OF INTEREST TO FARMERS

1929 NOT A YEAR TO SPECULATE

Authorities Advise Potato Growers To Be Normal With Their Planting Of Tubers This Year.

A series of potato and bean meetings conducted by the Allegany County Farm Bureau in several communities of the county during the past week proved very successful and resulted in a renewed interest on the part of potato and bean growers to grow these crops at a greater profit.

Prof. F. O. Underwood, extension specialist from the New York State College of Agriculture, discussed various phases of the growing of these crops with one great point in mind, that of reducing to the lowest figure the cost of production. Meetings were held in Angelica, Fillmore, Canaseraga, Centerville and Whitesville. Fillmore and Canaseraga are the two great intensive bean producing sections of the county and the growers are very much concerned about the control of bean diseases as well as the outlook for the 1929 crop. According to Prof. Underwood the present domestic consumption of beans is apparently increasing at the rate of over a half million bushels annually and it appears that our present needs are in excess of 18,000,000 bushels and that the 1928 domestic crop of about 16,600,000 bushels is below such needs by about 1,400,000 bushels. An average yield in 1929 on an acreage ten per cent. greater than that harvested in 1928 would produce about the supply needed, provided such increased acreage is proportionately apportioned among the different classes, according to demand. Present price levels for beans will tempt to an excessive increase in acreage this year. An acreage increase materially above ten per cent., especially if yield should be much above average, would incur danger of a surplus that might put the market on an export basis with resulting drastic price reductions.

In the communities of Angelica, Centerville, and Whitesville, it was revealed that the Southern States which produce early potatoes have reduced their acreages about 25 per cent. below last year. On the other hand the late potato sections, including up-state New York, are planning a reduction of only about eleven per cent. and no large potato prices can be expected this coming fall. Professor Underwood states that the late crop grower should plan on his normal average acreage with possibly a slight reduction and should use every means possible to keep down his cost of production. This involves good seed, treated for disease, good cultural practices, spraying or dusting to control insect pests and blight, and proper fertilization; 1929 will not be a year to speculate on potatoes.

MILK SHORTAGE GROWS SERIOUS

May Have to Enlarge New York Milk Shed Unless Dairymen Give Cows Proper Care in Summer and Fall.

The New York milk shed will be extended next fall, according to H. A. Ross of the department of agricultural economics at Cornell University, unless the dairymen in this territory are thoroly aroused to the seriousness of the present situation. The extension can be avoided if dairymen will properly care for their cows during the summer and fall. Shortages were avoided during the fall months of 1925, 1926 and 1927 by the use of storage cream, the establishment of a few new plants in the territory, diversion of milk, and by means of increasing production in individual dairies thru price increases and education. In 1928 in spite of renewed appeals for increased production, an actual shortage occurred during the winter months. For a time dealers were even forced to limit their customers.

No more cows are on New York State farms than there were a year ago, altho the number of calves and yearlings has increased. The use of milk in the metropolitan area increases on the average of five per cent. a year. Unless the cows are so managed as to increase the supply next November by approximately 7,000 cans a day, western cream will have to be admitted to the territory.

The college is ready to give information to dairymen so that they can profitably feed the cows to meet the shortage.

DRAIN WET SPOTS AND SAVE TROUBLE

Tile Drainage Saves Land, for Production and Wear and Tear on Farm Machinery—Do the Job Now

Drain the wet spots in your fields, says A. M. Goodman of the New York state college of agriculture. Tile drainage of wet spots in otherwise clear fields is the most profitable form of drainage.

In wet spots the tractor mires, the disc clogs, the drill and corn planter mud up and when harvest time comes the ruts made by these machines are usually baked hard and the grain binder, corn harvester or hay loader bumps and bang over them. To go over these rough places knocks the machinery to pieces much faster than to harvest a heavy crop on smooth land. It costs more to drag the plow and disc around a wet spot than to plow the same area of land if it were drained.

Not to raise just as good crops on the wet spots as on the rest of the field is waste, Professor Goodman says. A little well-directed effort this season will do the job for all time. Since tile drainage is all underground except the outlet at one end the area in the field which would otherwise be in ditches and wet spots is saved for production.

