GET OUT YOUR JUNK!

IT IS a crime in Germany to waste a scrap of metal or other material. Everything that can be used is used. Altho Germany is short of war material, it has built up the best fighting machine in the world by eliminating all waste.

The United States has had such a wealth of raw materials in the past that the people have become wasteful. Worn-out machinery has been left to rust in the fields. Odd bits of iron, steel, copper, tin and other metals have either been thrown away by village residents or left to accumulate dust in cellar or garage corners. Old rubber has been discarded and lost.

This country is now in urgent need of this junk which was formerly thrown away. The country's steel furnaces are not operating at capacity because of scrap steel shortage. There is a crying need for more copper, zinc and lead. Huge quantities of all kinds of junk must be salvaged if war production is to attain maximum levels.

Because of the acute shortage of raw materials the war production board and the salvage industry are appealing to the residents of this county to salvage their junk in a series of newspaper advertisements. The Allegany County Salvage Committee is putting on a drive for junk collection in each town. Every town has a salvage chairman, who is being assisted by workers along every highway. A concerted effort is being made here to get the much needed junk from the farms and from the village residents.

Men are giving freely of their time trying to insure the success of the salvage committee in this county. The success of the campaign depends not alone on how well the volunteers do their work, but on whether the people of Allegany county are willing to spend a little of their time in searching their farm or village premises for junk. The farmer who is willing to haul out the old car which has been rusting behind the barn for the past three years, or walk out and pick up that broken plow point which has been left on the stone wall, is doing something to win the war. The village resident who looks around and finds a few pounds of iron here, or a scrap or two of brass or copper there, is also contributing to the war effort.

In this salvage campaign no amount of junk is too small. A few pounds of salvage from each home in a village will amount to a great deal in the aggregate. Junk is needed to win the war, so get out your junk!

The collection in Andover will be made all next week, starting Monday, September 21st and ending in a grand round-up on Saturday, the 26th.

Start collecting your junk immediately and phone any of the Local Salvage Committee and it will be picked up and paid for by next Saturday.

If you want to be happy, never set your mind upon anything that it is within the power of others to withhold.

The year has advanced to the stage when smart youngsters begin looking up December in order to see what day will be Christmas Day.

Inflation would be more disastrous than any sales tax ever devised. It would tap the spending money of every American in a big way.

Any American who is unwilling to accept hardships, on account of the war, should be sent into the front line trenches to discover what hardshp really means.

War is a bloody business and ends when one side, or the other, loses enough men to cripple military power.

The man who admits a foolish act is to be trusted; the "wise guy" who is never wrong is a fool; leave him alone.

The newspaper that does something for its readers will probably do something for its advertisers.

Keeping the Clothes on Our Backs

ABOUT this time of year, with the cold months directly ahead, most housewives thruout the land follow the traditional custom of getting out their woolen blankets and heavy woolen clothing to have them ready for use when the frost comes.

This year there is special importance attached to this tradition because new wool for civilian use is scarce and may grow scarcer. Practically our entire domestic wool output is being used to fill demand of the Army and Navy. From now on clothes and blankets will be made more and more with blends of new wool and synthetic fibers, and re-used and reprocessed wool.

In spite of recent developments in the manufacture of fibers competitive to wool, no synthetic fiber has yet been produced to equal the degree of durability and resistance to cold that wool affords. During the winter ahead of us, maintenance of the health of the civilian population will become increasingly important. And in order to make it possible for all of us to get the greatest mileage out of good woolens already owned or about to be purchased, experts have compiled some suggestions which we think are highly important.

Under the heading of general care we are advised to observe the following rules:

1—Always hang your clothes, preferably on wooden hangers, hanging trousers from the bottom and removing all weighty objects from pockets.

2—If you have several suits, wear them in rotation; hand-press whenever possible and let them hang for at least a full day before wearing.

3—Always give suits a good brushing before hanging in order to remove dirt and dust.

4—Never hang sweaters, but fold them and place on a shelf or in a drawer to avoid pulling them out of shape.

The washing of woolens is a special art which even the best of housewives will admit. In general, woolens should never be soaked. Use only lukewarm water and plenty of mild, neutral soap suds. The goods should be kept in easy motion and the soap should be rinsed out in water of the same lukewarm temperature. After washing, squeeze them dry in a heavy towel. Never wring or twist them. Dry in a warm place but never in the sun or before a radiator or open fire.

