Warnings on Speculation. The Federal Reserve Board. $25 a Day. $2,000,000 More From J. D. R.

There are bad features about the generally ignorant speculation in stocks. Money thus invested might better be invested in other ways. Inevitably, buying ignorantly and recklessly, many are doomed to bear heavy losses.

It is necessary to issue warnings and the Federal Reserve Bank warning is based of cource on excellent intentions.

But between warnings and ACTION there is a wide margin. To tell outside banks that they must not lend money on call, giving a monopoly to New York City banks and gigantic profit to holders of New York bank stocks, may not be the best way to solve the money and speculation problems.

Another week opening finds Wall Street refusing to be scared to death. Speculators are like "Old Dog Tray, ever faithful." Grief cannot drive them away.

Jack up the interest rate, and still they say, "I think stocks are going to be worth more and so I am going to buy them." The prices lifted up their little heads as soon as the market opened, and kept them up.

One comforting fact for gentlemen that speculate in stocks, paying ten, twelve and more per cent. for money: Federal Reserve Bank in 1928 made a net profit of $64,053,000, or $21,000,000 more than in 1927. It seems only reasonable that the Federal Reserve Bank, efficient in putting up interest rates, should get a good share of the profit.

Corporations get good service and government, sometimes poor service. Colonel Lindbergh is named Federal Aviation Adviser, and WHEN HE WORKS his Uncle Sam will pay him $25 a day.

All Hollywood knows that Lindbergh could have had $300,000 for making one picture, which would have paid him about $10,000 an hour for his work.

However, as Lindbergh says, flying is his business, and $25 a day for work on government flying would suit him better than any price for standing before a camera. Besides, he has a job with General Atterbury of the Pennsylvania, selecting landing places, etc., for the railroad which will pay a salary considerably better than $25 a day.

If men are welcomed in Heaven in proportion to their deeds on earth there will be a special committee of welcome to meet John D. Rockefeller when he arrives. May it be 50 years hence.

President Angell of Yale University announced a gift of $2,000,000 from Mr. Rockefeller for expansion of Yale's medical department, the building of a laboratory, etc.

Mr. Rockefeller is the only man that has given away HUNDREDS OF MILLIONS OF DOLLARS.

Since the people do not know enough to use their unlimited resources for their own welfare, they are fortunate in having intelligent men that collect hundreds of millions and spend them usefully for education, health, scientific research, combatting disease, etc.

Did you Marry a Broom *instead of* a Groom?

MANY a bride who goes to the altar soon finds that she has married a broom instead of a groom. Lack of modern electrical equipment sentences her to lifetime drudgery—she's beaten before she starts.

Wives who want to meet the crowding years with buoyant energy must be as modern as the age in which we live. Let an electric vacuum cleaner beat the rugs for a penny an hour. Do a big ironing in less than two hours with an electric ironer.

A small payment at your nearest electrical dealer's will put these magic helpers in your home. A few cents an hour will run them. With electricity the cheapest in its history, you can easily afford to use it freely.
