Current Comments

What?—Just Ten More Weeks of School?

Yes, fellow students, only ten more weeks of the school year remain before those ever-dreaded Regents examinations loom up before us. You know, as well as I, what that means for all of us. We've got to stop drifting along and sail, full steam ahead, across the brink of the waves, picking up all knowledge floating there.

Now, now, while there is still time—start studying. Do your every day work thoroly and each day go back and brush up on what has already been studied. Isn't it easier to study a little now than to face the prospect as in the case of Seniors, of not graduating?

It's so much easier to gain a good knowledge of any subject in ten weeks than it is to cram for the day or two before the exam.

A person worn out by nervous fatigue from studying is in no shape to take an important examination. So, start studying, now—while there is still time! JR

Seniors Make Plans For Graduation

At a senior class meeting last Tuesday, it was decided that the customary caps and gowns would be worn again this year. The boys of the class have chosen navy blue robes while the girls have chosen white ones.

The class colors will be blue and gold. Each boy will wear a gold tassel on his cap and each girl will wear a blue tassel on her cap. Upon graduation, these tassels may be purchased for 25 cents each by any Senior wishing to keep them for souvenirs.

Invitations and calling cards were also chosen at this time. PEL

Birds Find Homes

Miss Baker's reading class is making bird houses. The houses are made from wood and are being painted with gay, spring colors. The houses are made for wrens and bluebirds.

Those who have their's finished are John Gavin, Francis Halsey and Don Gavin.

The students will take them home when they are finished. SM

Senior Interview

Presenting . VICTOR OAKES

Full name: VICTOR STARR OAKES.
Birthplace: Montevideo, Uruguay.
Date of birth: Feb. 2, 1924.
First teacher: Miss Leo.
Exciting event in childhood: Trip from South America to U. S.
Idea of a "perfect" girl: A girl with a good sense of humor and one you can trust. Can be blonde, brunette or red head.
Intentions upon graduation: Hope to enter college and take up engineering.
Favorites—
Color: Yellow.
Food: Baked ham.
Car: Chrysler Custom Imperial.
Book: "Rebecca."
Movie: "Captain of the Clouds."
Actor: Richard Green.
Actress: Veronica Lake.
Subject: Mathematics.
Hobby: Photography.
Orchestra: Charles Baum.
Recreation: Dancing.
Radio program: Quiz Kids.
Song hit: "Moonlight Cocktail."
Greatest fault: Going with girls.
"Vic" to most of us, is a popular Senior and is secretary and treasurer of his class. He is president of the Science Club, plays the drum in band and orchestra, is business manager of the Hi Herald and is a member of the Senior play cast. With Vic's intelligence and ambition, he will surely succeed. Anyway, good luck Vic. PEL

Lou Burton Explains 4-H Program

Club May Be Formed Among Junior High School Boys

Lou Burton, popular 4-H Club leader of Allegany county, met with the seventh and eighth grade boys last Tuesday afternoon and explained the workings of the 4-H Clubs.

This meeting was the result of discussions that these boys had had previously under the direction of Mr. Fribolin, agriculture teacher, as to how they might help win the war by assisting in the production of more food, particularly garden stuff.

As a result of this meeting, membership cards were passed out to all the boys and those who wish to join will have the cards signed by them and their parents and returned to Mr. Fribolin after the Easter vacation.

Mr. Burton pointed out to the boys that there was real work to be done in a 4-H Club. Each boy must carry some type of agricultural project, such as a garden, potatoes, chickens, calf, pig, etc. He is expected to do the majority of the planning and the work in caring for his project, and he must keep certain records. It is desirable that he also share in the money profits of the project.

If a 4-H Club is formed, two periods a month will be used during the school day for study and discussion of the projects. The regular Club meetings will be held during the activity period.

This giving in the school program of some agricultural instruction as well as shop work to seventh and eighth grade boys has been recently recommended in a bulletin issued by the State Education Department.

