Champion Boy and Girl. Ford vs. Rockefeller. What Made Standard Oil. Man's Strange Nature.

Part of the Livestock Show activities in Chicago which included judging the healthiest boy and girl in the United States.

Thelma Svarstad, a South Dakota girl, who won the female championship, is 17 years old, blonde, strong, weighs 122 pounds, is five feet two inches tall, drinks plenty of milk, no tea or coffee, and expects to be a teacher.

The boy champion is William Tobias, of Michigan, 15 years old, who weighs 130 pounds, is five feet six inches tall, likes boxing, admires Jack Dempsey, also drinks lots of milk. Milk dealers, please notice this in your advertisements.

From a livestock—and many other—points of view, these are fine American children.

But somewhere in America there is a little baby, shivering in its mother's arms, delicate, with a thin little body, a big head, wide anxious eyes, that some day will do things the healthiest boy and girl will—never do.

Write that down, for your comfort, if you have a child that isn't so robust.

Henry Ford's offhand statement, "No successful boy ever saved money," was not meant literally. He meant that it was better to spend for information than merely to save a few dollars. Thomas A. Edison, his intimate friend, "never had any money until he got so much that he couldn't spend it."

The other "world's richest man," John D. Rockefeller, is surely "a successful boy," and did save money. He advises young and old to save now, as he hands each one a ten-cent piece with a smile worth a good deal of money. Mr. Rockefeller will tell you, "Save money, not chiefly for the money you save, but because saving teaches self control, and that's the beginning of wisdom."

Ford has high respect for John D. Rockefeller. He said to this writer, "I never saw John D. Rockefeller but once. But when I saw that face I knew what made Standard Oil."

Strange is the nature of man. In New York a young man confesses to strangling a 15-year-old girl whom he loved. He says she wanted to kiss him. That is his excuse.

At Brunswick, Ga., Walter Rawlins, in prison, saw his wife, who on complaint had jailed him for wife-beating. He seized a carving knife, dashed from the prison, overtook his wife, stabbed her several times. His excuse is:

"I loved my wife so that I would rather see her dead than with somebody else."

The fair Jessica Brown, a stage beauty, once married to Lord Northesk, yesterday married Mr. Cornelius. Lord Northesk, as her retired husband, came to America, led by his ambition to be the fifth husband of Peggy Hopkins Joyce. And so it goes.

A warmed tool-house starts the good husbandman on next year's farm tasks by giving him a chance to put all implements in order.

DON'T suffer headaches, or any of those pains that Bayer Aspirin can end in a hurry! Physicians prescribe it, and approve its free use, for it does not affect the heart. Every druggist has it, but don't fail to ask the druggist for *Bayer*. And don't take any but the box that says Bayer, with the word *genuine* printed in red:

Sunday School Lesson

International Sunday School Lesson for January 6

Our Heavenly Father

Matthew 6:24-34

Rev. Samuel D. Price, D.D.

Two topical courses are given in the first and fourth quarters of the year. From April to September the lessons are in the Old Testament on "Prophetic Teaching and Leadership in Judah"—Isaiah to the Restoration. During the coming three months the lessons present "Some Great Christian Teachings" and deal with the Persons in the Trinity, Sin, the Bible, the Church, Repentance, Faith, Sacraments, Sabbath, Repentance, Missions and the Future Life.

Only a few verses are given in the lesson text next week. In addition careful reading, at least, should be devoted to the other passages indicated by the Lessons Committee. This week those portions are Exodus 34:4-7; Psalm 103:1-5, 10-14; Isaiah 40:27-31; John 3:3-6; 4:20-24; 8:40-47; Romans 2:2-11; 8:14-17; John 4:7-16. "Search the scriptures" has an added meaning during this quarter for teachings are not based upon isolated texts but are developed by the study of the Book as a whole.

"God is a spirit," was the declaration of the greatest Teacher when He talked with the woman of Samaria. God is the eternal One—the uncaused Cause of all that followed. Man's understanding of Him has come thru progressive revelation and acquaintance by living consciously with Him. Being a "spirit" does not make Him any the less real.

Moses had converse with God at the burning bush and followed the reverence during those 40 years of wanderings in the wilderness. We know Him by many names, such as Lord, Jehovah, and words that define his attributes — Omnipotent, Omniscient, Omnipresent. By reason of His relationship with His creation there is no more familiar title than Father. David sang of Him and Isaiah prophesied concerning His kingdom.

In the Sermon on the Mount the Son, a revelation in time, gave an interpretation of the Father by means of a nature study such that old and young can understand. He called attention to the birds of the air, the lillies of the field and declared that the Father is all the while caring for all these, the living only for a time and a far lesser order in creation than the humans. Therefore those made in His own image and with ability to know their Creator will be all the more constant objects of His lovely care.

The little child accepts these truths and, even as the youngster takes hold of the strong hand of the earthly father, trusts and obeys the Heavenly Father. Oh, for the faith and confidence of such a child. Jesus said, because of the care of such a Father, we are not to take anxious thought. We will trust to the uttermost as we know, love and follow Him.

Emco Gasoline

The gravity tests high enough to give it the quick start in severest weather, lots of pep and power, yet low enough to prevent waste and to give long distance mileage, even in warm days.

Low grade gasoline will cause lots of carbon, and the driver needs an Anti-Knock remedy. Users of our grade of Emco gasoline do not have sufficient carbon trouble to be worth talking about.

Who said, "WOMAN'S WORK IS NEVER DONE?"

THE modern woman plans her work as intelligently as her husband. She knows that electric appliances will wash and iron—in half the time—for less than 3 cents an hour. She knows an automatic electric range will cook dinner while she's away.

She reads the news—visits the stores of electric dealers to find new inventions to lighten her household drudgery. She knows she can afford to use electricity freely, because interconnected power plants of the Niagara Power System supply cheap electric service where and when it is needed. Generating expenses have been reduced to a minimum. Operating costs have been lowered.

All these savings are reflected in monthly bills—Niagara Power Service is the biggest bargain you buy.
