OF INTEREST TO FARMERS

COWS DON'T LIKE DAMPNESS EITHER

Farmer Tries to Keep Himself From Lumbago But His Herd May Stand in Dripping Stable.

Remember the old lumbago you got last spring from sitting in the cellar sprouting potatoes? It wasn't so cold in the cellar but it was damp and poorly ventilated. Do you ever think of the cows that are kept all winter long in a stable with damp walls and dripping windows? The cows may not complain of back ache but they cannot enjoy the best of health and give the best return in a poorly ventilated, damp stable.

A cow should have about 2,850 bushels of fresh air every 24 hours. This amount of air can be passed thru the stable in the coldest weather without drafts and without danger of freezing provided a properly designed ventilation system is used, and it will keep the walls of a reasonably well built stable dry.

The state college of agriculture has studied the problem of dairy stable ventilation and has published a bulletin that explains the fundamental principles and tells how to build an effective system at moderate cost. If you are interested, write to the office of publication, New York State college of agriculture, Ithaca, N. Y., for E151.

PREPARE THREE MEALS AT ONCE

College Gives Sample Menu Whereby Housewife Does Day's Cooking While She Prepares Dinner.

Three-in-one baked meals reduce the time spent in the kitchen, says Lucille Brewer of the New York State College of Home Economics. A day's meals for the family can be prepared in minimum time by cooking the main dishes for the three meals all at one time. Plan ahead to use the oven to capacity to save time, labor and fuel.

For example, Miss Brewer says, the noon dinner may consist mainly of baked dishes—stuffed fish, potatoes, scalloped tomatoes and onions, and baked apple dumplings with catawba sauce. While this meal is baking, the oven may also be used for a lima bean casserole and individual pumpkin custards for supper as well as for two breakfast dishes which require long cooking—dried apricots and raisins cooked together in a covered baking dish and rolled oats cooked in milk. When these dishes are cooked the rest of the preparation for the other two meals requires very little time. For supper, reheat the lima bean casserole; make a salad of pineapple and chopped raw spinach and beets, whip the cream for the pumpkin custard, and make the tea. For breakfast, reheat the cereal in a double boiler.

To prepare the dried apricots and raisins soak them overnight and bake them together, with a little apple for flavor, in a covered baking dish. Add no sweetening until the dish is removed from the oven. To make the lima bean casserole soak dried lima beans over night, cook them in the water in which they were soaked until the skins loosen and bake in a covered baking dish with sliced onion, shredded pimento, and diced carrot. Four slices of bacon on top, two tablespoonfuls of catsup, and salt and pepper add flavor.

Agrigraphs

Uncle Ab says too many peoples confuse conversation with argument.

• • •

Sanitary conditions are necessary to prevent diseases on a farm just as in a hospital.

• • •

More fall milk is needed, and to obtain this more cows must freshen in the late summer and early fall.

• • •

Be sure you have enough room in your brooder house for your chicks. Overcrowding results in heavy losses.

• • •

At least one colony of bees should be provided for each acre of your apple orchard to take care of cross-pollination.

• • •

A total of 18,698 cows were reported in the dairy improvement associations in New York state during the month of January. Were any of them yours?

• • •

Have you planned your family garden yet? Cornell has a bulletin E74, which tells you the amount of each vegetable to plant to supply the average person for a year. It also tells you when, how, and where to plant, and answers many questions which may be bothering you. Write for it to the office of publications, state college of agriculture, Ithaca, N. Y.

Why ! !

Jones had heard a riddle at the office that he thought was pretty good, so he decided to try it on the wife.

"Why," he said the minute he opened the door. "Why am I like a mule?"

"I don't know," said Mrs. Jones. "I know you are, but I don't know why."

PLAN FOR GREATER FALL MILK SUPPLY

More Cows Should Freshen in Late Summer and Early Fall to Provide Sufficient Amount for City Use.

More cows must freshen in the late summer and early fall if there is to be a sufficient amount of milk in the fall for city use, according to G. F. Warren of the New York state college of agriculture. The growing shortage of milk in the fall may be expected to result sooner or later in higher prices for these months. Farmers should anticipate this condition and shift the season of production.