F. H. S. May Adopt A. C. S. Student Government

Friendship High School is planning to adopt, in the near future, a student government plan quite similar to that of ACS. The project will get under way this Spring, but really goes into effect next fall. The student body plans to choose parties and elect candidates from these parties. Among the variations is the fact that a governor and a lieutenant governor will be elected in place of the ACS Student Council president, according to reports which have been heard by this paper.

The ACS Student Council project has been in effect the past three years and it is felt that it and the councilors have given excellent service. JB

Not Original, But Very True

This bit of poetry, found in a magazine, caught Miss Snyder's eye so she copied it for future reference. It explains many things not the least of which is why one waits —waits—waits these days.

With Our Apology

"Keep your temper, gentle sir,
Writes the manufacturer,
Tho your goods are overdue,
For a month or maybe two."

"We can't help it, please don't swear
Labor's scarce and metal's rare,
Can get rubber, can't get dies,
These are facts, we tell no lies.
Harry's drafted, so is Bill,
All our work is now uphill.

So your order, we're afraid,
May be still a bit delayed.
Still you'll get it, don't be vexed,
Maybe this month, maybe next!
Keep on hoping, don't say die
We'll fill your order by and by."

Hi Herald Varsity Staff Increases

Little by little, the Hi Herald staff increases as more students are spurred on by a desire to write for the paper. Those whose unusual enthusiasm and ability make them an asset to the staff are listed under a heading, "Varsity," which includes Marilyn Hardy, Elaine Pope, Patricia Lynch, Anna Hardy, Florence Mingus, Jean Button, Doris Mead, Stan Ruger, and Miles Gorsuch.

Those reporters who are proving more and more worthy of a place on the staff, but as yet are not quite as active, are listed on the "Sub" staff which consists of Clara Hann, Susan McAndrew, Orianna Allen, Catherine Perry and Charles Gath.

First Aid Course May Be Offered To Adults

A first aid course may be offered to the adults of this vicinity in the near future if it is seen that such a course is desired, according to a statement issued by Principal Glenn E. Bretsch last Thursday morning.

"I would like to have all teachers and bus drivers enroll in this course, if possible," Mr. Bretsch said when discussing the subject.

"Such a course would be very worthwhile and it is hoped that plans for one may materialize." CMR

Planting on the Level Begins Here

Allegany county farmers and gardeners will do their part this spring in plowing and planting on the contour and across the slope according to C. R. Harrington, Allegany county agricultural agent of Belmont. Thousands of individuals are cooperating with the request of the State Soil Conservation Committee at Ithaca, to plow, harrow and seed across the slope this spring. Only recently has it been found that we can produce all the additional food we need without plowing any new acres if all our tilled crops were properly planted on the contour.

As farmers begin their spring work each is asked to consider the situation on his farm and help save fertilizer, seed, moisture, soil, labor, fuel and rubber by following a few simple practices. These six steps in soil conservation are as follows:

1. Plow, harrow and seed across the slope.
2. Leave waterways and depressions in grass or seed with grain to avoid gullies. Neglect of this is dangerous.
3. Use longer rotations by planting alfalfa or Ladino clover in hay mixtures.
4. Keep up the fertility of the soil by using manure and superphosphate, and lime when needed for clover and alfalfa.
5. Leave headlands or turn rows in stiff sod.
6. Rebuild a carpenter's level and use it to lay out contour tillage and strips.

Of course, some fields are too narrow to permit economical cultivation across the slope. However, many farms will make a beginning this year in the interest of food for victory. Victory gardeners are asked to plant across the slope. Grange lecturers are asked to read the "six steps" at their meetings. Vocational agricultural teachers are cooperating. Committeemen of the Farm Bureau, Agricultural Conservation Program and Farm Security Administration are all helping to change the direction of cultivation this spring from up and down hill to across the slope. The Allegany County Agricultural Conservation Committee and the Allegany County Soil Conservation Board of Directors have endorsed the program.

Step on 'Em

"What's the matter with your feet?"

"I've got corns."

"Why don't you do something for them?"

"Why should I? They've never done anything for me."

Path of Peace

"I have no luck with women."