Tile drainage for the entire field is recommended by the college wherever possible. Many farmers think they can't affrod extensive tile drainage system at present but Professor Goodman says that no farmer can afford to have wet spots in otherwise clear fields. Farm bureau agents or men at the college can give information on tile drainage.

Around Our House

SPRING TONICS

Vitamins are a more effective spring tonic than the molasses and sulphur used by our grandmothers, according to Helen Hubbel of the New York state college of home economics.

During late winter and early spring when fresh vegetables and fruits are scarce, be sure your meals contain vitamins. A lack of them is soon felt by the entire family but is especially harmful to growing children.

For the best health proper amounts of all four vitamins must be included in the daily diet. Vitamin A, which increases resistance to colds, is provided by dark green leafy vegetables, such as spinach or other greens, milk, butter, and cod liver oil. All foods in their natural state contain vitamin B, particularly important because it keeps the digestive tract in good condition. Both these vitamins are necessary for proper growth in children. The best sources of vitamin C, another food element which adds in the general health of the body, are oranges, tomatoes, grapefruit, cabbage and other raw vegetables. An egg or an egg yolk a day, and cod liver oil, or sunshine supply vitamin D, which keeps bones and teeth in good shape and aids in resisting colds.

Approximately one out of every three pigs farrowed dies before weaning time. To cut down these losses give the sows proper feed, provide the right kind of a farrowing pen, and give the sows and litters careful attention.

PUT MOWING MACHINE IN GOOD CONDITION

Overhaul so That It Will Be Ready for Work When You Need It—Adjust Pitman Bolts

It pays to have your mowing machine in good condition when you want to use it according to B. S. Rabb of the New York state college of agriculture, and now is the time to give it an overhauling and to find out whether it needs repairs.

The ball and socket joint on the knife bar end of the pitman may be out of adjustment because the last work done was mowing the old pasture, cutting buckwheat, or other work on rough raw ground. The draft, the repair costs, and length of life of the mower depends to a great extent upon the proper setting of the pitman shaft and the care given it. If the pitman head bolts are too tight, particularly the knife head bolt, the draft will be increased. Moreover if the pitman bolts are permitted to become too loose, or the strap rivets to loosen, the pitman and knife are subjected to excessive vibration which may heat the pitman box, break parts and cause abnormal wear. Operating the pitman by hand will usually show whether it is in proper adjustment.

When the pitman is properly adjusted and all cutter parts are set as they should be, the front end of every knife section rests smoothly on the guard plate in position to make a shear cut. To maintain this ideal condition, guards and guard plates, wearing plates and knife holders must be in good condition and correctly set.

If the knife sections and ledger plates are not sharp and do not fit closely together they will be no more able to cut grass than loose and dull shears can cut cloth. Replace badly worn wearing plates when the guards are repaired. Oil and adjust the important wearing parts with care to add to the life of the machinery.

CAN DANDELIONES FOR NEXT WINTER

Greens Are Most Tender During Last of March and First of April—Labor and Fuel Are Only Costs

Take advantage of nature's generosity to provide greens free of cost for your family next winter, the New York state college of home economics suggests to housewives.

Dandelion greens have the most delicate flavor if picked in late March or early April when the leaves are young and tender. Dadelion plants are abundant in fields and lawns and cost only the labor and fuel involved in preparing them so the thrifty housewife this spring will put up a supply of these for use next winter.

Wash the freshly picked greens thoroughly. To shrink the greens put them in a closely covered kettle with a small amount of hot water and steam a few minutes. When they have shrunk, pack them quickly in clean jars and fill the jars with fresh hot water to within one-fourth inch of the top. For each jar add one teaspoonful of salt and one tablespoonful of vinegar or lemon juice. Place a new rubber on each jar, adjust the cover, and partly seal it by adjusting only the upper clamp or by screwing on the lid part way. Boil th jars in hot water for one and one-half hours or put them in the pressure cooker and cook forty minutes at ten pounds pressure. If the hot water method is used be sure that the boiling water coveres the jars to a depth of at least one inch. Remove the jars from the canner, seal them, and invert them to cool.

A combination by weight of two parts standard middlings and one part cottonseed meal may be used to replace glutton feed pound for pound in the grain mixture for cows.

