OVER-AND-OVER

The High School Assembly was just a little different last Friday morning. Chaplain McLeod of Alfred University gave a very fine talk that not only was enjoyed by all but this same talk was of vital interest to all young people who soon will be out in the world helping and being helped by their fellow creatures.

It was a talk of values and service. Yes especially as pertaining to young High School students.

A chemist will tell us that we are worth about $8.10. According to the business man we are worth about $5,000. As an artist, giving to posterity some masterpiece such as "The Angelus," is worth about $100,000, it has been estimated. But in our relations to our fellowmen we are beyond estimating if we are of service to them. Chaplain McLeod left a lasting impression with the student body. We hope he can come over again some time.

The sale of season tickets was not much of a success. After what everybody says about the Whitesville game; well it's just too bad more Andoverites did not take advantage of this opportunity. Andover is going to have a real team. The gym will be full to overflowing the next game.

Another opportunity will probably be given to the school children to purchase season tickets then.

Let's support the A. H. S. team of the decade.

The Andover girls sure put up a great battle against the superior sextette from Whitesville. They gave all they had until the last whistle was blown.

Marial Brague, the newly elected captain, was unable to play, due to a low mark in one of her courses. Of course this handicapped our girls a little.

The midget boys' team, with Francis Cable appearing to tower above them, surely showed Andover some real basket ball on Dec. 10th, in the local High School Gym. Their passing was accurate and their defense was superb. Whitesville had to resort to long shots continually, being unable to get nearer than the four line. Much of the A. H. S. defensive strength was due to Basil Perry, who was continually getting the rebounds from the opponents' basket.

A team of Freshman, excepting Cable, the captain, playing their first game on the local court sure did noble. With a little coaching, their offensive strength should improve materially.

Allegany County Declared Remodified

The U. S. Department of Agriculture reports that Allegany county has been declared a "remodified accredited area," for a period of three years.

This is due to the active part taken by the accredited veterinarians and county tuberculosis committee. Much testing has been done within the past three months. The report sent to Albany showed an infection of less than .2 of 1%. Allegany county continues to be a fine source of tuberculosis free cattle.

Various Legends Tell of the Origin of Music

Music, most authorities agree, had a vocal origin. Some believe man attempted to imitate the sounds of birds, others say his melody developed from hunting calls or other vocal signals employed in primitive life. A Chinese legend goes so far as to declare that a miraculous bird provided the musical scale, while the Japanese say music was devised by the gods to lure the sun-goddess from a cave where she had retired. The Arabian legend has it that Modhar, a camel driver, fell from his seat and hurt his arm. In pain he called out "Ja, Jodah." His fine voice stirred up the camels so that they moved more quickly. So (who could not guess the result!) from that time all camel-drivers sang.

It is interesting to note that the Greek word from which "music" is derived was used by that people to embrace all the arts over which the Nine Muses were held to preside. Hence, "Music" in those days included all those branches of education concerned with the development of the mind as opposed to the body. What moderns specifically call music, they referred to as "harmony."

Morning Glory Blossom Saved for Count's Eyes

A legend tells of the introduction of the morning glory into Japan, says the New York Times. A Japanese prince heard of a vine that blossomed only in the early morning, and notified the foreign nobleman who owned it he was coming to see it. When he arrived the vines no longer were trailing over the walls. The entire garden had been uprooted and there was no sign of the flower.

Being angered, he started to leave. Having been invited to tea, however, his sense of politeness compelled him to turn back. On entering the tea-room he saw a single morning glory blossom in a vase in a raised alcove. Inquiring of the nobleman why the garden had been ruined, the prince received the reply, "I ruined the garden in order that you might really see the blossom. If it were in plenty, you could not really have observed it so well as you did this single last flower saved for your eyes alone."