"Lucky fellow."

A WEEK OF THE WAR

(Continued from First Page)

mores will be recruited annually. The students will be enlisted as apprentice seamen and allowed to remain in school at least to the end of the second year. About 35,000 will be selected each year for further training leading to commissions as ensigns in the Naval Reserve.

The House passed and sent to the Senate an $18 billion War Appropriation Bill, providing almost $7 billion for military airplanes. The Senate passed and sent to the House a naval public works bill to provide a billion dollars for expansion in aircraft and storage facilities. The War Department ruled officers and enlisted men, except those of the regular army, may campaign for and hold political office, if such activity does not interfere with military duties. Selective Service headquarters instructed local boards to start classification of February 16 registrants, and to prepare to fill the army's June call—and possibly the May call—from these men and the earlier registrants. SS Headquarters also issued instructions to all local boards for registration of an estimated 13,500,000 men between 45 and 64 on April 27.

Shipping

The Maritime Commission reported all contracts have been awarded for the 23 million deadweight tons of merchant shipping—nearly 2,300 cargo ships and tankers—which the President has set as the 1942-43 goal. The Senate passed and returned to the House a bill enlarging the war risk provisions of the Merchant Marine Act to allow insurance of foreign as well as domestic ships.

Agriculture

The Department of Agriculture said it had purchased more than 8800 million worth of farm commodities, totaling more than 7,500 million pounds, during the first year of the department's expanded purchase program—March 15, 1941, to March 15, 1942. More than half of all purchases were for meat, dairy and poultry products. Most purchases were for Lend-Lease shipment.

The Agriculture Department reported prices of all farm products combined were 99 per cent of parity on March 15, 1942, and 46 per cent above the 1909-14 average. The Commodity Credit Corporation reported it has contracted for the sale, during the period ending April 30, of about 5,500,000 bushels of corn and about 240,000 bushels of wheat to be processed into industrial alcohol.

"A Week of the War" summarizes information on the important developments of the week made available by official sources thru 5 p. m., Monday, April 6.)

Vote Light On Milk Amendments

As was generally expected, about 98 per cent of the dairymen who voted on the Amendment to the Federal-State Order for the Metropolitan Milk Market voted "yes." The vote, however, was very light, only 18,542 ballots being cast. The Dairymen's League did not vote, taking the position that they could not approve the changes and did not wish to take the responsibility for voting against them.

The changes were effective April 1, making the Class 1 price, at present butter prices, $2.85 until July 1. Without the Amendments the Class 1 price would have dropped to $2.20 on April 1st.

"Guilty or not guilty of this theft?" queried his honor.

"Not guilty, sir," came the plea.

"Have you ever been in jail?"

"No, indeed, sir," came the indignant reply. "This is the first time I ever swiped anything."

Ask the Scientist

Question 1—Is it true that Japan now has obtained by conquest all the resources in which the war is fought?

Answer.—That is true. She is at least within reach of all she needs to compete with other nations on almost even terms as far as raw materials are concerned. Superior use of what we have is necessary to war against her now abundant supplies. Thru conquest Japan now has obtained rubber, oil, iron, tin, and alloying materials for making steel such as chromium, manganese, etc. —Dr. Earl Apfel, geographer and geologist.

Question 2.—I have a brother and three sisters. All are the parents of twins. I am a twin. I would like to know if the male carries the inheritance factors for twins or does the female only carry them?

Answer.—The tendency to have twins is inherited thru either the male or female, so these men as well as the women can expect to have twins in their offspring. These men have a better than average chance to be the fathers of twins.—Dr. Ernest Reed, geneticist.

Question 3.—Is it true that when a bee stings he dies?

Answer.—When the honey bee stings, barbs on the two needle-like organs usually prevent their withdrawal so that they and adjacent tissues are torn away. This prevents the bee from stinging again and soon causes its death. Bumble bees and all the other of the 5,000 species of bees can sting repeatedly with no injury to themselves.—Prof. Henry N. Jones.

Question 4.—How is synthetic rubber made?

