Meat Is Next

WITH sugar, coffee, tires and gasoline all taken care of for the duration, the next to fall victim to the war axe apparently is our meat supply.

While no definite rationing program has been announced, considerable build-ups are in evidence—the first being the grapevine report that we are all going to be allowed two and a half pounds of red meat per person a week, and now comes along a program under the name of Meat Education.

The program, ear-marked as "share the meat plan," is to be carried out by volunteer workers under the direction of the Farm Bureau office and under the program volunteer workers will be asked to visit every farm home and every home in towns of less than 2,500 population where they will leave printed matter relating to use of meat substitutes and unrationed types of meat.

Organization meetings were held in Allegany county last week in preparation for these house-to-house visits and the program is expected to be started as soon as the printed forms on meat substitutes come.

There is apparently only one answer to all of this and that is that meat rationing is definitely in the cards for the near future.

Have a Care When You Want to Kick

IT IS TRUE that more than 5,000,000 civilian employees are in the service of the Federal and State Governments. That is why a few brave statesmen charge that some of the Government agencies are guilty of waste and inefficiency in hoarding and pirating labor. Every person who lives in the Capital City knows that Washington has hundreds of thousands of persons on the Government payrolls, and twice as many new buildings as there were in 1918. But no one kicks very hard, because of the universal fear that some needed war programs might be interrupted.

Incidentally, Washington folks are afraid of themselves—afraid that they may complain, and find out later that they should have cheered. Which all means that Washington wiseacres too often know too little about what is actually happening—the North African affair, for instance.

We never miss the moon until we can't see it.

We've mentioned it before, but why not send The Andover News to your boy in the armed services? It's like a letter from home.

There comes a time in the life of every individual when he, or she, discovers the Bible.

One reason that writing is such a hard task is because so many writers have nothing to say.

Marines Change Famous Hymn

FROM the far southwest Pacific to the shores of Tripoli or thereabouts American Marines face a change in their musical habits. They have to learn a new fourth line to the first verse of their famous hymn.

Lieut. Gen. Thomas Holcomb has formally ordered revision of the song to give recognition to those Marines who fight in the air as well as those who fight on land and sea. Here is the way it goes now:

"From the halls of Montezuma
To the shores of Tripoli;
We fight our country's battles
In the air, on land and sea;
First to fight for Right and Freedom
And to keep our honor clean;
We are proud to claim the title
Of United States Marine.

Previously the fourth line said "On the Land and on the Sea."

Brig. Gen. Robert L. Denig, Marine Publications Officer, has ordered a new edition of the song printed and application made for a copyright to cover the change.

Altho some such alteration of the song had been suggested by many persons, General Denig said Gen. Holcomb adopted in his order the version proposed by he First Marine Aviation Force Veterans Association which told him that "nothing, in our opinion, could do more to recognize and pay tribute to the air arm of our Corps, past, present and future."

Capt. William F. Santelman, leader of the Marine Band assured the Commandant that the new version would not upset the song's rhythm. The Marine hymn originally was the work of an anonymous poet with the force in the Mexican War in 1847. The music comes from an old French opera.

Must Maintain Newspapers As War Necessity

NEWSPAPER advertising is a war necessity if a free press is to be maintained in America, says J. Howard Pew, president of the Sun Oil Co. Writing on the subject, "Why advertising is necessary during the war," Pew said there were two principal reasons;

"First we have in America the freest, most honest, most independent, and most competent press in the world. We have that kind of free press because its chief support is advertising, which, reflecting the activities of our system of free competitive enterprises, gives to our press so broad a basis of economic support that it can afford and can dare to be independent.

"Without such a broad foundation of economic support our press would be dependent on the favors of politics and the subsidies of government, like practically all the press of Continental Europe.

"The corrupt and anemic press of France was in large part to blame for the moral breakdown and final disaster which befell that country. To avoid such disaster here our press must not be allowed to fall into dependency on political or governmental support.

"Second, to allow our press to be starved, or to be subjected to the demoralizing controls of government and politics, would be moral and economic disaster of the first order. To lose it would be to lose the very things we are fighting for.

"To preserve it we must support it; and the only way to support it in honesty and independence is thru the revenues it derives from advertising.

"Our national leadership in productiveness, and our high living standards can only be maintained thru big-scale production and distribution; and this requires the continuing stimulation of advertising."