No one can guarantee what the price of milk will be in the fall of 1930, 1931 and later, says Dr. Warren, but in general the man who plans to meet an economic need is likely to receive reward for his effort. Plan now to assure ample pasture or other feed for the latter part of the summer. Cows that are giving milk in the fall should be put under winter feeding conditions at an earlier date.

If New York farmers cannot supply a sufficient amount of milk to meet the needs of the cities, new territory will have to be opened. Once started, the new territory will want to ship milk during all the months of the year, so that the surplus in the larger part of the year will be more serious than at present.

From the viewpoint of the New York market, it is not desirable to have cows freshen in January or February because a surplus begins then. Delay the breeding of cows that would freshen in these months to obtain a larger supply of milk in the fall.

COLLEGES SEND OUT 305,846 BULLETINS

More Than Sixty Thousand Increase Over Last Year at This Time—Average 6,575 a Day for February.

A total of 305,846 bulletins were sent out by the publication office of the New York State colleges of agriculture and home economics during January and February of this year. This number exceeds that for the same period of last year by 60,128.

In February alone 184,122 bulletins, an average of 6,575 a day, were distributed. Last year only 111,240 bulletins were sent out for this month. The college does not maintain a mailing list so bulletins sent out represent answers to requests, according to Professor Erskine Adams, head of the publication department. Most of the bulletins are sent to people who write to the publications office; part are given out thru personal requests at the college; others are distributed at schools, meetings, fairs and exhibits.

The bulletins are of two kinds, popular and technical. Popular bulletins include rural school leaflets, reading courses for the farm and home, and extension bulletins. The technical bulletins are published by the Cornell University experiment station. All the bulletins are free. For those who do not know what the bulletins are, or who want to make a selection, the college has a list of publications, E47, which may be obtained by addressing a post card to the office of publication, college of agriculture, Ithaca, N. Y.

Homespun Yarns

Intense heat makes rubber materials soft and gum like.

• • •

A child should drink half a cup or more of water before breakfast to start his day right.

• • •

Light injures cotton curtains less than wool, rayon and silk.

• • •

Grated cheese on creamed vegetable soups or on salads adds valuable nutrients and variety to the diet.

• • •

Place the bedroom mirror so that the light falls on the user rather than on the mirror to get the clearest reflection.

• • •

Too much soap slows up the mechanical action of an electric washing machine. Just enough soap to keep a suds on top of the water is recommended.

• • •

Healthful clothing contributes to good growth and development of the body. Bulletin E150 on children's clothing tells how to make clothing which is convenient, comfortable and attractive. It may be obtained by writing to the office of publication, state college of agriculture, Ithaca, N. Y.

• • •

Chopped raw carrots, cabbage or celery seasoned and mixed with butter make excellent fillings for sandwiches.

Small hangers on rods placed low enough in the closet for children to reach them encourage children to care for their clothes, teach them habits of neatness and independence, and relieve the busy housewife.

HIGHLIGHTS ON STATE CROPS

From New York State Dept. Agriculture & Markets March 12, 1929.

Apples Steady

Arrivals of barreled and basket apples were moderate. Offerings varied greatly in quality and condition, according to the New York office of the New York State Department of Agriculture and Markets. U. S. Grade No. 1, 2½ inch Baldwins jobbed out at $5-5.50 per barrel; Rhode Island Greenings of the same grade and size brought $4-6; McIntosh $10-11, and various other kinds realized from $4-6. Off-grade fruit of all varieties, however, in few instances sold lower.

Florida Potatoes in Car Lots

Florida's first car load of new crop, Spaulding Rose potatoes was received on this market this Tuesday. The potatoes showed fairly good quality but were a trifle undersized. The demand was limited and the offerings wholesaled at principally $10 per double-headed barrel. The No. 2's brought $7 and the No. 3's $4. The tone of the market on old crop potatoes was about steady. Up-state round whites, 180 pounds, in bulk sold at $2-2.10.

Live Poultry

Receipts of fowls were very light and the prices were higher. Brollers were liberal in supply and steady with one week ago. Fowls were 35-36c per pound; broilers, reds, 40-43c; Rocks 43-45c; Capons 38-42c; slips 30-32c.

