County Court reconvened Tuesday morning, June 24th, after an adjournment from June 4th, Hon. B. B. Cunable of Warsaw presiding. The case of the People against George R. Graves, a Nunda attorney who was indicted several months ago for grand larceny in the first degree was moved for trial. Newton & Newton, attorneys of Genesee, represented the defendant while Ward M. Hopkins, district attorney, had charge of the prosecution. After deliberating 35 minutes, the jury brought in a verdict of guilty. A motion was immediately made for a new trial and denied. The Court sentenced Graves to Auburn State Prison for not less than two nor more than four years, the execution of the sentence being suspended provided that within six months he make restitution of the full amount owing to Mr. Ayers, complainant who brought the action against Graves.

They are selected by physicians and nurses thruout the county. Dr. Hazen G. Chamberlain of Cuba is the camp physician. THE NEW SUPER-AUTOMATIC

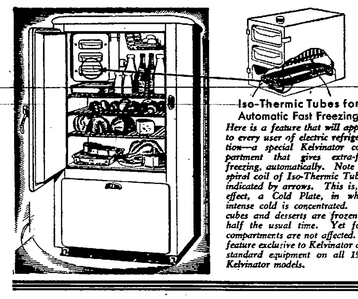
KELVINATOR

provides 3 degrees of cold for three separate tasks



Iso-Thermic Tubes for Automatic Fast Freezing

Here is a feature that will appeal to every user of electric refrigeration—a special Kelvinator compartment that gives extra-fast freezing, automatically. Note the spiral coil of Iso-Thermic Tubes, indicated by arrows. This is, in effect, a Cold Plate, in which intense cold is concentrated. Ice cubes and desserts are frozen in half the usual time. Yet food compartments are not affected. A feature exclusive to Kelvinator and standard equipment on all 1930 Kelvinator models.

Now you may own an electric refrigerator that magically divides the functions of perfect refrigeration—giving each its proper supervision—without care or attention on your part.

First of all, the new Super-Automatic Kelvinator is fitted with Iso-Thermic Tubes—the fastest freezing, entirely automatic device on the market. Then, you obtain a secondary degree of cold for the making of ice cubes or frozen dainties at normal speed.

Thirdly, you are assured of the correct degree of cold—well below 50 degrees in the spacious food compartments—without danger of spoilage from either too low or too high a temperature. And in larger, de luxe models you will find a cold storage compartment for safekeeping of perishables over long periods.

From first to last, operation of the New Kelvinator is entirely automatic—nothing to regulate, nothing to forget. Perfect balance of refrigeration is thus achieved for the first time in the history of this modern household aid.

Presented in three complete lines, the new Super-Automatic Kelvinators are moderately priced. See them at our showrooms today and learn the attractive terms on which they may be purchased through Kelvinator's ReDisCo monthly budget plan.

"I am attending a ten weeks' summer school here (Sangerties) in the Catskill Mountains. This is a military band camp, which is the summer school of Ithaca Military Band School of Ithaca, N. Y., with Ernest S. Williams as dean. It was formerly Pat Conway's school until he died.

"The Fourth of July I am playing with Conway's band at Kingston. The camp is a very pretty place, overlooking the Hudson River, and is the region made famous by the Rip Van Winkle story of long ago. The camp has a registration of 200 boys and we have band school three hours a day. With the music that a band of this size, up here in the mountains can make, it is far beyond description for beauty."
