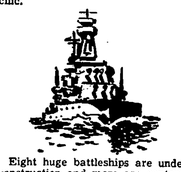
What You Buy With WAR BONDS

The power of the greatest Navy in the world, our own two-ocean fleet, rests in large measure on its backbone—the Battleships of the Line. They displace approximately 35,000 tons and cost up to $70,000,000. We have something like a score of these huge ships in the Atlantic and Pacific.



Eight huge battleships are under construction and more are contemplated. To finance these modern goliaths of the sea it is necessary for every American everywhere to buy more and more War Bonds. We can do it if everybody does his share. Invest at least ten percent of your income every pay day to help your county go over its Bond quota.

HIGH SPEED FOUND TOUGH ON TIRES
At 60 miles an hour, tires wear out two and a half times as fast as they do at 40 miles an hour. That's only a sample of what speed does to your tires.
You can help extend the life of your tires by holding down your speed. You'll save gasoline and oil, too. Make "Never over 40" your slogan for the duration.
You can also save tires, gasoline, oil by joining a group-ride club. Double up to save gas and those precious tires. Call your War Transportation Committee for details.
By the end of 1943, U. S. production of aluminum will be approximately 2.1 billion pounds—six and one-half times 1939 production.