An Untooted Horn

ON THE walls of production plants thruout the country there are posters that carry this challenge: "All Americans who have an invention or an idea which might be useful to their country are urged to send it immediately to the National Inventors Council,' of the Department of Commerce at Washington."

Close to 100,000 responses have been received to the general invitation to "Invent for Victory." The Council is headed by Dr. Charles F. Kettering, the genius who has become famous on account of his inventions to improve automobiles, including the self-starter. The Council also includes Orville Wright, of airplane renown, Dr. William R. Coolidge, inventor of the x-ray tube, and Dr. Thomas Midgley, Jr., who played a leading role in the development of tetraethyl gasoline.

The Council has a staff of 55 engineers, and they know all the answers that concern the possibilities of ordnance, aircraft, chemistry, electricity, and anything that spells Victory!

Some of the large corporations set apart laboratories and workshops and co-operated with the Inventors' Council by offering przies for inventions. All suggestions to the Council are receiving careful attention. Acceptable plans and suggestions are taken up with officials of the Army, Navy, Maritime Commission and the Office of War Production.

This is at least one Council that has not been accused of seeking publicity. It has issued fewer than half a dozen news releases since its organization in October, 1940—and perhaps that is why most of this item is news to our readers.

It all goes to prove the truth of the old line that "he who tooteth not his own horn the same shall not be tooted."

However, word comes from Government war headquarters that many of these responses to the call to "Invent for Victory" have been of such great value that more will be heard about them when the time arrives that they will no longer be need to be guarded as military secrets.

We have never understood why some people have to be driven to religion.

Buy a War Bond and keep it for the future—you will probably find it useful.

One reason for so many accidents is that so many people take them for granted.

A Week of the War

All motorists in the unrationed areas of the country were asked by Price Administrator Henderson to observe the same rules in using their cars that are enforced in the rationed Eastern area, as a means of conserving rubber. tires until a national gasoline rationing plan can be put into effect. He said it will be several weeks before coupon ration books can be printed to carry out the nation-wide gas rationing recommended by the Baruch Rubber Committee. Unless the nation's 27,000,000 motorists cut their driving "to the bone," Mr. Henderson said, "we're likely to coast right into Hitler's lap."

The White House issued a chart prepared by the Society of Automotive Engineers showing that the normal life of a tire is doubled when the average driving speed is reduced from 40 to 20 miles an hour, or from 50 to 30 miles an hour. The President said he thought the chart should be brought to the attention of the country as a persuasive argument for slow driving.

The Baruch Rubber Committee recommended that motorists be curtailed to a general average of 5,000 miles a year. The Committee also recommended a national speed limit of 35 miles an hour and compulsory periodic tire inspection. Complete reorganization of Government agencies concerned with the rubber program and appointment of a Rubber Administrator with full responsibility for conservation and synthetic production programs were also recommended. Additional rubber must be released to fully maintain essential civilian driving, reclaiming operatons must be stepped up, and to increase synthetic production, the Committee recommended immediate expansion of plant capacity for Buna-S, butadiene, neoprene, and alcohol and elimination of any further substitution in plans for synthetic production. The President told his press conference virtually all of the Committee's recommendations except gasoline rationing will be put into effect immediately.

The War Front

Gen MacArthur's Australian headquarters reported Allied forces have kept the Japanese thrust toward Port Moresby bottled in the towering Owen Stanley mountains while Allied aircraft swept the seas surrounding the island, bombing enemy supply ships. Gen MacArthur announced September 14 that United Nations bombers attacked three Japanese cargo ships, apparently bound for New Guinea, and American Flying Fortresses bombed a Japanese cruiser offthe southeast coast of New Britain. Earlier, the Fortresses hit two enemy destroyers in the same area. Japanese bombers continued to attack U. S. forces in the Solomons and the enemy has "reinforced and supplied" Japanese troops in the interior of Guadal canal where U. S. Marines are engaged in mopping up operations, **the Navy reported. The Navy said that 20 more Japanese planes have been shot down in three heavy bombing attacks — bringing to at least 143 the number of Jap planes officially reported shot down since operations began August 7.**

U. S. Army headquarters in London reported American Flying Fortresses and medium bombers successfully bombed the Schiedam, shipyards at Rotterdam, railway yards at Utrecht, an airframe factory and the St. Omer airdrome in Nazi-occupied France. Damage to intercepting enemy planes included 17 fighters destroyed, 25 more probably destroyed and 25 damaged. Two Fortresses were listed as missing, the first American losses in 12 straight attacks on Nazi territory in Europe. The Navy announced the sinking of eight more United Nations merchant vessels by enemy submarines.

