AUGUST

THE summer season is one-half behind us, believe it or not. The days are already much shorter, the nights considerably longer. The sun is on its way South.

In Great Britain, August is considered the first of the fall months. Here it is the last one of Summer. So that you may know them all in advance of their happenings, here is a list of the anniversary dates of August.

August 1st, Germany declared war on Russia, 1914; 2nd, death of Warren G. Harding, 1923; 3rd, Germany declared war on France and Belgium, 1914; 4th, Great Britain declared war on Germany, 1914; 5th, Battle of Mobile Bay, 1864; 6th, Gertrude Ederle, first woman to swim the English channel, 1926; 7th, Confederate flotilla near Mobile destroyed by Farragut, 1864; 9th, birth of Francis Scott Key, author of the "Star-Spangled Banner," 1780; 10th, state of Missouri admitted to the Union, 1821.

August 11th, Fulton's first voyage by steamboat, New York to Albany, 1807; 12th, Peace protocol signed between Spain and the United States, 1898; 14th, death of David G. Farragut, first Admiral of the U. S. Navy, 1870; 15th, Will Rogers and Wiley Post killed in airplane crash in Alaska, 1935; 16th, anniversary of the Battle of Bennington (holiday in Vermont); 17th, Atlantic cable laid, 1858; 18th, Virginia Dare, first native child of English parents born in Roanoke, Va., 1587; 19th, U. S. S. Constitution captured by the British steamer Gurriere, 1821; 20th, Benjamin Harrison, 23rd president of the United States, born in Ohio, 1833.

August 21st, siege of Charleston, 1863 (Civil War began); 22nd, America defeated the Aurora, 1851, first international yacht race; 23rd, first steamer to cross Atlantic launched in 1818; 24th, American army passed thru Philadelphia, 1777; 25th, New York joined the Union, 1788; 28th, first petroleum well opened at Titusville, Pa., by Edward L. Drake, in 1859; 29th, Brigham Young died, 1877; 30th, Battle of Bull Run won by Confederates under Lee, 1862; 31st, French fleet reached Chesapeake from West Indies, 1781.

The "Waves"

IT IS an appropriate nickname that has been given to the newly-created women's branch of the Naval Reserve Corps. The "Waves," however, are not permanent. They are "Women Appointed for Volunteer Emergency Service."

This is the second time in its history that the U. S. Navy has opened its ranks to women. Two weeks before the entry of America into World War One, the first woman ever to serve in the Navy was enrolled as Chief Yeoman (F), and placed in charge of a United States Naval Recruiting Station. The majority served as Yeoman (F) first, second or third class. There was no preliminary training. Naval procedure was learned at their posts, and drilling was carried on at night.

This time 1,000 of the "Waves" will receive commissions as full-fledged officers, and will be placed in charge of the enlisted personnel of 10,000 women. The proposed intensive period of training at Smith College should equip them admirably for the work they are to take over from Navy men serving on shore duty. And if the anticipated appointment of Miss Mildred H. McAfee, president of Wellesley College, as Director of the Corps materializes, it will be widely acclaimed. Miss McAfee—whose Colonial ancestors crossed the Alleghenies to Kentucky, "a Bible in one hand, a rifle in the other"—is eminently fitted for the task.—Christian Science Monitor.

This Is War!

ENEMIES and agents of the enemy who cross our battle lines for the purpose of committing espionage, sabotage and other hostile acts may be tried by military commission and are not entitled to any Constitutional right to a trial by jury."

These eight Nazi spies were born in Germany and were agents of the German Reich. Trained in a special school in destruction of power lines, aluminum plants, bridges, railways and communications systems, they were also trained in the use of secret writing for communication to Germany and among themselves in the United States.

Each group brought ashore boxes of explosives, incendiaries, fuses, detonators and timing devices, and buried them in the sand near the points of landing near Amagansett, L. I., and Ponte Vedra, Fla. Within two weeks after they landed, all were taken into custody by special agents of the F. B. I.

They are enemies in every sense of the word as parachutists or invading armies landed from an enemy fleet. Care to mete out justice is a sign of strength rather than weakness and a court can get more information than a firing squad. The soundness of our system of government proves itself in the hard cases where there is an element of public clamor and an unpopular minority.