Answer.—The term synthetic rubber is not quite correct because these rubber-like substitutes are really not rubber at all but artificial materials which have properties quite similar to rubber. It would be more accurate to call them rubber substitutes. Rubber substitutes may be made from a surprisingly large number of different raw materials: petroleum, coal, and even starchy food materials such as grain and potatoes.

By a series of chemical processes these are converted into butadiene. This, or its related compounds, is the parent material from which most rubber substitutes are prepared. Butadiene is a pure chemical substance which is a gas at ordinary temperatures.

Under certain carefully controlled conditions of temperature and pressure, its molecules have the ability to link themselves together to form long, chainlike molecules which have the curious property of twisting into spiral, springlike coils. It is this property which gives the product its rubber-like characteristics. Butadiene will also tie together with many other types of chemical molecules similar to itself; consequently there exists the possibility of hundreds of different rubber substitutes.

Some of these are far superior to natural rubber for certain uses such as for the gasoline hose used in gas stations. A few are even better than natural rubber for the production of tires. Before restrictions were placed on civilian use of rubber, about 75 per cent of all rubber materials used in this country was for automobile tires.

Approximately 10,000 to 12,000 tons of various types of rubber substitutes were produced in the U. S. last year. This represents less than two per cent of our total annual requirements. However, plants are now under construction which, together with our reserves of raw and reclaimed rubber, will eventually give us an adequate supply of this strategic material.

To become independent of imported rubber, the United States must make an outlay of nearly a billion dollars, and it would take time, possibly two years, to construct plants and train workers.—Dr. Aden King, chemist.

Question 5.—Is there any explanation for carrier pigeons being able to find their way home? Is there a maximum distance beyond which they cannot find their way back?

Answer.—To answer the second part of the question first, there is a maximum distance beyond which they cannot find their way back. This distance varies greatly with the individual bird, its familiarity with the route, weather conditions and most of all with the amount of training it has had.

The longest flights recorded by homing pigeons are two of about 1,000 miles. In one study, 100 homing pigeons were trained on flights from 500 to 700 miles in the direction from Baltimore to Key West. When they were finally released at Key West, not one of them succeeded in returning to their home in Baltimore, a distance of about 1,050 miles.

Many explanations have been offered to account for the interesting phenomenon of the homing pigeon. Perhaps none of them is entirely satisfactory. The explanation most in favor with scientists is that the bird has extremely fine eyesight, a very retentive visual memory, and by practice on flights of gradually increasing length, learns to find its way home. When released in unfamiliar territory, the bird flies about at random until it finds familiar land marks.—Prof. Jones.

If you have a question to ask the scientists, mail it to the New York Press Association ,The Castle, Syracuse, N. Y. The Science Board of the Radio Workshop at Syracuse University will answer each week in the Andover News those questions considered most interesting and timely.

Community Letters

FROM NEWS CORRESPONDENTS

All Correspondence Must Be in This Office Tuesday

Independence

(Mrs. Floyd Clarke, Reporter)

April 6.—Mr. and Mrs. R. E. Spicer spent the week-end with their daughter, Mrs. Paul Vincent and family in Buffalo.

Mr. and Mrs. Lawrence Hawks of Hornell, Mr. and Mrs. Roy VanSchaick and son of Voorhees Hill were Sunday dinner guests of their parents, Mr. and Mrs. H. H. Hawks.

John J. Lewis was home from Buffalo to spend Easter with his parents, Mr. and Mrs. John E. Lewis.

Mr. and Mrs. Stephen Clarke and Mr. and Mrs. Cleon Clarke were in Hornell Friday.

Mr. and Mrs. Lee Chambers and son passed the week-end with their parents, Mr. and Mrs. Louis Scoville at Harrison Valley.

Mr. and Mrs. Charles Clarke and Sally spent Easter Sunday with Mr. and Mrs. W. E. Clarke in Whitesville.

Mrs. Carl Clarke, Mrs. Charles Clarke, Mr. and Mrs. Harley Hawks were in Hornell on business Monday.