Dressed Calves

Choice calves were scarce and held steady. Lightweights and small in liberal receipt, but weak and lower than one week ago. Choice were 23-24c per pound; fair to good 18-22c; common 14-16c; small to medium 12-16c; lightweights 10-11c.

Butter—Cheese—Eggs

The butter market is lower and prices declined since a week ago. Higher score was 50-50½c per lb., extra 49½c.

The cheese market for fresh flats is steady, but prices show no upward trend as that grade of cheese is still selling at 23½c per pound.

The egg market is very irregular with prices on the downward trend. Nearby hennery whites, closely selected extras were 37-40c per dozen. Average extras 37c; nearby gathered whites, best grade 34-36c; nearby hennery browns, top grade 36-38c.

Livestock

Bulls: Market steady, few good $9.75; medium $8.75-9.50; common lightweights $7.50 to 8.25. Cows: (mostly dairy) Market steady, common and medium $7-7.50; a few good $8.25; low cutter $4-6.75; reactor cows $4.50-7.50. Vealers: Demand active, market steady. Good and choice $17-19; medium $13-16; culls and common $9-11. Calves: (whole milk-feds excluded) market steady, medium and choice $10-13; culls and common $6-7. Lambs: Market steady; good and choice $17-$18; medium $16-16; culls and common $10-12. Sheep: Market steady Ewes: medium and choice $7-8.50; culls and common $3-4. Hogs: Market weak to firm 85 to 130 pounds $10.50-11; 130 to 160 pounds $11-25-$12; 165 to 220 pounds $12-$12.50; sows (rough) $8-8.50.

Hay Market Steady

The receipts of hay are light. The demand for No. 1 timothy is good, but is very scarce. No. 1 was $26; No. 2, $25-25; No. 3, $19-21.

Around Our House

CONCERNING CURTAINS

Light is an enemy of curtains just as curtains are enemies of light, according to Beulah Blackmore of the New York State College of Home Economics at Cornell University.

Holes which appear in curtains and drapes during laundering are often caused by light instead of improper treatment at the laundry. The exposed fabrics of curtain materials gradually break down and the curtains become so tender that they fall apart when they are washed. Comparative tests show that cotton resists light better than wool, rayon and silk. Silk is the least resistant of all fabrics, particularly the gummed and weighted silk sold so commonly.

Rayon of silk curtains which have been attacked by light are most easily torn when wet because these fabrics become especially tender in water.

To determine whether a curtain has been harmed by light the upper and lower portions of the curtain may be compared. Usually the upper section which has been protected from light by window shades is far stronger than the lower portion.

Air moisture and smoke are other agents which affect curtains. Wear also occurs when the lower portion of the curtain is allowed to blow in and out of windows and to rub against screens.

Rude Rural Rhymes

NOBLE RATIONS

How as a food the spud doth shine, for that the spud is alkaline; which means, of course, in its reaction assimilated satisfaction. If spuds are boiled ready yet the water also should be eat, to throw it out is very wet. You must not waste that noble part, I pray thee; don't, you'll break my heart. Of all such juices Hannnah's savy, transmogrifying into gravy. You ought to hear Doc Kellogg speak; the Doc he comes from Battle Creek where cereal is rated pat; yet he admits right off the bat, potatoes's way ahead of that, for cereals show acid sign and lo! the spud is alkaline, preventing premature necrosis and other ills of acidosis. They say if business should be bushed and we by poverty be pushed, America could easy spare nine-tenths of all her present farm, so the the farm poured from her lap a plenty spuds to fill the gap. A perfect food we do not boast, and yet with milk they are, almost. Yea, if with spinach we combine, plus good tomatoes ripe and fine, a feller'd live to 99; for lo; the spud is alkaline.—BOB ADAMS.

Of interest to every car owner:

A statement of General Motors' Policy

by Alfred P. Sloan, Jr., President

THE public has been visiting the automobile shows in the larger cities of the country to see new models.

Suppose you could drop a curtain over the 1929 automobile shows and raise it immediately upon the shows of ten years ago. How vividly the changes would then appear!

