The lowest-priced Gas Refrigerator

YOU'LL agree with us when you see this refrigerator that you cannot afford to be without an Electrolux at this price. Pure sparkling ice cubes, delicious frozen desserts, perfect food preservation—all this at the cost of a few pennies a day. This refrigerator has a lower operating cost than any other automatic refrigerator, and only half as much as what you now probably pay for ice.

The reason is simple—gas and water are relatively cheap, and Electrolux freezes with a tiny gas flame and a little trickle of water.

Absolutely Noiseless

There is no machinery, no moving parts at all to make the slightest sound. Electrolux is noiseless when you buy it, and forever after. With no machinery to stop and start, the cold is constant and the temperature varies scarcely at all from the ideal food-preservation point. That's why, too, you always have plenty of ice cubes on hand.

Furthermore, there is nothing about an Electrolux to require your attention. There is nothing to wear out or replace. The refrigerant is hermetically sealed inside a rigid one-piece steel unit and never needs renewal. Even the tiny gas flame is safeguarded by an automatic shutoff. Should the flame ever go out for any reason, no gas can flow until you light it again.

Liberal Purchase Terms

Best of all, with our liberal purchase plan you can have this Electrolux in your kitchen for a small down payment with many months to pay the balance. Be sure to stop in at our display room and see this modern marvel.

QUICK FACTS!
1. Permanently noiseless.
2. Absolutely safe.
3. Only a few cents a day to operate.
4. Lasts indefinitely.
5. No mechanism to wear, to vibrate, to need oil.
6. Free from trouble.
7. Perpetual, steady cold.
8. Plenty of pure ice cubes.
9. Tested and endorsed by national authorities.
