Mob Rule. One of the alarming conditions evidenced by the reports from all sections of the country is the "Lynch habit" or craze which has taken hold of the people. Not a murder, either by intent or accident, but some one cries "Lynch him." A mob quickly assembles, the rope, and a resort to barbarous measure, that seem almost incredible. In New York city, about a week ago, it took just six days to convict and sentence a murderer. Such summary measures and speedy justice will do much to break down the mob rule and the lynchers' cries. The law should be supreme and it's dangerous to the interests of the whole country. Let the courts act with all speed, and if there are not judges to fill the bench and carry on the trials, appoint more by due process of law. By all means legitimate, let the majesty of the law be upheld.

Mother Jones. Mother Jones' army of textile workers are creating a little stir, but are not a rival for public attention with "Coxey's Army." The police of New York city are taking the matter altogether too seriously. The Inspector of Police says, "We shall watch the approaches to New York, and if Mother Jones and her outfit land they will be met by policemen who will tell them they cannot parade without a permit. If they insist upon landing as individuals they will not be interfered with." Why should the matter be taken so seriously, and why should Mother Jones and her "crowd" be refused permission to see the President? The workers have as much right to present a petition to President Roosevelt as perhaps he has to send a Keshineff protest to the Czar of Russia.

The improvements on the sidewalk calls attention again to the deplorable condition of the streets. The road scraper has not been used on the village streets this summer.

Some of the street lamps are shorted in darkness these nights. "The lights are out," or the mantles gone. Which?

ANTI-CANAL GROWS.

The agitation over the question of the appropriation of $101,000,000 for a canal is calling out some very strange arguments, and the absurity of the positions taken by those in favor of the canal shows the length they are driven to to bolster up their cause. One of the killing (?) arguments is the statement that those opposed are working against the interests of the laboring men, and a circular has been circulated in Rochester condemning the Chamber of Commerce for its attitude against the measure. The farmers have been accused of joining hands with the railroads to defeat the measure. The fact is, while the railroads may be interested in the defeat of the appropriation the farmer has much more at stake and will work and vote against the taxation that will be put upon him by the measure. The people have not forgotten the $9,000,000 that was swallowed up in the "ditch" and proved a useless investment. These are costly experiments. True, the cities at the terminals of the proposed canal will be benefited, but why should the farmer be taxed to pay it? The rates of freight would not be reduced by a canal (that is, those of Allegany county would not be benefited), and it would be an expensive undertaking so far as his interests are concerned. If the canal is to be built, let the Government of the United States undertake it. Those who are so solicitous of the interest and welfare of the laboring man will then open work for him, but in any event some of the arguments advanced by the promoters of the measure are unwise. No class arguments used can avail. The agricultural interests are opposed to it, and the promoters are evidently alarmed at the strength and growth of the opposition against the measure.

Chief P. M. Arthur. The sudden and tragic death of P. M. Arthur, Grand Chief of the Brotherhood of Locomotive Engineers, which took place at the banquet in Winnepeg last Thursday evening, removes from the world a practical and faithful friend of the laboring man. Chief Arthur was born in Scotland in 1834, came to this country when six years old with his mother, a man of little schooling, but with the high qualities of manhood that made him conciliatory and conservative in the administration of the affairs of the Locomotive Engineers. He was elected to the office of Grand Chief in 1873, 30 years ago, and has made the organization worthy of its name, "Brotherhood." Not only the engineers but railroad men thruout the world will mourn his loss, and they as well as the labor interests of our country have lost a staunch friend and noble leader.

17 Young Men and Women.

In our last issue we made the statement that the graduating class of the Hornellsville Business School, that 13 out of the 17 had secured positions, but we can now state that every member has been offered a position and all accepted but those who are sick or need rest for a few days.

Mrs. Mourhess is going out of business. Anything and everything cheap for cash.