YOU CAN AVOID BREAKDOWNS IF YOU PROTECT YOUR TRACTOR WHEN IT IS IDLE

By
ERIC PATTERSON
Farm Supt., N. Y.
State Institute of
Agriculture

IN my last article I pointed out how breakdowns and expense could be saved by periodic "check-ups" of farm tractors. However, tractors in some sections are not used all year around and are "laid up" for at least part of the winter. Unless precautions are taken during these "lay-up" periods, costly damage to the engine can result to condensation inside the motor, etc.

Some automotive engineers claim that engines suffer more damage during idle periods than when they are in use.

The vitally important factor in the protection of tractors between seasons is to make sure that all moving parts are adequately covered with good, fresh lubricants.

The ten simple rules presented below are based on recommendations of Agricultural Engineers and Lubrication Engineers. If carried out when the tractor is laid up, they will save time, trouble and expense when the tractor is rolled out for duty again.

WHAT TO DO

1. Drain crankcase, flush and refill with the proper grade of motor oil. Run engine only long enough to warm and distribute the new oil.

2. Drain radiator and engine block. Leave drains open.

3. Remove spark plugs, put two tablespoons of fresh crankcase oil in each cylinder. (If engine is a Diesel follow manufacturer's recommendations). Turn the engine over several times to distribute the oil. Replace plugs after dipping threads in oil.

4. Drain transmission and final drive, flush and refill with the proper grade of gear lubricant

5. Drain every drop of fuel from fuel lines and carburetor.

6. Lubricate all chassis fittings and repack wheel bearings with the recommended lubricant.

7. Remove valve cover and cover the rocker arms, springs and valve stems with new motor oil to prevent rusting or sticking.

8. Clean the entire tractor thoroughly.

9. Store the tractor in a dry place and jack up so that tires are free from the ground, and maintain normal air pressures.

10. While in storage, remove battery and keep where water will not freeze. Battery must be recharged every 60 days and water kept at proper level.

11. Cover unpainted exposed metal parts of tractor with a good rust-proof compound or, if unavailable, use heavy grade of chassis lubricant.

A clean engine delivers maximum power. Change the oil regularly as recommended by the manufacturer. Use a high quality oil from which harmful carbon-forming impurities have been removed.

(Pictures by courtesy of The Texas Company)

Lubrication of all chassis fittings before laying up the tractor insures maximum protection during idle periods. It is important to use a good quality lubricant.

AUTHOR'S NOTE: It is not the policy of the N. Y. State Institute of Agriculture to recommend any specific products, and nothing in this article should be so construed.

Church Services

PRESBYTERIAN

Church services at 10:30.
Sunday School at 11:40.
Choir rehearsal, Friday evening, 7:30, at the home of Mrs. Bertha Hardy.

BAPTIST

Rev. Lloyd L. Tebo, Pastor

Thursday evening, 7:30: Mid-week prayer and bible study.
Sunday morning worship, 10:30 followed by communion.
Sunday school at 11:45
Christian Endeavor at 6:30.
Evening service at 7:30.
Tuesday evening at 7:30: Young people's meeting.

SEVENTH DAY BAPTIST

Rev. Walter L. Greene, Pastor

Sabbath services at 2:30 p. m. Sermon by the pastor. Subject: Plans for Christian Living.
Bible school at 3:30: Clifford Burdick, Supt.
Independence
Morning worship and sermon by the pastor at 11:00
Sabbath school at the close of the morning service. Mrs. Grace Spicer Supt.
Ladies Aid dinner at the Parish House, Dec. 6.

Every man will be your friend if you are a friend to man.
Have you tried to be the man you meant to be?

METHODIST

Rev. Helena L. Champlin, Pastor

The church family night to have been held tonight has been cancelled.
Sunday morning worship at 10:30.
Sunday School at 11:45.

CHRISTIAN AND MISSIONARY ALLIANCE

Milton Hurne, Pastor

Sunday School at 9:45 a. m.
Morning Worship at 11:00.
Evening Service at 7:30. The Rev. William C. Whitmer of Hornell, former pastor here, will be the speaker.

SUNDAY SCHOOL LESSON

THE MEANING OF THE CHURCH MEMBERSHIP

International Sunday School Lesson for December 6, 1942.

GOLDEN TEXT: "Now ye are the body of Christ, and members in particular." — I. Cor. 12: 27.

(Lesson Text: Colossians 3: 1-17)

Can one be a good Christian without affiliation with any church? Scarcely anyone will answer the question in the negative but almost everyone would say that the average man or woman can be a far better Christian by receiving the encouragement and inspiration which comes from proper church membership.