* * *

The thrifty shopper buys spring clothes which will be suitable for more than one season.

POOR POTATO SEED MEANS LIGHT CROP

Labor and Money Spent on Fertilizer, Spraying and Cultivation Are Wasted if Tubers Haven't Right Start

Poor seed will not produce a good crop of potatoes no matter how much labor and money are expended on fertilizer, spraying and cultivation, according to F. H. Rennow of the New York state college of agriculture. Good seed must be relatively free from virus diseases, true to variety and in good condition.

An inspection of seed shows whether it is badly sprouted, shriveled, or affected with black heart or freezing injury but only by examination of the growing plant can freedom from virus diseases be determined. To obtain healthy seed maintain a seed plot in which control methods against virus diseases are used, or else purchase seed from some one who uses control methods.

Some growers buy enough good seed each year to plant an increase plot from which they obtain seed for their main planting the following year. Such a practice is satisfactory only if the good seed purchased is planted at a distance from potatoes which have a relatively large amount of degeneration diseases and if conditions are not too favorable for the spread of virus diseases within the plot.

At present there is no way to know absolutely whether seed is free from virus diseases but the use of certified seed usually results in healthier stock. The fields from which such seed comes have been inspected by the state college and have been found to contain only a small amount of virus diseases.

The best test of a successful poultryman is his ability to rear a thrifty stock of chickens says bulletin E153 on "Rearing Chickens." This bulletin discusses hatching, brooder houses, feeding young chickens, developing pullets, segregation of the sexes, and many other subjects in which the poultryman is interested. Write to the office of publication, state college of agriculture, Ithaca, N. Y., for this bulletin.

* * *

Uncle Ab says to keep your hand on your purse when you are with a man who boasts of his honesty.

DULL FINISH FABRICS ARE POPULAR

A dull finish in all fabrics is accented in the present mode, according to Beulah Blackmore of the New York state college of home economics. The smartest of the new cotton fabrics are no longer stiff and shiny but flexible to suit the activities of the modern athletic woman. Most of the new printed cloths materially have no shine, not even a mercerized finish. The dull finish is of advantage in laundering, for a highly finished cotton fabric does not keep its appearance after laundering as dull finished materials do.

Agrigraphs

If you are going to install a ventilation system to prevent damp stable walls next winter build the out-take flue from the snow floor to the eaves now while the mows are empty.

Now that spring is here the children can play out of doors and will want things to play with—swings, see-saws, horizontal bars, sandboxes and the rest. Bulletin E110 tells how to make this equipment. A post card sent to the office of publication, state college of agriculture, Ithaca, N. Y., will bring you the bulletin free of charge.

Many so-called weeds make excellent salads or cooked greens if used in the spring when their leaves are tender. The New York state college of home economics at Cornell University, has a leaflet on wild salad greens and potherbs which will be sent to anyone who writes for it to the office of publication, college of agriculture, Ithaca, N. Y.

9 reasons why it will *pay* you to choose a General Motors car

PRODUCTS OF GENERAL MOTORS

CHEVROLET. 7 models. $525—$725. A six in the price range of the four. Smooth, powerful 6-cylinder valve-in-head engine. Beautiful new Fisher Bodies. Also Light delivery chassis. Sedan delivery model. 1½ ton chassis and 1½ ton chassis with cab, both with four speeds forward.

PONTIAC. 7 models. $745—$895. Now offers "big six" motoring luxury at low cost. Larger L-head engine; larger Bodies by Fisher. New attractive colors and stylish line.

OLDSMOBILE. 7 models. $895—$1035. The Fine Car at Low Price. New models offer further refinements, mechanically and in the Fisher Bodies—yet at reduced prices. Also new Special De Luxe models

OAKLAND. 8 models. $1145—$1375. New Oakland All American Six. Distinctively original appearance. Splendid performance. Luxurious appointments. Attractive colors. Bodies by Fisher.

BUICK. 19 models. $1195—$2145. The Silver Anniversary Buick. Three wheelbases from 115 to 128 inches. Masterpiece Bodies by Fisher. More powerful, vibration-less motor. Comfort and luxury in every mile.

LASALLE. 14 models. $2495—$3875. Companion car to Cadillac. Continental lines. Distinctive appearance. 90-degree V-type 8-cylinder engine. Striking color combinations in beautiful Bodies by Fisher.