War Strategy

The White House announced that during July Army Chief of Staff Marshall, Chief of Naval Operations King and Special Adviser to the President Hopkins conferred with high British officials in London and at these conferences certain vital military decisions directed toward taking the offensive were made. The President, in a radio address, said the power of Germany must be broken on the continent of Europe and "Preparations are being made here and in Britain toward this purpose." Under Secretary of War Patterson, speaking in Muskegon, Mich., said that more than 600,000 men in the armed forces are overseas and this force "will be doubled and doubled and doubled to the limit of our manpower." W. Averell Harriman, Special Lend-Lease Minister to London, said the Russians "are determined to fight to the finish — alone with their own resources if need be. But they will fight on with even more strength and courage if we give effective aid."

The Armed Forces

President Roosevelt told his press conference he did not think it would be necessary to call up 18 and 19-year-olds before the first of next year because Army training facilities at present are only equal to the number of men being taken in, but he is discussing with the Army whether enabling legislation will be needed soon. Army Ground Forces Commander McNair announced the number of Army divisions in existence or being mobilized has more than doubled since January 1.

War Secretary Stimson announced the Air Transport Command will establish an experimental unit of 50 trained women aviators, the Women's Auxiliary Ferrying Squadron, to ferry smaller Army planes from factories to airfields. The Weather Bureau called for 75 women airplane pilots to take a course in meteorology. Mr. Stimson also said the Army expects to call m and possibly all, student Reserv who have reached Selective Ser age to active duty by the end of college term beginning in Sept ber. The Coast Guard is formin fleet of 250 fire-fighting boats, m of them embodying a new design propulsion and fire-fighting mach ery, to be used in protecting wa front facilities along U. S. coast

Transportation

Office of Defense Transportat Director Eastman announced special train or bus service, incl ing charter bus service, to footb games or other sport events will permitted. At the same time I directing that steps be taken by office to prevent the overcrowdi of regular trains serving areas which such events are to be hel The Interstate Commerce Commi ion ruled that for the duration railroad carriers may disregard present regulations length of trains when necessary assure prompt movement of freig or passengers.

The ODT ordered all operators commercial rubber borne vehicl except motorcycles to carry a show a "Certificate of Necessity in order to obtain gasoline, tires parts after November 15. The reg lation covers almost 5,000,000 no military trucks, 150,000 buses, 50 000 taxicabs and all ambulance and hearses. Applications for c tificates, as well as other pertinen information, will be mailed abou September 23 to all persons wh registered last December 31 as owr ers of motor vehicles available fo public rental.

War Production

War Production Chairman Ne son asked war workers to stop tak ing an extra day off and to refrai from "quickie" strikes over mino grievances because such absence slow production. He said the na tion's production record is not nea ly good enough. The President b Executive Order prohibited paymen of "penalty double-time" pay fo work on Saturdays, Sundays an holidays, but permitted payment o double-time. for the seventh con secutive day's work and of time-and-a-half for all overtime work af ter 40 hours a week. Under Secre tary of War Patterson said U. S plane production in August wa greater than that of Germany, It aly and Japan combined and tank production, already at an impressiv high, will be twice as great in De cember.

Asthma Mucus Loosened First Day
For Thousands of Sufferers

Choking, gasping, wheezing spasms of Bronchial Asthma ruin sleep and energy. Ingredients in the prescription Mendaco quickly circulate through the blood and common by help loosen the thick strangling mucus the first day, thus aiding nature in palliating the terrible recurring choking spasms and in promoting freer breathing and restful sleep. Mendaco is not a smoke, dope or injection. Just pleasant, tasteless palliating tablets that have helped thousands of sufferers. Printed guarantee with each package assures their quick complete satisfactory. Ask your druggist for Mendaco today. Only 60c.

IT NEVER FAILS

PLAYING WITH FIRE

Ask the Scientist

If you have a question to ask the scientists, mail it to the New York Press Association, The Castle, Syracuse, N. Y. The Science Board of the Radio Workshop at Syracuse University will answer each week three of the questions most interesting and timely.

Question 1. How is one to distinguish an incendiary bomb from a time bomb or other kind of explosive bomb and what should one do in case of an air raid in which the latter are dropped upon a house?

ANSWER. If a bomb falls into your house, or near it, and fails to explode, it should be considered as a potential time bomb even though it may later turn out to be a dud. Report it to your post warden who will in turn notify the proper authority. In the meantime, stay out of it or at least keep everyone away from it until proper disposition has been made of it.