While our Scripture lesson does not include any reference to the Sermon on the Mount, we are adding a portion of it for our consideration. When, in this memorable sermon, Jesus told his disciples that they were the salt of the earth, he used this element to illustrate the preserving quality and of the essential necessity for the Christian influence in the world. As he lived among men he expected his followers to be a part of the world, redeeming and reforming it. "One of the purposes for which our Lord instituted the Christian church was that it might exercise a distinct moral influence on the society around it," says Dean R. W. Church. "Separate in idea from the world, it it was to be in the world, to touch the world, and to make great changes in it."

"Another pecularity of salt is that its presence is not as noticeable, as its absence," says Rev. Willis H. Butler. "We seldom think of it as an ingredient of our food, but when it is omitted we at once become aware of the fact. I sometime wonder what the world would be like if all the Christians were suddenly to be taken out of it. People who are the salt of the earth are not always recognized and appreciated while they are with us, but how we miss them when they are gone! If the life about us it no better for our being in it, the probability is that we have lost our savor. Our seasoning power is gone."

Jesus also told his followers that they were the light of the world, and another time he reminded them that the powers of evil worked in darkness and feared the light. Christianity and the church have exerted a marvelous and profound influence upon human life and conduct during the last two thousand years. "Light is the symbol of all that is desirable," asserts Rev. A. Z. Conrad. "It is almost synonymous with life. Light represents mental illumination, hence wisdom. Light guides our footsteps and prevents stumbling. Beacon lights warn the mariner of danger, or invite him to a safe harbor. Light means life at its brightest and best."

Jesus told his listeners not to hide the light under a bushel and this is strongly interpreted by E. Stanley Jones as follows: "A bushel is a symbol of trade, of business, of occupation. Here Jesus warns us against putting our lighted lives under our business, so that the business becomes uppermost and snuffs out the lighted life. In a commercial age, this is our chief sin. But it is possible to make the bushel into a candle stand so that the light is on top of the bushel and not under it. In that case the bushel is lighted as well as the surroundings — the business becomes the medium of a message. This is the Christian. But the gospel of being a success in business has so gripped our age that the gospel of being a success as a Christian is often overshadowed by it — the light goes out."

The early Christians did not immediately set up a church of their own. They continued in the temple but with a different religion than that formerly held as Jews. Peter preached his arresting sermons and thousands of souls became affiliated with the new way of life. They were coming not to church but to a saviour?" "What did the apostles teach?" asks Rev. James Denney. "A little further on in this book their enemies describe them as unlearned and ignorant men; but they took knowledge of them, we are told, that they had been with Jesus. This gives us the answer to our question. They had been with Jesus, they knew Jesus better than anybody else did; they never wearied telling about him, and the church never wearied hearing."

One of the most common criticisms of church members is that there is very little difference to be detected in the lives of those within and without the church. Sad to say, this is often a true criticism. Membership in a church should cause a marked change in the lives of all those who thus identify themselves with Christ. The sincese church member is, as Paul declares, "dead" to his old life in sin and "risen with Christ" to a new life of righteousness. He will accept as his motto the 17th verse of 3 Colossians, "And whatever ye do in word or deed, do all in the name of the Lord Jesus."

Mix Lemon Juice AT HOME TO RELIEVE RHEUMATIC PAINS
Money Back—If This Recipe Fails
Good news travels fast—many of the thousands of folks who now take lemon juice for rheumatic pain—have found that by adding two tablespoonfuls of Allenru to one tablespoonful of lemon juice in a glass of water, they get faster relief for the aches and pains caused by rheumatism, lumbago, sciatica or neuritis. It's no surprise either, for Allenru is a 12 year old formula to relieve rheumatic aches and pains. In fact—if it does not help you your money back. What could be fairer? Get Allenru today at any live druggist. Only 50 cents—Do it Now.

LOCAL BOYS IN U. S. SERVICE

TO ROUSE FLOW OF LIVER BILE
Get a bottle of Kruschen Salts tonight. Half an hour before breakfast, take as much as will lie on a dime in a glass of water (hot or cold) or in your morning cup of tea or coffee and keep this up for 30 days. Kruschen taken this way helps relieve such symptoms as sick headaches, bowel sluggishness and so-called bilious indigestion when due to insufficient flow of bile from the gall-bladder. You can get Kruschen, a famous English formula made in the U. S. A., at any drug store. You must be satisfied or money back.

Ask the Scientist

If you have a question to ask the scientists, mail it to the New York Press Association, The Castle, Syracuse, N. Y. The Science Board of the Radio Workshop at Syracuse university will answer each week in the Andover News those questions considered most interesting and timely.