CADILLAC. 25 models. $3295—$9000. The Standard of the world. Famous efficient 8-cylinder 90-degree V-type engine. Luxurious Bodies by Fisher and Fleetwood. Extensive range of color and upholstery combinations.

(All Prices f. o. b. Factories)

ALSO

FRIGIDAIRE Automatic Refrigerator. New silent models with cold-control device. To-once cabinets. Price and model range to suit every family.

DELCO-LIGHT Electric Plants—& Water Systems. Provide all electrical conveniences and labor-saving devices for the farm.

1. *Engineering Excellence*—All General Motors products embody the tested ideas of open-minded scientists of the Engineering Departments, Research Laboratories, and Proving Ground.

2. *Fair Price Policy*—General Motors products offer maximum value in each price class, whether you pay cash or buy on time, or use your present car as part payment.

3. *General Motors Acceptance Corporation*—The largest time financing company, offering low rates, making it easy to buy out of income. (GMAC Plan).

4. *High Resale Value*—A large number of miles of transportation are built into each General Motors car and truck. That mileage gives the product a definite cash value, which is maintained in the used car or truck market.

5. *Finest Body Work*—Fisher Body is a part of General Motors. That assures you the most sturdy, safe and beautiful bodies. All General Motors cars have "Body by Fisher."

6. *Volume Production*—By producing around 2,000,000 cars and trucks a year, together with many other products, General Motors can effect large economies in manufacture which are passed on to you in the quality and price of your General Motors car.

7. *Combined Purchasing Power of Many Companies*—Assuring the use of the best materials at the lowest prices.

8. *World-wide Service*—There are 33,000 salesrooms and service stations in more than 100 countries to serve General Motors' customers.

9. *Permanence*—General Motors is in business to stay. Its resources, strength, and stability assure you that the quality, service, and value of its products will be maintained.

Notice to Creditors

Pursuant to an order of Hon. B. B. Ackerman, Surrogate of the County of Allegany, notice is hereby given to all persons having claims against the estate of P. C. Lynch, late of the town of Andover, N. Y., deceased, to present the same with proper vouchers thereof to the undersigned Administratrix at the Law Office of Crayton L. Earley, in the Village of Andover, N. Y., on or before the 10th day of June, 1929.

Dated December 4, 1928.

BRIDGET LYNCH, Administratrix. 23

Rude Rural Rhymes

Turn, Turn, My Wheel

I ponder on the things that I shall meet when comes my hour to die. In my imaginative mind the future is so well defined that I shall really be, you know, disgruntled if it is not so. Some one I love will be at hand, lest I should fear in that strange land. Yet shortly I must stand alone, nay, not before an Awful Throne, but, looking inward, I shall see unmasked the naked soul of me. Remembering life, without, within, I shall know well the sting of sin, beholding what I might have been. The major part of that employ, I cannot hope that I'll enjoy. I know that I'll be feeling queerly, seeing late and seeing clearly all the crooked ways I've wandered all the golden hours I've squandered. Is this not what, in ancient story, wise men meant by purgatory? How much of this I cannot tell, but I shall learn the lesson well, ere I in Heaven participate as far as in my present state, I'm fited to appreciate. With every loved one, every friend, long happy years I hope to spend; yet even this shall have an end. For, tho in Heaven resident, I hope to feel some discontent. To love and learn and suffer more, as I have often done before, I'll win back thru the gates of birth and serve another term on earth. It may be, friend, one life or so will teach you all you need to know, but live a long, hard road to go.—BOB ADAMS.

Country Correspondence

South Hill

April 11. — The fickleness of April was demonstrated by the snow storm that prevailed Wednesday morning, after record-breaking warm weather.

Francis Jolce, of Davis Hill, is working for Anthony Dougherty.

Mrs. Margaret Dean reports a very enjoyable and instructive sightseeing week in New York, also visited many points of interest in Philadelphia while espending a few days at the home of her son, W. J. Dean.

Mrs. John Daniher, of Wellsville, spent Friday night at the home of her daughter, Mrs. A. L. Dougherty.

Miss Mary Byrnes, of Wellsville, visited her cousin, Mrs. Howard Dean, last week.