Miss Bonita Goodiff of Wellsville is visiting her aunt, Mrs. Mary Rogers.

Mr. and Mrs. E. R. Crandall and William of Alfred, Mr. and Mrs. D. M. Clarke and Jerry of Whitesville spent Easter Sunday with Mr. and Mrs. Floyd Clarke.

Mr. and Mrs. Cary Rogers had as their guests Easter Mr. and Mrs. Walter Rogers and family of Friendship.

Wallace Clarke is passing his Easter vacation with his parents, Mr. and Mrs. S. W. Clarke.

The Empire Gas & Fuel Co. shot the oil well on the O. A. Potter farm Monday. The well is doing better than nine barrels a day.

Mrs. Cary Rogers gave a shower for Mrs. Harold Rifenburg Tuesday evening. There were 14 guests who enjoyed a very pleasant evening of games, after the gifts were opened Mrs. Rogers served dainty refreshments.

Miss Wanda Matteson of Whitesville is visiting Mr. and Mrs. Cleon Clarke.

South Hill

(Mrs. Earl Schoonover, Reporter)

April 6.—There was quite a bit of excitement on our hill Monday forenoon from the gasket blowing out of the pump and setting the pump building on fire. It was being operated by the gauger, Mr. Boyer. The engine and pump are used to pump the oil from the tanks on the McEbenwood lease to Wellsville. At the time it caught fire, there was a two inch pipe full of oil going into the pumps, the shutoffs were quite some distance from the engine, so by the time they got it shut off there was quite a bit of oil to feed the fire. Two of the Andover fire trucks and men were here to do their bit and extinguished the fire.

Mr. and Mrs. Will Green spent Saturday evening with Mr. and Mrs. Charles Moon.

Stanley Baldwin was in Rochester last week with his father, Glenn Baldwin.

Mr. and Mrs. Howard Barney and daughter Betty Jo and Mr. and Mrs. Harold Barney Jr. and son David of Hallsport also Mr. and Mrs. Kenneth Leonard of Olean were Easter guests of their parents, Mr. and Mrs. Harold Barney at Independence.

John Wahl was an Easter dinner guest of William Joyce and family.

Mr. and Mrs. Howard Dean and family were Saturday business callers in Wellsville.

John Dean of Buffalo spent Thursday evening with his nephew, Howard Dean and family.

Mrs. Anthony Dougherty and family spent Friday in Wellsville.

Miss Dorothy Schoonover and a party of friends enjoyed warm sugar at the home of her parents, Mr. and Mrs. Earl Schoonover Thursday evening.

Mr. and Mrs. Earl Schoonover and daughter Dorothy and Louis Dodge were Sunday dinner guests of their mother and grandmother, Mrs. Bertha Green and also called on Mr. and Mrs. Cass Kenyon and family in the afternoon.

Mr. and Mrs. Earl Schoonover spent Tuesday at the home of their sister, Mrs. Wm. Beihl, where Mr. Schoonover helped Mr. Beihl in pulling the old pipe and pump from their water well and replacing it with a new one.

The man who yells about slow business is probably not moving fast enough himself.

Voorhees Hill

(Mrs. Raymond Church, Reporter)

April 7.—Mrs. Ena Crowell and baby Nancy were week-end guests of her parents, Mr. and Mrs. G. A. Simkin. They were enroute to their home on Cape Cod from Florida where they had spent the winter.

Mr. and Mrs. Wayne Hallett and little son of North East, Pa., were guests of Mr. and Mrs. Burritt Perkins during Easter vacation.

Carlton Stout of Wellsville was a guest at the home of Mr. and Mrs. R. B. Church from Wednesday night until Sunday.

Mr. and Mrs. H. B. Adams entertained Mr. and Mrs. Wm. Jenks and Mr. and Mrs. Clifford Jenks of Niagara Falls and Mrs. Isabelle Jenks of Wellsville Saturday.

Mr. and Mrs. Fred Greenough and Mr. and Mrs. Webster Hazen of Brockport spent Thursday with Mr. and Mrs. James Lewis.