Go back five years, or even three, and the contrasts are amazing. So fast have the improvements followed one another that every year has offered you *more* for your automobile dollar—in performance, in comfort, in safety, in beauty and in style. Never was this fact quite so impressive as in the cars now on display.

This is real progress, and inevitably General Motors has been a leader in it. You cannot have hundreds of engineers, in one organization, thinking and working day and night without knowing more about making automobiles than was known the year before. You cannot have great Research Laboratories, the Proving Ground and the unmatched resources and skill of Fisher body without developing constantly better processes and new ideas. The patronage of the public makes possible all this machinery of betterment; so the public is entitled to each improvement as promptly as it has been proved.

In this way came the self-starter, the closed body, durable Duco finish, four wheel brakes. By the same process one of the remarkable feats in industrial history has just been effected: Chevrolet has been transformed into a six-cylinder car within the price range of the four—almost overnight. Similarly, the new brakes and transmissions of Cadillac and LaSalle are a fundamental improvement; while the new models of Buick, Oldsmobile, Oakland and Pontiac all represent values that could not have been offered before.

Such progress, born of the inherent ambition of an organization of active minds to do better and to give more, is of benefit to all. It offers you more for your money with each succeeding year. It gives you more value for your present car when you trade it in.

This is our policy. This is real progress.

Alfred P. Sloan Jr.

ALFRED P. SLOAN, Jr., *President*

Detroit, March 1, 1929

AN INVITATION

General Motors would like you to see the progress which it has made during the past year and which is represented by its new models. More than that, it invites you to peep behind the scenes at the methods employed to assure further progress. Simply check on the coupon below the products in which you are most interested. Full information will be sent without obligation *plus* a valuable little book which tells the inside story of the General Motors institution. This book—*"The Open Mind"*—has real value to every one owning or planning to buy a car.

COUPON

General Motors (Dept. A), Detroit, Mich.

Please send me, without obligation, information on the *new models* of the products I have checked—together with your new illustrated book *"The Open Mind."*

Woglam Brothers say "BULL BRAND"

I RECEIVED an interesting letter from Woglam Brothers, up at Prince's Bay, N. Y.

"Our Leghorns are laying 65% in July after laying 60% and 56% all winter. We had the following results from 40 birds in two crops of 90 each: February 722 eggs; March, 858 eggs; April, 851 eggs; May, 900 eggs; June, 858 eggs; July 890 eggs. These birds ate plenty of B-B Laying Mash. *Bull-Brand Poultry Feeds will double the profits of any poultryman."*

We Guarantee Most Production

We're glad our customers feel that way about B-B Poultry Feeds and wish that we could guarantee B-B to be twice as profitable as any other feed. We cannot honestly do so. All we can truthfully say is that you will get more eggs from feeding B-B—*per dollar of feed cost* —than from any other feed.

We're always ready to give your money back if you do not find this to be true.

See the B-B dealer; start increasing your egg money at once. Maritime Milling Co., Inc., Buffalo, N.Y.

Country Correspondence

South Hill

March 13.—After being held in the grasp of winter for some weeks, those fine spring-like days has caused an awakening. The hum of motors again is as music and the occasional song of robin and blue bird foretells the spring.

Robert Dean of Andover was a recent visitor on the farm.

Mrs. Leo Horan and little sons were Andover visitors a couple of days last week.

Mr. and Mrs. Cronk and little son visited Andover relatives Saturday night and Sunday.

Mr. and Mrs. Wm. Beal of Pingrey Hill and Mr. and Mrs. Schoonover of Pennsylvania were guests of their brother, Earl Schoonover and family last Sunday.

Miss Helen Hathaway of Wellsville and Ray Dennis of Hornell spent Sunday afternoon and evening at the home of Howard Dean and Anthony Dougherty.

Several of our residents were callers over the week-end, at the home of the recently deceased James Joyce of Davis Hill and also attended his funeral from Blessed Sacrament church, Andover, on Tuesday morning.

Howard Dean and babe visited her parents, Mr. and Mrs. J. Daniher of Wellsville, Monday and Tuesday.