If there is a feeling from the general public that penalties for wartime sabotage and espionage are not severe enough, Congress can remedy the situation in other cases. So far, it does not appear that letting these spies be heard has given any aid or comfort to the enemy. We venture the opinion that the final disposition of these Nazis will not be such as to encourage more landings from submarines.

Model Planes Grounded

AN ORDER has been issued by the War Production Board freezing all consumer's stock of balsa wood and prohibiting its use except for specific types of life-saving aircraft and technical apparatus to be delivered to government agencies or for lend-lease purposes.

Forty percent of the balsa wood, imported from Ecuador, consumption in the United States went into airplane models by the civilian population.

However there is now 300,000 members of the Boys' Club of America requested by Frank Knox, secretary of the Navy to construct 500,000 precision plane models, a fascimile of the United States Navy planes. These models are used in training of naval combat forces for aircraft recognition and rough estimation in gunnery work. One of these precision models when viewed at a distance of 35 feet by a training aircraft gunner, would appear as a real plane would at a little less than half a mile.

Perhaps, because of the shipping problem a substitute may be found to take the place of balsa. The ingenuity, patience and skill that many a young person has gained working with airplane models has reached further than appears at the present. It's the young modelers keen knowledge of planes that serve so well on our observation posts at the present time. They can tell without the hum, a single, or twin motor and also the type of plane.

Let's hope, if it is necessary to ground this wide and interesting hobby, that it won't be for long.

Buying War Bonds is one way to help your fellow-Americans who are on the fighting fronts.

People who worry about air raids might take time out to be careful when driving automobiles.

Parents who misunderstand their children usually have children who misunderstand their parents.

We were just about convinced that there was no use for us to write editorials any longer, but we found a man the other day who disagreed with what we wrote.

Before 1942 ends the people of the United States will have a faint idea of what total war means!

Good Advice—Pay your debts, then you will be better prepared for the future, whatever it presents.

Life will be better and finer if you become better and finer.

Ask the Scientist

If you have a question to ask the scientists, mail it to the New York Press Association, The Castle, Syracuse, N. Y. The Science Board of the Radio Workshop at Syracuse university will answer each week in the Andover News those questions considered most interesting and timely.

Question 1. What parts of the world are still unexplored?

ANSWER Your own backyard is probably one of the least explored places on the earth. How many of the plants and animals that are there do you know? Where do the rocks there come from?

Exploration really means learning in detail about an area and all of the facts are known about very few places on the face of this earth. I suggest this inquirer start looking around the place he lives and he will find things around there that no one else has ever seen right close to home.

Probably the most unexplored part of the earth is the bottom of the ocean; about three-fourths of the earth's surface is at the bottom of the ocean.

Antartica is the lease explored continent. Africa would come close to it. Asia stands high on the list. North America has some places that have not been observed as an explorer would obseve them. Exploration really requires a certain technique, a certain training, if it is being carried on in new areas, because only trained observers can really see what is there. — Dr. Earl Apfel, geologist and geographer.

Question 2. Where does the bamboo come from that we use for fishing poles? Is it the lightest and strongest wood that could be used for that purpose?

ANSWER. Bamboo grows from a variety of treelike grass of the genus bambos, and is found in many parts of China, Japan, Malay, and the Far East. It is strong, straight, hollow, and ideal for vaulting poles, fishing poles, etc. It is widely used in it naive habitat for buildings, pole and canes. In the Far East many houses are built almost entirely of bamboo.

Its light weight and strength make it ideal for any kind of light construction. It is not sawed and used as lumber. The tender young shoots are used for food. — Prof. Nelson Brown, forester.

Question 3. How are new varieties of potatoes produced when we grow our potatoes from pieces of the old potato and not from seed?

ANSWER. The chances are very much against any varieties of potatoes coming into existence where the old potatoes are used for producing the new plants. The new varieties of potatoes are produced in certain parts of the world, in this country in Maine, where potatoes flower and go to seed, and only in these places.

There is one chance in a million of a new variety arising as a result of what is called a bud mutation or "sport" among the potatoes we grow from old potatoes, but one would have to be a very careful observer to detect it. It would probably be lost to our attention. — Dr. Ernest Reed, geneticist.