Mrs. R. B. Church was in Hornell on business Friday and Monday.

Mrs. James Lewis and daughter Thelma were Olean visitors Monday.

Mr. and Mrs. Paul Edson and daughter of Wellsville spent Sunday evening with Mr. and Mrs. H. B. Adams.

Christine Church spent Tuesday and Wednesday with Mr. and Mrs. Wayne Stout in Wellsville.

Mr. and Mrs. Lawrence Hawks of Hornell were guests of Mr. and Mrs. Roy VanSchaick end family Saturday p. m. and Sunday a. m.

Whitesville

(Mrs. Ella Millspaugh, Reporter)

April 7.—Mr. and Mrs. Arthur Crittenden were Wellsville business visitors Monday.

Mr. and Mrs. C. C. Foltz and family spent the week-end with relatives in West Valley, N. Y.

Prof. Merle Bishop of Brooklyn College, New York City and Mrs. John Bishop and son John of Niagara Falls were guests over the week-end of their sister, Mrs. Wm. Slack.

Dr. Irwin Felsen visited his mother and other relatives in New York City from Tuesday until Saturday of last week.

Miss Jean Millspaugh of Avoca Central School returned Wednesday from a visit of several days with the family of the late Boothe C. Davis, president emeritus of Alfred University, in Plainfield, N. J. She will spend the remainder of her vacation here with her parents, Mr. and Mrs. Lee Millspaugh.

Mr. and Mrs. Lee Millspaugh and Mrs. Ella Millspaugh were Sunday dinner guests of Mr. and Mrs. Lawrence McCracken of Wellsville.

Mr. and Mrs. Robert Crittenden and son Leo and friend from Cuba were calling on his brother and family last Saturday afternoon.

The Methodist Sunday School presented a very good Easter program Sunday morning to a good sized audience. The sacrament of the Lord's Supper was administered to a large number of people. The Gospel chapel also observed Easter by special services which will continue for two weeks of revival effort.

Mrs. Edna French visited friends in North Bingham over Easter.

Davis Hill

(Mrs. Floyd Slocum, Reporter)

April 8.—Mr. and Mrs. George Lewis of Perry were week-end guests of Mr. and Mrs. John Dodge.

Mr. and Mrs. Lawrence Ordiway and family were Easter guests of Mr. and Mrs. Charles Halsey.

Glenn Halsey and daughters of Andover were visitors at Frank Halsey's Monday afternoon.

Mr. Hamilton of Rexville was a caller at Floyd Slocum's, Friday afternoon.

Mr. Cook of Yorks Corners and Tom Swain of Andover were business visitors on the hill Tuesday.

Mr. and Mrs. Cecil Hoagland son and daughter of Canadice visited his mother, Mrs. Alta Hoagland and brother, Victor and family Easter Sunday.

H. A. Percey, the Rawleigh salesman of Greenwood was over the hill Monday.

Mr. and Mrs. Floyd Slocum visited their daughter, Mrs. Barney Schriener and family and Mr. and Mrs. Jack Alexander at Wellsville, Monday.

Billy Schreiner of Wellsville is passing his Easter vacation with his grandparents, Mr. and Mrs. Floyd Slocum.

Misses Genevieve, Helen and Alice Clark of Beech Hill were visitors at Floyd Slocum's Tuesday.

Mr. and Mrs. Earl Hyland were business visitors in Wellsville Tuesday.

Mrs. Nellie Spencer and Fred Slocum were Sunday dinner guests of Mr. and Mrs. Floyd Slocum.

West Greenwood

(Mrs. Dan Mullen, Reporter)

April 7.—Mr. and Mrs. Oscar Tuttle of Big Creek spent Sunday with their daughter, Mr. and Mrs. Nelson Brewster of this place.

Mr. and Mrs. John Swarts and Reva June were business callars in Hornell Monday.

Sylvester King of Slate Creek called on Mr. and Mrs. Dan Mullen Saturday.

Several from this place attended the show at Andover Saturday night.

