Closing song by school.

Benediction.

Baker's Hardware News

Stepped on the Brake

"It's scandalous to charge us $10 for towing the car only three or four miles," protested the motorist's wife. "Never mind, dear," replied hubby, "he's earning it; I've got my brakes on."

Rain and Leaky Roofs

The yearly supply of moisture in this section is always about the same. We have long dry spells and then a good rain comes along to even up things.

Roofing is a problem that confronts us the year around, and a "stitch in time" proposition is the best if you would have roof protection at reasonable cost.

We maintain a complete roof service, paint, cement, prepared material, felt or metal. Our customers are using it every day. You better join in and get everything in shape while the weather is good and when the work can be done comfortably and easily.

Casco Glue

For that unusual job where all others fail.

Aviation asked for a better glue. Casco was the answer.

In packages at 10c and up.

Trust Your Labels

Yale Lock—Disston Saws—Eagle Files — Moore's Paints — Mazda Lamps and many other items we might name have won their place by always being strictly dependable and giving utmost value. Their labels spell confidence—we try to keep our service on the same level.

Be Sure!

That you carry an extra set of batteries and a bulb for the flashlight on that camping, fishing or motor trip. It is just maddening to have the light go out at a critical time, and no supply within a few miles.

Our 10c batteries are worth the money. Get your supply before you forget.

So-Lo

The plastic that renews the glands in footwear. You know that a stitch in time saves; well, this shoe mender will do a lot better than that and costs so little. You can line the brakes on your motor car with So-Lo —the price is right at 25c. So-Lo is self-vulcanizing and long wearing, a tube will do wonders.

Metallic X

A most remarkable mender, and has such a wide variety of uses. One man says he has yet to find an article he cannot mend with Metallic X.

It is particularly good for repairs on metal parts that are hard to get at with a soldering iron. Use it cold with your fingers, a paddle or a rag. Used according to directions, it will not disappoint and will save much future expense.

Comes in a tube like toothpaste and sells for 35c.

She: "How do you like my new bathing suit?"

He: "Fine. There is just enough of it to bar you from a nudist colony."