An incendiary bomb will begin to burn almost immediately after it strikes. If it doesn't — don't immigrate it in an effort to identify its type but consider it a time bomb.—Dr. A. J. King, chemist.

Questioon 2. Have we ever discovered a large island uninhabited?

ANSWER. Everywhere where there was food to be had people have been found to be living. One island about 555 miles east of Madagascar, in the Indian ocean, the island of Mauritius, had no people on it when the Portugese discovered it in 1505. There was no evidence of anyone having been there ever.

The island is about 36 miles long by 23 miles wide, triangular in shape with an area of 110 square miles. It is about 23 degrees south latitude.

It is now a large agricultural island under British control. All of the development and habitation has been since the initial discovery. As far as we know, no persons were living there when the land was first seen. — Dr. Earl Apfel, geologist and geographer.

Questioon 3. What kind of bird is the albatross?

ANSWER. The albatross is an extremely interesting and highly specialized bird. Ten or a dozen species are known, the largest and most famous being the great wandering albatross, immortalized by Coleride in the "Rime of the Ancient Mariner." All of them are preeminently sea birds, spending nearly all of their lives on the high seas, far remote from land.

The wandering albatross has a wing expanseof 12 to 14 feet, exceeding that of any other bird. With these long, narrow wings these huge birds soar about over the vast expanses of the oceans for weeks and months on end. They never alight on the sea except occasionally to pick up food. They touch the earth only when they nest on lonely, barren islands remote from any of the continents.

In the science museum of Brown university there is a wandering albatross which was killed off the coast of Chili on Dec. 20, 1847. Attached to the bird's neck was a small bottle containing the information that the bottle had been attached on the preceding Dec. 12 at a spot near New Zealand, which was at least 3,400 miles away, across the southern Pacific.

In a little over seven days this superb master of flight had casually soared at his leisure while searching for food across 3,400 miles of heaving sea, an average of more than 500 miles per day. The sight of an albatross does not indicate that land is near. They shun the land. — Dr. Henry N. Jones.

Question 4. I have a ring marked 14k and was told that it is not solid gold but only part gold. Is this correct?

ANSWER. The purity or finess of gold is usually expressed in carats. A carat is a technical term used to indicate one-twenty-fourth part. Hence, pure gold contains 24 twenty-fourths of pure gold and would be marked 24k. Your ring is marked 14k and so it contains 14 twenty-fourths of pure gold and 10 twenty-fourths of some other metal. In other words, it contains about 57.3 per cent pure gold.

The term, solid gold, is used to indicate the difference between an article which has been plated with gold and one which is gold through and through. It is, therefore, correct to say 14k solid gold. The word carat probably came from the carob tree, the seed of which was used as a unit of weight in ancient times.—Dr. King.

"Have you any good pork?"

"Good pork? Say, I've got some pork that will make better chicken salad than any tuna fish you can buy."

Fuelwood Marking Service Available to Farmers

All foresters of Federal, State and county agencies are to be available to farmers thru the coming winter to mark fuelwood for cutting, according to plans recently announced by the Allegany County Extension Service and the Soil Conservation District.

This service is being made available so that woodland areas will not be damaged and depleted when fuelwood is cut during the present emergency to provide heat for the duration. Any farmer or individual interested in selectively cutting their woodlands in Allegany county may receive the assistance of the Soil Conservation District Forester Robert A. Reed, who is assigned to the county to perform this service. Mr. Reed's office is located in the court house, Belmont, and will accept application for this service which may also be made to Clifford R. Harrington, county agricultural agent.

TO RELEASE FLOW OF
LIVER BILE

Get a bottle of Kruschen Salts tonight. Half an hour before breakfast, take as much as will lie on a dime in a glass of water (hot or cold) or in your morning cup of tea or coffee and keep this up for 30 days. Kruschen taken this way helps relieve such symptoms as sick headache, bowel sluggishness and so-called bilious indigestion when due to insufficient flow of bile from the gall-bladder. You can get Kruschen, a famous English formula made in the U. S. A., at any drug store. You must be satisfied or money back.

NEW! "BACTERIOSTATIC"
FEMININE HYGIENE
now finding great favor among women...

Many doctors recommend regular use of douches as a precautionary measure for women who want to be clean, dainty—for women troubled by offending odor or discharge.