In the recent death of Dr. George Lynch, of Hornell, South Hill mourns the "passing" of an upright and gifted young son, and its people sympathize with the family in the loss of their devoted brother.

Mr. and Mrs. A. Dougherty and Mr. and Mrs. Howard Dean enjoyed the dancing party at Blessed Sacrament Parish Hall, Friday night.

Miss Seeley of Andover is again able to motor daily to her school in Fulmer Valley.

Mrs. Howard Dean and little daughter were the guests of her parents in Wellsville Saturday night Mr. Dean joined her for Sunday dinner.

R. Paul Dean and little daughter, Roberta Helen, motored from Bradford, Pa. Monday evening for a short visit with his mother and family until Wednesday. Mr. and Mrs. Dean were called to Bradford by the death of Mrs. Dean's father, whose remains were brought from Tulsa, Okla. to his home town for burial.

Rob. Dean of Andover visited the farm Wednesday.

Miss Anna O'Leary was the guest of her sister, Mrs. M. Dean and family, Tuesday night.

Ed. McAndrew spent Wednesday at his farm home.

Mr. Schoonover's parents have removed from Pennsylvania to take up their residence with him this summer. Earl has taken over the pumping of the Collens Co. wells, which was recently resigned by Mr. Moon.

West Greenwood

Glenn and Alton Coombs, of Greenwood, spent Tuesday with their brother, Van Coombs.

Mr. and Mrs. Fred Brewster and Idnett spent last Sunday with her parents, Mr. and Mrs. Alvin Miller, at Hornell.

Mr. and Mrs. Clarence Brutsman were in Andover Friday.

Bernice Conrad spent Sunday night and Monday with Elizabeth and Leola Teribury.

The cheese factory started last Tuesday morning. Chas. Baker of Troupsburg is making cheese.

Miss Delores Hyland spent a couple days last week with Mr. and Mrs. Clarence Brutsman.

Mr. and Mrs. Ivan Brown and Veronica, of Canisteo, spent Sunday A. M. with her father, Fred Conrad.

Geo. Gallman is working at Van Coombs'.

Reita Freenaughty spent Thursday night with Louise Hyland.

Mrs. Mildred Coombs and daughter spent Friday at the home of S. P. Taylor, near Andover.

Elizabeth and Leola Teribury spent Sunday with Bernice Conrad.

Fred Brewster was a business caller in Andover Thursday.

Mr. and Mrs. Tho. Murray were in Andover Saturday.

Mr. and Mrs. Clair Jackson, of Andover, Mr. and Mrs. Clarence Cronk and son, William, of South Hill, were Sunday dinner guests at their fathers', Wilmer Cronk.

Fred Conrad has been quite sick the past week.

Davis Hill

Mr. and Mrs. U. V. Davis and son, of Rochester, brought Mrs. L. E. Davis back to her home Saturday evening, after a week's visit in Rochester. Mr. and Mrs. Leo Davis entertained the party Sunday.

Mr. and Mrs. Lee Trowbridge were callers on the hill Sunday.

Mr. and Mrs. Harold Perry and children, of Shinglehouse, visited her parents, Mr. and Mrs. John Ordway, Sunday and Monday.

Mr. and Mrs. Glen Halsey visited her father, Jesse Grossman, in Andover, Sunday.

Mr. and Mrs. Pete Ordway visited Mrs. Ordway's parents in Petrolia Sunday.

Miss Minnie Vaughn, of Hornell, and Misses Rosanna and Edna Joyce were visitors at Floyd Slocum's with Frank Halsey's, Sunday.

Mr. and Mrs. Will Green, of Independence, were visitors of Mr. and Mrs. Floyd Slocum, Monday evening.

Mr. and Mrs. Archie Green and babe returned to Bradford Sunday where Mr. Green is employed.

The wind of last week did considerable damage up to Leo Davis' and L. E. Davis', moving a silo off the foundation at Leo Davis', and blowing shingles off roofs. Blew in a big window at L. E. Davis' and nearly ruined a shed.

Floyd Slocum was patching up the roof of Leo Davis' house, Monday.

Mrs. Frank Halsey, son Charles, Mr. and Mrs. Lawrence Ordway and children were visitors at Cass Kenyon's Sunday.