Question 4. I understand a bullet shot from a rifle rotates in the air. What is the purpose of this?

ANSWER. A rifle bullet does rotates on its long axis. Spiral grooves cut parallel in the barrel of the rifle from the breech to the muzzle, and elevated projections between these grooves, cut into the soft bullet, gripping it and imparting a rotary motion.

The purpose of this rotary motion is to give a bullet stability and keep it going point first in its flight. Otherwise it would tumble and over end and have a very erratic flight. This would result in loss of accuracy and velocity very rapidly.

A modern rifle bullet revolves more rapidly than any other mechanical device that man has invented. The modern rifle bullet from our service rifle revolves nearly 200,000 revolutions per minute.

The high speed motors in a motor car only turn over a little more than 3,000 times a minute when the car is running at high speed. Some of our electric motors turn over between 4,000 and 5,000 r. p. m. A cream separator will rotate up to about 6,000 r. p. m. The supercertrifuge, which is devised for experimental work, may reach as high as 60,000 revolutions per minute, but this is far from the almost 200,000 r. j. m. of a rifle bullet. — Prof. Henry N. Jones.

Deer Is Dear Out of Season

Four Farmersville Station woodsmen found that deer meat out of season in Wyoming county, at least, was truly expensive, when Judge Craig C. McKerrow fined them $285 for the doe they admitted had been taken, transported and possessed during the closed season.

Acting upon a tip, game protectors visited the lumber camp of the Lee Drennan Corporation near Fairview Hill, Cattaraugus county, and, after finding hidden parts of the animal in a spring, as well as the hide and head, partially buried, obtained statements from the men and took them before Judge McKerrow at Arcade.

Notice of Completion of Assessment-Roll

(Tax Law, Sec. 25)

HEARING OF COMPLAINTS

NOTICE is hereby given that the Assessors of the Town of Andover have completed their Assessment Roll for the current year; that a copy thereof has been left with the Town Clerk at office, where it may be seen and examined by any person interested therein until the

SECOND TUESDAY OF AUGUST NEXT,

and that on such day, at 9 o'clock in the forenoon, said Assessors will meet at Village Office in the said Town, to hear and examine all complaints in relation to such assessments, on the application of any person conceiving himself aggrieved thereby.

Dated this 24th day of July, 1942.

MILLION VEHICLES HEADED FOR SHELF

Tire wear will take one million cars off the road in New York State during the next 12 months unless the present rate of use is curtailed.

Car-sharing will extend the life of tires many months. Double up—save your tires by joining a group-ride club now and cut out useless duplication of travel.

If you need help in forming a group-ride club, get in touch with the local War Transportation Committee. Fill those empty seats!

Hay Show at County Fair

The Allegany County Farm Bureau will sponsor a county wide hay show at the Angelica Fair on September 2, 3, 4, and 5th, according to C. R. Harrington, County Agricultural Agent. Farmers will compete for prizes and ribbons and for a silver cup presented each year to the Hay King, the man who exhibits the best sample of hay.

Wallace Wingert, Caneadea, has won the cup twice in the last two years. If he wins it this year, it will be his permanently. Separate classes will be set up for first and second cutting alfalfa, clover, mixed hay and grass hay.

The Hay Show this year will be in connection with the Farm Bureau exhibit at the Fair and will be in a tent located near the farm machinery exhibit.

NEW! "BACTERIOSTATIC"
FEMININE HYGIENE
now finding great favor among women...

Many doctors recommend regular use of *douches* as a precautionary measure for women who want to be clean, dainty—for women troubled by offending odor or discharge.

Some products may be harmful to delicate tissues. But not Lydia E. Pinkham's Sanative Wash! Pinkham's Sanative Wash is gaining great favor among women because it's NOT a harmful germicide. Instead—it's a mighty effective "bacteriostatic" (the *modern* trend). It not only discourages bacterial growth and infection but thoroughly cleanses and deodorizes. Very soothing—relieves minor irritations and discharge and has a *tonic* effect on delicate membranes. Inexpensive! Get your bottle of Lydia Pinkham's Sanative Wash *today*. All druggists.

Did You Place Your
FALSE TEETH
In a Glass Last Night?