Some products may be harmful to delicate tissues. But not Lydia E. Pinkham's Sanative Wash! Pinkham's Sanative Wash is gaining great favor among women because it's NOT a harmful germicide. Instead—it's a mighty effective "bacteriostatic" (the modern trend). It not only discourages bacterial growth and infection but thoroughly cleanses and deodorizes. Very soothing—relieves minor irritations and discharge and has a tonic effect on delicate membranes. Inexpensive! Get your bottle of Lydia Pinkham's Sanative Wash *today*. All druggists.

HOW MUCH IS ENOUGH?

When it comes to Vitamins A and D, *ENOUGH* is more than many people normally get. Make sure that you and your family get a normal supply of these necessary vitamins by taking

ONE A DAY
VITAMIN A AND D TABLETS

Each "One-A-Day" brand Vitamin A and D Tablet is *equivalent in Vitamin A and D potency to one and one-half teaspoonfuls of Cod Liver Oil* meeting minimum United States Pharmacopeial Standards.

Convenient—You take only one tablet a day. *High in Vitamin Content*—Each tablet contains 5000 Units of Vitamin A and 500 Units of Vitamin D. *Easy to take*—No fishy or oily taste—no after-taste.

Guaranteed by Good Housekeeping Bureau

Developed, distributed and guaranteed by the makers of Alka-Seltzer.

FIFTY YEARS AGO

SEPT. 28, 1892

H. C. Norris, Editor

Rev. Jonathan Allen, D.D., L.L.D. Ph.D., the honored president of Alfred University, passed away at his home in Alfred Center last Wednesday. The funeral services were held Friday afternoon. Rev. Allen leaves a wife, two daughters and a son to mourn his loss. Rev. Allen was born in Alfred in 1823 and graduated from Alfred Academy in 1843.

George Alvord and family of Andover were guests of Potter and Forsythe of Independence Sunday.

The funeral services of the late Eber Warfield were held at the house last Thursday afternoon. Rev. Jared Kenyon of Independence officiated. The deceased left a wife, one son, Eugene Warfield of Andover, and one daughter, Mrs. Horace Stillman of Almond.

Jesse S. Phillips left on Monday evening for Ann Arbor, Mich., to continue his law studies.

Mrs. E. D. Clarke returned last evening from New London, Oneida county. Miss Mattie Langworthy remains to care for her mother who sustained a fractured hip and cannot be moved.

Mr. McLennon, a native of Allegany county and a graduate of Alfred University where he took the degree of A.M., was nominated for Justice of the Supreme Court by the Republicans of the First Judicial District.

Miss Nellie Hincher of Andover was a guest of Miss Mae Osborn of Wellsville from Friday until Sunday.

Mrs. Lon Howland of Elm Valley who has been ill with typhoid fever, is reported to be no better.

Envy is the mist to becloud the intellect that is steering a life.

FORTY YEARS AGO

Olin Earl Pingrey of Andover and Miss Jessie Grace Buck of Hornell were quietly married Wednesday afternoon at the home of the bride's mother, Mrs. Mary Buck. The ceremony was performed by the Rev. W. C. Wilbur, D.D. Upon their return from their honeymoon, Mr. and Mrs. Pingrey will make their home in Hornellsville.

While driving home last Tuesday with a load of oats, G. M. Barney had a serious accident. The load of oats slid off the wagon. Mr. Barney slid off and landed on a two-tined fork, one tine of the fork penetrating his left thigh close to the body. Dr. E. J. Loughlen was immediately called and dressed the wound. The patient at present is getting along good.

We are glad to see that George Driscoll has recovered from the fever and is able to be up and around town.

David B. Lee, an old and respected resident of this town died at his home last Monday noon after a short illness. He leaves his wife, two sons, Lorenzo and Burdette, as well as two daughters, Mrs. Scott and Mrs. Ingraham. The funeral services will be held Thursday in the Baptist church with Rev. C. H. Harrington officiating. Interment in the Hillside cemetery.

Mr. and Mrs. Harry Joyce are rejoicing over the advent of a little girl in their home in Alfred.

Mrs. Elisha Geary died Monday at the home of her son in this village, aged 86. Funeral services are being held at the residence this afternoon. Burial at the Rural cemetery in Alfred.

A pleasant evening was enjoyed by a number of friends at the home of Mrs. H. S. Green on Chestnut street, in honor of her sister and husband, Mr. and Mrs. Frederick Pfluger of New York City.

Dr. and Mrs. C. W. O'Donnell returned home from their Western trip Monday. They reported a lovely visit and trip.

Giles Friar and wife of Richburg and George Bloss and wife of Independence were guests of their parents, F. M. Bassett and wife Sunday.