L. E. Davis and Leo Davis and Charles Halsey assisted Floyd Slocum to buzz wood Tuesday.

Mr. and Mrs. Arling Briggs were visitors in Andover Thursday.

Ed. Earley was a dinner guest at the home of Floyd Slocum, Sunday.

Mrs. Ed. Earley is at Fairport, N. Y., assisting in the care of her daughter, Mrs. Herbert Walton, and little babe.

Mrs. Ed Carson is visiting her daughter, Mrs. Leeman Davis, for a few days.

Word comes to Mrs. L. E. Davis of the death of Helen Scott, daughter of Mr. and Mrs. Maynard Scott, of Belmont. Helen is about fifteen years old, her sister, Dorothy, died less than a year ago. Mr. and Mrs. Scott have the sincere sympathy of Davis Hill people in their deep bereavement. Mrs. Scott is a niece of Mrs. L. E. Davis.

Barney Mills

Miss Mary McKinley visited the Marsh school on Monday.

Mr. and Mrs. John Wallace and children attended the shower at the M. E. Church Saturday night, given for Mr. and Mrs. Charles Tracy.

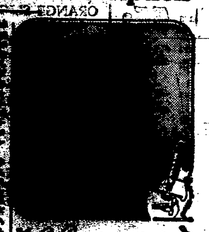
Mrs. Victor Heselton and daughter spent several days last week with Wellsville relatives.

Mr. and Mrs. R. Thayer and daughter of Wayland are spending some time with Mr. and Mrs. Alvin Edwards.

Mr. and Mrs. George McKinley and family, also Mr. and Mrs. Charles Tracy were Sunday visitors with Mr. and Mrs. C. Wallace.

A party of friends from Arkport were callers in this place on Sunday.

Millions of Families Depend on Dr. Caldwell's Prescription



When Dr. Caldwell started his famous medicine, back in 1875, he supposed that a few people would be glad to buy one bottle of it, if they got relief. Instead, they kept on buying, and kept on telling others about it. Gradually, the demand grew and grew, from a few friends to a few hundred, then to thousands, and finally there was no doubt that early Dr. Caldwell was right in his belief that there are millions of people who suffer from constipation, who do not believe there is any real relief for them except a cathartic or laxative, and who need a mild, but gentle bowel stimulant as Syrup Pepsin.

Under careful management this preparation has grown until South and North America, Europe, Australia, Africa, Asia, the Isles of the Seas, then hundreds of thousands, then millions of people are used a year. Everyone that tries it gets the confidence of people who needed it to get relief from headaches, biliousness, dizziness, indigestion, loss of appetite and sleep, bad breath, dyspepsia, colds and fevers.

Millions of families are now never without Dr. Caldwell's Syrup Pepsin, and if you will once start using it you will also always have a bottle handy for emergencies.

It is particularly pleasing to know that the most of it is bought by mothers for themselves and the children, though Syrup Pepsin is just as valuable for elderly people. All drug stores have the generous bottles.

We would be glad to have you prove at our expense how much Dr. Caldwell's Syrup Pepsin can mean to you and yours. Just write "Syrup Pepsin," Monticello, Illinois, and we will send you prepaid a FREE SAMPLE BOTTLE.

Greenwood

Mr. and Mrs. Howard Scribner and two sons of Wellsville and Mr. and Mrs. Grant Fuller and son of Andover and Mr. and Mrs. Clifford Caffry and daughter visited their parents, Mr. and Mrs. George Caffry on West Hill Sunday.

Born Saturday to Mr. and Mrs. John Oamar, a daughter.

Mr. and Mrs. A. L. Trowbridge and two grandchildren, Agnes and Junior Caffry, called on Mr. and Mrs. John Oamar Sunday.

Mr. and Mrs. Guy Drake and children visited Mrs. Ada Sweet, on Bush Hill, Sunday.

H. C. Caffry and son were callers in Almond Sunday.

D. P. Madison delivered a new Chevrolet cad to Mrs. Mary Webster Sunday.

Mr. and Mrs. John Rogers called on Mr. and Mrs. John Oamer Sunday.

Miss Helen Brown called on friends in Hornell Sunday.

