposes. Many of these could be dispensed with, with the adoption of the block system.

"It must not be supposed that such a plan could be carried out on a single track road with any success and the Erie company has not intended to try such a thing until its system is in proper shape as regards tracking. The Erie has been engaged for a long time in laying additional track and looks forward to a day, not very far distant, when it will have a three track line from Chicago to New York.

"The Erie is not the only road that is giving this scheme its consideration, for it is understood that the Lake Shore & Michigan Southern Company will also, in the near future, do away with the train orders and operate their trains entirely with the block system.

"The only occasion on which orders would be necessary under this system would be in cases of delay, caused by accident or otherwise."

DEATH OF B. N. HARRISON.