Thousands do and wonder why their dentures remain dull and stained—why they suffer with offending denture breath. They fail to realize that water alone is not a cleansing agent—but now, there's a great formula perfected by a dentist, called Stera-Kleen that thoroughly cleans false teeth like magic—no brushing! Simply put a little Stera-Kleen Powder in a glass of water—soak your teeth—now they sparkle, are really clean and look like the day your dentist said, "Don't they look natural?" Try Stera-Kleen—lasts long—costs only 35¢. At all druggists.

Old Farmer's Recipe: Mix Allenru and Lemon Juice to get quick relief from pains of rheumatics and neuralgia. Druggists have Allenru—grocers have lemons.

SCHOOL DAYS By DWIG

IT NEVER FAILS

Week of the War

Price Administrator Henderson announced that maximum gasoline prices in the rationed area of the Eastern States and the District of Columbia will be reduced two and one-half cents a gallon beginning August 5. He also announced a reduction of 0.9 cents for kerosene, 1.1 cents on distillates and light heating oils, and 15 cents a barrel on residual fuel oils.

Mr. Henderson said the reductions were made possible under the recent agreement worked out by the Office of Price Administration, the Office of Petroleum Coordinator and the Reconstruction Finance Corporation, whereby the Defense Supplies Corporation will absorb the extra transportation costs for moving petroleum into the Atlantic seaboard area.

Commerce Secretary Jones reported the Defense Plant Corporation will finance a two-point program to convert existing steel dry-cargo barges into tank barges to transport oil, and to improve existing inland waterways. The Bureau of Mines estimated the national gasoline demand for July, August and September will be about 17 per cent less than in the corresponding period last year, eliminating the necessity for a large winter accumulation of stocks.

Consumer Supply and Maximum Prices

President Roosevelt issued a statement that every user of fuel and heating oil on the east coast "should face realistically the fact that there can be no guarantee that he will get enough oil even to meet his minimum needs." Petroleum Coordinator Ickes asked all sellers of fuel and heating oils in the East to request their customers to convert oil burners to the use of coal or other available fuels. The Office of Solid Fuels Coordinator reported bituminous coal stocks in storage in the U. S. increased an estimated 5,550,000 tons in June, to a near all-time record. The Office said consumer stock piles, however, continued insufficient to provide adequate protection against possible shortages during the fall and winter.

The OPA established a wholesale ceiling price on milk and cream, sold in bottles or paper containers, at the distributor's highest March level. The action was taken to prevent a price "squeeze" on milk retailers by some milk distributors. The office set a ceiling price of four cents a pound for waste kitchen fats now being sold by housewives in the salvage program, and a ceiling price of five cents a pound for the sale of the same fats from meat dealers to renders.

Price Administrator Henderson established a 60-day temporary ceiling on wholesale and retail lamb prices, at the highest levels charged by each seller during the period July 27-31. The temporary ceiling on lamb prices, effective August 10, places every major meat item except poultry under Government price regulations. The OPA said Armour & Co., Swift & Co., and Wilson & Co., Inc., have agreed to submit for auditing the sales records of all their branch houses for the purpose of refunding to their customers (wholesalers and retailers) all charges made in excess of the maximum prices for beef and pork.

President Roosevelt told his press conference there are three reasons for the current meat shortage in the East and some mid-Western states: (1) It is the off season for beef; (2) People have a good deal more money with which to buy more and better cuts of meat; (3) This country has around 4,000,000 men under arms for whom meat supplies must be prepared months in advance. Mr. Roosevelt said the people will have to expect new shortages from time to time because that is part of the price of winning the war.

Farm Income

During the first half of 1942 cash income from farm marketings totaled $5,773 million compared with $4,012 million in the same period last year, the Agriculture Department reported. Income from crops was up 36 per cent and income from livestock and livestock products was 48 percent greater. The Department said a record volume of marketings is expected in the latter half of 1942. Total cash income from farm marketings during 1942, including Government payments, probably will exceed $14,500 million, the report said.

Rationing

The outlook for obtaining sugar supplies from the Caribbean has "taken a turn for the worse" because of submarine warfare and the amount of shipping diverted to war purposes, the OPA said. The office asked sugar refiners in Louisiana and Texas not to ship to sugar markets in Indiana, Illinois and Ohio until at least September 1 because of a shortage in their home states. OPA said these restrictions will have to be continued if receipts from Cuba and Puerto Rico are below expectations.