The Pope is Dead. After an illness of fifteen days, Pope Leo XIII. died Monday afternoon. The piety, kindliness and strength of character of Pope Leo XIII. has had a beneficial effect upon the Roman church. The action of France called out the wise judgment and discreteness of action of the head of the church, and on other questions involving the church his wise statesmanship was evidence of the statement of Cardinal Rampolla, "He fought false doctrines, not men." The remarkable fact of prayers being offered by Protestants as well as Catholics, was a mark to his purity of character. The selection of his successor will be watched with a degree of great interest.

SNUBBED.

The United States, according to the press reports, has been snubbed by Russia. The Russian Government turned down the request of the United States diplomatically given concerning the Keshineff petition. Perhaps, after all, this is the most satisfactory solution to a question which, according to international etiquet, ought never to have been raised. The snub was invited, and yet it is not a serious one, for while it would not do for Russia to admit that the petition had in any way influenced her action, evidently she has taken measures to punish the leaders of the mob that massacred the Jews. Russia turned attention from her actions by proclaiming that she had granted to the United States open doors for her commercial interests in China. No sooner is the facts heralded when the press of our own and other countries warn the people not to be too sanguine about Russian privileges granted. On the whole it looks as tho Russia was playing a deep game on the chess board of international politics, and her movements will be watched, and while the nations are watching they are rushing their fleets of war within striking distance.

Anti-Imperialists. The Anti-Imperialists must have been shocked that in the new possessions the "Ever Glorious" was celebrated with a fervor and enthusiasm that was characteristic of the people. At San Juan, Porto Rico, they celebrated by decorating their houses. There was a big parade, patriotic exercises in the theater and a grand display of fireworks in the evening, closing with a grand public ball. The American Porto Ricans are showing good sense in their plan of celebrating the national holiday, getting great pleasure without the dangers that come from toy pistols, dynamite bombs disguised as fire crackers.

NOTICE TO SUBSCRIBERS.

NO PAY, NO PAPER AFTER JANUARY 1, 1904.

The "News" Adopts the Cash in Advance System, Believing it Better for both Publishers and Readers.

The ANDOVER NEWS is to-day the only paper in Allegany county printing eight six-column pages all at home, that does not charge more than $1.00 per year subscription. It is a close thing to issue such a sheet at that price and make both ends meet. The price of print paper has doubled within the past four years. The only way the NEWS can possibly maintain the present $1.00 rate is to carry no deadheads. Believing it unjust that a good subscriber be taxed to help pay for his deadbeat neighbor's paper, we have determined to adopt the "No pay, no paper" policy January 1st, 1904, and live rigidly up to it after that date. Kindly read the label on your paper and if you are not credited beyond Jan. 1st, 1904, you are hereby notified that your paper will then be discontinued unless you walk up to the Captain's office and settle before that date. After Jan. 1st, 1904, all subscription accounts then due us will be placed in an attorney's hands for collection.

PROSPECTS OF A NEW DELIVERY STARTING FROM ANDOVER.

The Route Will Go Up Toward Greenwood And These Around Call Hill Back to Andover.

T. A. Kittredge, special agent and examiner of the Rural Free Delivery Service, was in Andover Thursday looking over the ground, and also the advisability of starting a rural free delivery from this post office. The proposed route will go up toward Greenwood and then bear off toward Call Hill and around to Andover again.

The movement has been made because of a petition sent in by patrons living along the line of the proposed route some months since. If the inspector finds it best to establish this service he will hold an examination of applicants for carrier and eligable persons, for filling vacancies which may occur. The examination will begin promptly at 10 o'clock Saturday morning next. Applicants to apply at the post office, so says a notice posted by postmaster Bundy on the bulletin board at the post-office.

THE HARTRUM WELL.

Failure in Torpedo Exploding Glycerine Injures the Well.

The Mutual Gas Company's No. 2, on the Hartrum farm, was shot this week and will make a fair producer. An accident in shooting the well is liable to hurt it somewhat. The torpedo sent down to discharge the glycerine failed to perform that duty, and it was necessary to use fine squibs to discharge it. This raised the explosives up into a streak of slate, which is now troubling them to clean out.