Question 1.—I understand that 72 per cent of the earth's surface is water. This may be a foolish question, but where did all this water come from?

Answer — Let's start with some background. Oxygen is the most abundant chemical element in the earth, making up about half of the known substance of the earth. Practically all rocks are made up of combinations of oxygen with other chemical elements such as silicon, aluminum, calcium and iron. These are called oxides and occur in various groupings in the rocks.

Another combination of oxygen is with hydrogen to make water. Water is, chemically, hydrogen oxide, and it is in many cases combined with other oxides to make part of the solid rock of the earth.

We may think of water as one of the many oxides which go to make up the earth. There is an extra quantity left over after all has been used that is required to combine with other oxides to form the solid rocks. It happens that at earth temperatures, most of this left over hydrogen oxide, or water, is liquid and because it is lighter than the rocks, it has flowed out over them and gathered in the depressions in the rock surface to make the oceans.

This means that the oceans are of the same kind of material, fundamentally, as are the rocks of the earth and the same origin must be ascribed to them as to the rest of the earth.

If our climate were much colder, say as cold as Jupiter, our water would be solid like the other rocks of the earth. On Jupiter there are no oceans but a layer of ice, estimated at 16,000 miles in thickness, which forms part of the planet's diameter which is over ten times that of the earth.

Sometimes we think of the oceans and even of the air as forming a large part of the earth. Actually the mass (or weight) of the solid earth is nearly 5,000 times that of the oceans and nearly a million times that of the atmosphere. — Dr. Earl Apfel, geologist and geographer.

Question 2. — Why does an x-ray picture reveal only bones and not differentiate between the internal organs?

Answer — The ease with which x-rays penetrate an object is controlled by the atoms of which the object is composed. Heavy atoms are more opaque, that is, less transparent, to x-ray than light atoms. Therefore, if an object is made up of both light and heavy atoms, the part of the x-ray film which pictures the former will be blackest since more of the x-rays get through to affect it.

The internal organs and tissues of the body are composed principally of water, fat, and protein, all of which contain only relatively light atoms, thus permitting easy passage of the x-rays and strong blackening of the film. The bone structure, on the other hand, is made up of heavy atoms. Consequently the x-ray film is less affected under this region. The composition of the various organs is so nearly the same that there is little if any difference in their shadows on the film.

Devices may be employed, however, to obtain x-ray pictures that will differentiate certain organs. The gall bladder, for example, will temporarily absorb certain drugs containing heavy atoms, like iodine, and can thus be differentiated from others. A study of the intestinal tract is made possible by administering a glass of heavy barium sulfate milk some time prior to the examination, thus rendering the entire elementary canal entirely apaque to x-rays. — Dr. Alden King, chemist.

Question 3. — Are some forms of life neither animal nor plants?

Answer. — Some groups of living things are both plants and animals. At one time in their life cycle they are animals. At other times they are plants. — Dr. Ernest Reed, geneticist.

100 Per Cent War Program at Farm and Home Week

The annual Farm and Home Week at Cornell, shortened to a three-day wartime program, is scheduled for Tuesday, Wednesday and Thursday, Feb. 2-3-4.

The event, 36th in the series that started in 1908, brings farmers and farm families together at Ithaca each year for instruction and planning.

The college promises a program of wartime subjects that will fill the needs of persons who can travel to the sessions. Food production, nutrition, labor, machinery, conservation, rationing helps, prices, substitute materials, new packages for farm products, and changed consumer needs will be some of the topics considered.

Farmers at state and regional meetings of their own organizations this fall have asked the Farm and Home Week be continued in this year of war. Each year numerous organizations, in which farmers are active, plan their annual meetings at the annual meetings at the Cornell mid-winter event.

In planning the program, the college expects to present several open forum meetings, in which a panel of specialists in a subject will talk back and forth directly with the persons in the audience. Open forum meetings in the 1942 Farm and Home Week proved popular. In addition, time will be provided for personal conferences between specialists and visitors of the week.

Acid Indigestion
Relieved in 5 minutes or double your money back
When excess acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fast-acting medicines known for overcoming acid indigestion like those in Bisodol Tablets. No laxative. Bisodol brings comfort in a jiffy or double your money back on return of bottle. Get Bisodol.