Under rationing regulations persons owning more than one typewriter may dispose of their machines only to authorized dealers or to the Procurement Division of the Treasury, OPA said. The office ruled all new adult bicycles are subject to rationing "even tho they may have been disassembled or altered or the parts changed."

War Bond Purchases

July sales of War Bonds totaled $900,900,000, second highest monthly amount on record and $250 million above June sales, Treasury Secretary Morgenthau said. The highest monthly total was that of January when the amount was $1,060 million. Mr. Morgenthau said the August quota has been placed at $815 million. "Because of seasonal variations in income distribution, it would not be practicable to establish monthly quotas at a uniform figure of $1,000,000,000," he said.

Transportation

The Office of Defense Transportation took over allocations of all new buses and froze all integral-type buses in the hands of manufacturers. Under the new plan, the ODT will grant permission to buy new buses only when the purchasers sign an agreement giving ODT authority to transfer the buses for use elsewhere if transportation difficulties develop. ODT Director Eastman asked Public Service Commissions of the states to make a nation-wide survey of local rail and bus passenger services to eliminate duplications. War Production Chairman Nelson said the WPB is studying the proposal of ship-builder Henry Kaiser to build 5,000 large cargo planes in converted shipyards. The Maritime Commission reported U. S. shipyards broke all records in July as 71 new merchant vessels were put into service, making a total of 299 cargo vessels and tankers produced during the first seven months of this year.

The War Front

Lt. Gen. Stilwell's China headquarters reported U. S. airmen have broken the back of an elite force of Japanese bombers and fighters assembled for the purpose of driving them out of China. The climax was reached July 30, the communique said, when 17 Japanese bombers and new type Zero fighters were shot down. Gen. MacArthur's Australian headquarters announced Allied planes conducted raids on Japanese positions from Amboina Island in the Netherlands East Indies to Guadal-Canal Island in the Solomons. The Navy announced the sinking of four United Nations merchant vessels by enemy submarines.

Trial of Nazi Saboteurs

The Supreme Court ruled that the charges preferred against the eight Nazi saboteurs allege an offense "which the President is authorized to order tried before a military commission," that the commission is lawfully constituted, and that the saboteurs are held in "lawful custody." The saboteurs were brought again before the military commission.

The Armed Forces

The President signed a bill creating the Women's Auxiliary Reserve in the Navy, which will be made up at first of 1,000 commissioned officers and about 10,000 enlisted members. He also signed a bill to permit the CAA to train airplane mechanics in its Civilian Pilot Training Centers. The Army has asked for training of 31,000 mechanics. Selective Service Headquarters instructed SS local boards to induct during August some men classified in 1-B with certain types of physical defects.

("A Week of the War" summarizes information on the important developments of the week made available by official sources thru noon EWT, Monday, August 3.)

By the time the average man learns the value of study he has lost his eyesight.

NOTICE Of Primary Election

TO BE HELD AUGUST 11th, 1942

NOTICE IS HEREBY given that a Primary Election will be held in each election district in each town in Allegany County, State of New York, on the 11th day of August, 1942, between the hours of 12:00 noon and nine o'clock in the evening of that day for voting thereat.

The location of each polling place for said Primary in each election district in said County will be the same as at the last general election.

Each town in said Allegany County shall comprise the same number of election districts for said Primary as it did at the last General Election with the boundaries for each of said election districts the same.

The Republican, Democrat and American Labor parties will hold their Primary Election at each of said polling places in which there resides qualified enrolled electors of any such parties, and all duly qualified enrolled electors may vote at such voting places in said election districts in which he or she may reside on that date.

Each of said political parties above named may nominate at their Primary election candidates for the following public office:

Representative in Congress for the 43rd Congressional District.

State Senator for the 44th Senatorial District in the State of New York.

A Member of Assembly.

(2) Coroners.

Each of said parties may also elect candidates for the following party positions:

Delegates and Alternates to its State Convention.

Delegates and Alternates to its Judicial Convention, held for the nomination of candidates for the office of Justice of the Supreme Court in the Eighth Judicial District.

Members of State Committee.

Members of County Committee.

Given under our hands and seal of office at Cuba, Allegany County,