Mr. and Mrs. Shirley Evans and son passed Easter with her parents, Mr. and Mrs. Dan Mullen. Mrs. Evans and Ira Daniel remained for a few days visit.

Mrs. Beatrice Mullen spent last week with relatives in Andover.

Olie Banks is improving from his recent illness.

The horseshoeing rig from Purdy Creek was at Robert Harkenrider's and James Mitchell's one day last week.

Beverly Teribury of Greenwood called at the Mullen home Saturday night.

Mr. and Mrs. James Baker are spending a few days with Mr. and Mrs. Olie Banks.

Charles Menz of Canisteo passed Saturday evening with Miss Idanette Brewster.

Wilbur and Junior Donaldson passed the day Sunday with Edward and Gerald Mullen.

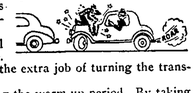
The world likewise contains people who are very agreeable at the wrong time.

YOUR CAR

How to Get the MOST out of It

TIPS ON DRIVING

Have you signed up with a new set of driving habits for the duration? Like defense bonds they pay interest, but it is interest many times compounded. You may only be thinking of saving tires, but more careful operation of your car also means less gas and oil used, less wear on mechanical parts, less likelihood of accidents, injuries and replacement of hard-to-get parts. Here are some suggestions that other experienced drivers have found effective:



Depress the clutch pedal while starting the engine. Then the battery isn't given the extra job of turning the transmission gears.

Don't race the motor during the warm-up period. By taking it easy at first you save gas and give the oil a chance to get to work.

Use the hand choke (if you have one) sparingly. Improper use wastes gas and may cause serious dilution of oil in the crankcase.

Shift gears at the lowest practical speed. Low gear is needed principally to overcome starting inertia. Shift to high between 15 and 25 miles an hour. Remember: you pay for a jack-rabbit start in tire and clutch wear and extra gas used—and the fellow you outdistance usually pulls up beside you at the next traffic light.

Note: This is the second in a series of articles based on the book, Automobile User's Guide, published by the Customer Research staff of General Motors. Next article: More About Driving.

ALLEGANY COUNTY YOUTH MOBILIZES FOR VICTORY

Allegany county 4-H Clubs will participate this week in the National Mobilization Program. Local 4-H Clubs have planned special programs in their communities to re-emphasize the part they are playing in the National Victory Program.

Heading this group are more than 800 boys and girls who are participating in the "Victory Garden Program," agreeing to produce, conserve and store an abundance of vegetables and fruits for use in the coming months. Nearly as many boys and girls have indicated their interest in a "Fire Prevention Program" sponsored by the Allegany County Fire Cooperative Fire Insurance Company agreeing to inspect their home farms and properties to prevent any unnecessary fires when such loss would mean a material decrease in the production of consumer goods.

In addition to these two special activities the boys and girls are reminded of their other regular 4-H activities in the "Food for Freedom Program" including the poultry projects, dairy, sheep and two pigs on every farm. Conservation of natural resources thru the ordering of more than 12,000 forestry seedlings, which will be used to reforest idle acres of land in our country, is being carried on. Special First Aid and Home Nursing projects are being offered to groups where instructors are available.

Many clubs have already and are continuing to conserve scrap material such as waste paper, magazines, scrap metals, clothing, and are selling these materials thru the usual channels of trade so that they may be converted for necessary war use.

Boys and girls in the county who are not now active or participating in youth programs emphasizing the war effort are urged to co-operate by joining a local 4-H Club or county-wide organization. Full information can be secured by writing to the 4-H Club office in Belmont.

Correct—Sit Down

"Now children," said the teacher, "tell me the opposite of the word misery."

"Happiness."

"And of sadness?"

"Gladness!"

"And of woe?"

"Giddap!"

GAS TANK TOPICS

NOW, more than ever, it is important to take the proper care of your car. Atlantic Lubrication, which is not just an ordinary grease job, will give you many more miles of pleasant driving.

We work from "Check-Charts," prepared by the manufacturer of your particular car. Come in and we will be glad to explain Atlantic Lubrication to you.