Dan. Appier of Andover was helping Edward McAndrew with his farm work, Monday.

Com. Howland with his truck, was subduing the bad places in our highway on Wednesday.

Mr. Watson of Andover secured some fine winter scenes with his camera, on Indian Creek road, in the heavy snow of early February.

George Youmans of Wellsville is helping Dean Bros. with their work.

Greenwood

The Misses Bernice and Gertrude Rogers are ill at their home, but are better at this writing.

Milford Atkins and Clarence Reiman were in Hornell, Saturday.

Mr. and Mrs. Matt Rogers and Alta McCarriager were shopping in Hornell, Saturday.

Percy Sampson has purchased the Ellen Stephens property.

Mr. and Mrs. H. C. McCaffery were in Canisteo on business, Friday afternoon.

Mr. and Mrs. C. J. Updyke were in Hornell, Friday afternoon.

Miss Janette Streeter spent the week-end with her parents, Mr. and Mrs. Miner Streeter.

Mr. and Mrs. A. L. Trowbridge were in Canisteo, Tuesday morning, on business.

Mr. and Mrs. Archie Stephens and family called on Mr. and Mrs. George Stephens, their parents, Sunday.

The Misses Mae Whitmore, Easter Clark and Esther Williamson called on Miss Agnes McCaffery, Sunday afternoon.

Mr. and Mrs. A. L. Trowbridge and the Misses Agnes McCaffery and Mae Whitmore were in Hornell, Saturday.

The Misses Agnes McCaffery, Verona Stephens and Mae Whitmore called on Mrs. Guy Drake, Sunday afternoon.

Miss Gertrude Clark spent the week-end with her parents, Mr. and Mrs. Dever Clark.

Miss Lillian Holley spent the week-end with her parents, Mr. and Mrs. R. P. Holley.

Mr. and Mrs. A. L. Trowbridge and Agnes Caffery and Mae Whitmore were shopping in Hornell, Saturday.

Mrs. Jennie Williamson visited Mr. and Mrs. Glenn VanFleet in Canisteo a part of last week.

Mr. and Mrs. Bert Healy and son of Jasper and Edward Spencer of Bennetts were business callers in town, Saturday.

Mae Whitmore and Agnes Caffery called on Eastre Clark, Sunday afternoon.

The remains of Carlyle Spencer, who died at his daughter's, Mrs. Bert Helay's in Jasper, were brought to Greenwood, Tuesday afternoon, for burial in the Greenwood cemetery.

Mr. and Mrs. John Rogers, Jr., and John Rogers, Sr., were in Canisteo, Saturday, on business.

Albert and Burr Case of Woodward Hollow were business callers in Canisteo, Saturday.

Olive Clark visited friends in West Greenwood a part of last week.

Mr. and Mrs. Frank Cook and children of Woodward Hollow and Carl Wallace and Verona Stephens spent Sunday evening with Mr. and Mrs. George Stephens.

Mrs. H. C. Caffery and son, Stewart, were in Canisteo, Monday, on business.

Olive Watkins of Rock Creek passed Monday afternoon with Mr. and Mrs. R. P. Stephens on South Main street.

Speaking of Heart's Delight Food products, here are some of them: Coffee, Tea, Butter, Canned Fruit and Vegetables, Prunes, Rice, Rolled Oats, Catsup, Salad Dressing, Olives, Mincemeat, Milk, Macaroni, Spaghetti, Noodles, Jelly Powder, Starch.—Advertisement.

Makes Life Sweeter

Children's stomachs sour, and need an anti-acid. Keep their systems sweet with Phillips Milk of Magnesia!

When tongue or breath tells of acid condition,—correct it with a spoonful of Phillips. Most men and women have been comforted by this universal sweetener—more mothers should invoke its aid for their children. It is a pleasant thing to take, yet neutralizes more acid than the harsher things too often employed for the purpose. No household should be without it.

"Milk of Magnesia" has been the U. S. registered trade mark of the Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips since 1875.