Mr. and Mrs. J. J. Warfield passed Sunday with their daughter and husband, Mr. and Mrs. Childs of Hornellsville.

Mr. and Mrs. P. C. Lynch, Chas. B. Lever and Ollie Whitcomb attended the Cuba fair and races today.

J. L. Williams and wife were guests of Mr. and Mrs. Ezra Hamilton of Alfred Station Sunday.

Calvin Slocum returned home Wednesday after a two weeks' visit with his daughter, Mrs. Wm. Reed of Niagara Falls, N. Y.

Mrs. Elizabeth Burdick of Alfred Station was a guest of her niece, Mrs. Frank Hincher the past week.

THIRTY YEARS AGO

SEPT. 20, 1912

J. Harvey Backus, Editor & Publisher

Dr. W. H. Loughhead, a prominent Andover physician and having a state-wide reputation for the treatment of heart trouble died Thursday Sept. 12. Dr. Loughhead is survived by his wife and four children: Misses Genevieve and Isabelle and William and Alva Loughhead. The funeral services were held at the Seventh Day Baptist church of this village Sunday afternoon, Rev. E. E. Sutton of Little Genesee presiding, assisted by Pastor Clyde Ehret of the Andover S. D. B. church. Burial was made in Hillside cemetery.

Daniel Oakes died Sept. 14th after a six-day illness. Mr. Oakes leaves to mourn his loss eight children, Adrian D. Oakes, Mrs. Maud Prest, John Oakes, of Santo Domingo, West Indies, William H. Oakes, Myra Oakes, Covil Oakes, Standley Oakes, Lewis Oakes and one sister, Miss Charity Comstock. The funeral services were held Monday at 2 p. m., Rev. W. H. Randall conducting the services.

A daughter was born to Mr. and Mrs. W. A. Burdick of Alfred Sept. 11th.

Jesse Swink has laid a new cement walk along his residence property on Second street.

Miss Mary White drew 12 bags of cement in a guessing contest last week.

Mr. and Mrs. Herbert Updyke, formerly of Andover, are entertaining a brand new seven-pound daughter, born Monday. Grandma Updyke was calling on the young lady this week.

South Hill—Mr. and Mrs. Ed. Horan and little daughter Mary spent Thursday evening in Wellsville.—Mrs. Jack Smith and daughter Helen of Andover enjoyed a visit to her home the first of the week.—Mr. and Mrs. Lou Snyder and little son of East Valley were guests of her parents on Sunday.

Mrs. James Hammond and daughter Leah were Wellsville visitors last Saturday.

Mrs. W. H. Randall and Mrs. F. W. Burrows and babe were in Buffalo Tuesday.

Mrs. Sarah Lusk of Penn Yan has been a guest at the home of H. S. Thorne the past week.

Mr. and Mrs. L. P. Crandall and Mr. and Mrs. George Beebe were in Whitesville Friday evening in attendance at the Rebekah Lodge.

Miss Martha Langworthy, who has been passing the summer with her mother, Mrs. Annis Langworthy returned to Buffalo Friday.

Mrs. J. A. O'Leary returned Saturday from Buffalo and Dunkirk. She accompanied her daughter Mary to Buffalo where she is attending the Buffalo Normal School.

SCHOOL DAYS — By DWIG

YOU WOMEN WHO SUFFER FROM
HOT FLASHES
during 38 to 52 Years of Age!

If *you*—like so many women between the ages of 38 and 52—suffer from hot flashes, weak, dizzy, nervous feelings, distress of "irregularities", are blue at times—due to the functional middle age period in a woman's life—start at *once*—try Lydia E. Pinkham's Vegetable Compound. It's the best known medicine you can buy that's made *especially for women*.

Pinkham's Compound is *famous* to relieve such distress. Taken regularly—it helps build up resistance against such symptoms. It also is a fine stomachic tonic! Thousands upon thousands of women — rich and poor alike — have reported benefits. Also beneficial for younger women to help relieve distress of monthly functional disturbances. Follow label directions. *Worth trying!*

WHO KNOWS?

(A review of important war dates.)

1. When did Russia attack Finland?
2. When did U. S. planes bomb Tokyo?
3. When did Germany invade Denmark and Norway?
4. When did U. S. troops arrive in Northern Ireland?
5. When did Winston Churchill become Prime Minister?
6. When did Italy declare war upon France?
7. When did the U. S. Selective Service Act become law?
8. When did Germany attack Russia?
9. When was the "lend-lease" bill signed by the President?
10. When did the Navy win the Battle of Midway?