Clarence and Julia Osmin, of Reville, were in town Saturday.

Mr. and Mrs. Henry Childs and two children, of Cuba, spent a few days last week with Mr. and Mrs. Malden Whiteman.

Mrs. Mae Wambold spent last week at her home in Dalton.

Mr. and Mrs. Melden Whiteman and son were in Cuba recently as the guests of Mr. and Mrs. Henry Childs.

Mr. and Mrs. Howard Greene, of East Valley, spent Saturday and Sunday with Mr. and Melvin Atwell.

Mr. and Mrs. Guy McMindes and children, of Canisteo, visited Mr. and Mrs. W. O'Dell, on Dryden Hill, Sunday.

Mrs. H. C. Caffry and son Stewart, were business callers in Canisteo, Saturday.

Mrs. Roy Woodworth and two daughters spent Sunday with her parents, Mr. and Mrs. Floyd Sherman, in East Greenwood.

Miss Mae Whitmore spent Monday afternoon with Miss Agnes McCaffery.

Mrs. S. L. Trowbridge spent a part of last week with her daughter, Mrs. H. C. Caffry, in Norton Hollow.

Mr. and Mrs. Lewis Rugar and son and family, of Bath, called at A. L. Trowbridge's, Sunday.

Mr. and Mrs. B. Hesses and children, of Buffalo, visited Mr. and Mrs. R. Sampson over the week-end.

Mr. and Mrs. Andrew Bess and daughter, of Canisteo, passed Sunday afternoon with Mr. and Mrs. Jard Sampson.

Mrs. Alice Swarts and daughter, of Hornell, called on Mrs. Dever Clark, Monday.

Miss Mildred Updyke spent Monday afternoon with Miss Esther Williamson.

Miss Esther Clark spent Monday afternoon with Miss Agnes McCaffery and Miss Mae Whitmore.

A New Merchant

S. O. Brown has moved into the little Bloss house, Greenwood St., and is the authorized representative of the Mellinger Tire and Rubber Co., a company that is bound to put a better tire, tube and battery on the market. The new Mellinger tire, baloon and cord is guaranteed for 18 months, not only against poor material and workmanship but for all road hazzards, even negligence. It has a heavy layer of pure gum on the inside that protects both tube and tire, then that isn't all. Brown is authorized to give from 5 to 10 dollars for the old tire toward the new. Golly! See Brown and save money. Then he has a first class tailoring agency for men guaranteed to suit or no sale. Save money on Caps and Hats direct from the mill right up to the minute style. Shirts, Underwear, Hosiery and Socks right from the mill. Golly! Investigate and save money. Brown's Magnetic Light. Every one needs one. See Brown. Then the Speedo Can Opener for every kitchen. See Brown. Then last but least is the Kriss Kross Stroper for safety razor blades. It takes the H out of shave. A little money invested will save money.—Advertisement.

BRIEF BUSINESS BRINGERS

FOR SALE

FOR SALE—Farm, village, oil and business properties in Allegany and Steuben counties. Phone 293. Calhoun Real Estate Agency, Andover, N. Y.

FOR SALE—Ten room house, fair barn, 21 acres, village and state highway. Owner ill must go. Also Modern 7 room house, centrally located, a good buy. Home Enterprise Sales, Room 5 State Bank Bldg. Andover, N. Y., R. E. Shaff, Sales mgr.

FOR SALE — To close estate, seven-room House with bath, on Rochambeau Avenue, Andover. Inquire of John Diffin or at Mira Diffin's office, Andover, N. Y.

FOR SALE or RENT—My house on North Main Street, where I now reside. George Maison. 16

$23 SAVING ON HAMILTON PLACE VACUUM CLEANER

LIGHTWEIGHT—BALANCED—EASY TO CARRY

Was $62.50; now $39.50. Saving made by eliminating factory-trained agent supervisors and agents. Triple action: mild sweeping, thorough beating, powerful suction. Cleans the heaviest rugs and leaves the nap like new. Motor—large and powerful—runs smoothly on ball bearings and never needs oiling. Easily operated—it glides without effort. We shall be glad to let you try this cleaner in your home or on our store demonstrating stand. No better cleaner is made. We respectfully invite inspection.