PHILLIPS Milk of Magnesia

Prescription He Wrote in 1892 is the World's Most Popular Laxative

When Dr. Caldwell started to practice medicine, back in 1875, the seeds for a laxative were not as great as they are today. People lived more quiet lives, ate plain, wholesome food, and got plenty of fresh air and sunshine. But even then, fairly there were drastic physics and purges for the relief of constipation which Dr. Caldwell did not believe were good for human beings to put into their system. So he wrote a prescription for a laxative to be used by his patients.

The prescription for constipation that he used early in his practice, and which he put in drug stores in 1892 under the name of Dr. Caldwell's Syrup Pepsin, is a liquid vegetable remedy, intended for women, children and elderly people, and they need just such a mild, safe, gentle bowel stimulant as Syrup Pepsin.

Under successful management this prescription has proven its worth and is now the largest selling liquid laxative in the world. The fact that millions of bottles are used a year proves that it has won the confidence of people and needed it to get relief from bilious attacks, loss of appetite, headaches, bad breath, dyspepsia, colds, etc.

W. B. Caldwell M.D. AT AGE 03

It is particularly pleasing to know that the most of it is bought by mothers for themselves and the children, though Syrup Pepsin is just as valuable for elderly people. All drug stores have the generous bottles.

We would be glad to have you take at our expense how much Dr. Caldwell's Syrup Pepsin may do for you. Just write Dr. W. B. Caldwell, 452 Washington St., Monticello, Illinois, and you will be prepaid a FREE SAMPLE BOTTLE.

Elm Valley

The Ladies' Aid will meet at the home of Curtis Burdick on Thursday of next week, March 21, for dinner. A cordial invitation is extended to all.

Mrs. Mary Cole spent an afternoon recently with Mrs. Ella Scott in Canaseraga.

Mrs. Lola Howden and infant daughter visited at Charley Cole's the last of the week.

Mr. and Mrs. LaRue Sears of Belmont who were delegates to the Pomona Grange, were entertained Thursday night at Frank Mead's.

Barney Mills

James Wallace hasn't been so well the past week, Mrs. Millspaugh is nurse in attendance.

Mr. and Mrs. Sherd Austin called on their daughter, Lila, at Hornell, one evening last week.

No school last Thursday and Friday due to illness of our teacher, Miss McDonald.

John Wallace has been numbered with the sick the past week.

Mrs. Ola Rogers, Mrs. Gertrude Potter, Mrs. Howard Briggs, Mrs. Fley Pease, and Lee Wallace all spent a short time last week with their father, James Wallace.

Notice to Creditors

Individuality Molds the Hat Mode

Dozens of styles in hats to choose from and all equally smart. Tight little affairs that hug the head brimless—larger hats with short crowns and off-the-forehead lines. Lots of straw combinations. So many kinds that every woman may find the one that most becoming and best suited to her own individuality.

Our Millinery Buyer Returns

The many customers and friends who have been awaiting the return of our buyer from New York will be glad to know she is in the store and that they may now hear about the newest millinery fashions at first hand and see the lovely hats she has bought.

A Superb Bedroom Group for $139

Smartly designed with all mean ingless, impractical detail eliminated this Bedroom Suite achieves simple beauty with the decorative use of contrasting woods and the popular diagonal veneer.

The large mirrors give small rooms an illusion of spaciousness—the roomy chest is a practical stowaway piece with center top and bottom drawer slides.

Bed Vanity Dresser Chest Four Pieces for $139.00

New Spring Coats are Marvels of Luxury

Such luxurious affairs of fabric and fur — would make any springtime a success. For our new coats are outstanding in their beauty and smartness—and will add distinction to any wardrobe.

Soft velvety fabrics in skylark, greys, sailor blue, woodrose, rusk, navy and black—sport fabrics in ombres, oxford and tweeds —all splendidly made—many trimmed in mole, lapin monkey, Krimmer, raccoon and American Opossum. Truly a most distinguished collection of coats from which to choose.

New Silk Prints at $1.85

The vogue of prints begins with sunlight and ends with starlight—so important have they become. And so you may come here expecting to see plenty of silk prints—a new member of the family being our new line at $1.85.

New patterns refreshingly original yet charmingly wearable—colorings that reveal new color harmonies. See them Saturday.