Getting Up Nights Makes Many Feel Old
Do you feel older than you are or suffer from Getting Up Nights, Backache, Nervousness, Leg Pains, Dizziness, Swollen Ankles, Rheumatic Pains, Burning, Scanty or Frequent passages? If so, remember that your Kidneys are vital to your health and that these symptoms may be due to non-organic and non-systemic Kidney and Bladder troubles—in such cases CYSTEX (a physician's Doctor-to-Doctor prescription) usually gives prompt and joyous relief by helping the Kidneys flush out poisonous excess acids and wastes. You have everything to gain and nothing to lose in trying Cystex. An iron-clad guarantee wrapped around each package assures a refund of your money on return of empty package unless fully satisfied. Don't take chances on any Kidney medicine that is not guaranteed. Don't delay. Get Cystex (Siss-tex) from your druggist today. Only 35c. The guarantee protects you.
Cystex Helps Flush Kidneys

ONE A DAY
Each "One-A-Day" brand Vitamin A and D Tablet is equivalent in Vitamin A and D potency to one and one-half teaspoonfuls of Cod Liver Oil meeting minimum United States Pharmacopeial Standards.
A sufficient supply of these two important vitamins is as necessary for you as it is for the children.
YOU CAN INSURE adequate intake for you and your family by seeing to it that each member takes a "One-A-Day" Tablet every day.
A TABLET A DAY IS ALL YOU TAKE
Convenient, Economical, Pleasant-tasting. Made by the originators and makers of Alka-Seltzer.

NOTICE

Effective January 1st, 1943, the rate of interest paid on time and interest accounts will be 1% per annum, payable semi-annually on January and July first.

This rate is in conformity with the rules of the other banks in Allegany County and surrounding territory and is necessary during the National emergency and the period of reduced income from Government securities and other suitable bank investments.

Praise Farmers For Production Of Food

Agriculture met its obligations to the war effort fully and completely in 1942, by producing the largest supply of food crops and livestock products in the history of American farming, according to Dr. Edmund Ezra Day, president of Cornell University, and newly elected president of the Association of Land-Grant Colleges and Universities, and President T. O. Walton of Texas A. & M. College, chairman of the executive committee of the association.

Congratulations to the farmers of America are in order, for their magnificent achievement in food production during 1942, they said. At the same time they voiced their concern over the difficult problems facing agriculture for 1943 and pledged the full co-operation of the Land-Grant Colleges in meeting those problems.

"For this wonderful success much credit must be given not only to men and boys who often worked the equivalent of a 70 or 80 hour week but also to the farm wives who labored long hours in the fields and barns in addition to caring for the home and the families."

Difficulties in maintaining farm production in 1943 come with the greatly increased shortage of labor, the threat of shortages in farm equipment, and the ever present possibility of droughts and other unfavorable weather.

Look to 1943

Looking to the next crop year, Day and Walton said:

"The world's food supply, particularly the supply of food for this nation and its allies, is rapidly becoming one of the most important problems of the war.

"The nation's success in dealing with this problem will largely depend upon the skill and realism in applying to its solution the experience of practical farmers and the accumulated results of agricultural research.

"Only thru teamwork between the practical farmer and the agricultural scientist shall we be able to make the adjustments which are necessary for maximum production of food and fiber in the face of ever-mounting shortage of manpower, an insufficient supply of farm machinery, diminishing transportation, and the unavailability of many plant foods and spray materials on which the agriculture of the country has depended in the past.

"It becomes the mission of the Land-Grant Colleges in their research and thru their extension services to work more closely with practical farmers than ever before. It is their job to foresee as far as possible the adjustments which are ahead. It is their job to interpret fearlessly to the public and to those bureaus of the government which have to do with food supply, the true conditions under which food and fiber production is going forward.

"Only by such authentic representation are we likely to secure the adoption of those national policies which will protect our food supply."

AROUND OUR HOUSE

"Every garment in active service" is the slogan of homemakers who see the value of using the good materials in old or outworn materials. A round-up of outmoded clothes is a sensible part of a defense economy, according to the New York State College of Home Economics.

Some communities have organized clothing clinics where women learn how to repair and to care for clothing. In these clinics they can help each other with remodeling, renovating, and mending, and can exchange garments. Women skilled in certain jobs, like mending or making buttonholes can pass on how to extend the usefulness of their skill to others, or show them the fabrics on hand.

Many articles of clothing can be made from a man's outworn suit or overcoat: jackets, ski suits, dresses, skirts, slacks, a woman's suit, or a suit for a boy or girl. Small pieces of material can be used for tams, gloves or mittens, and handbags. A woman's coat might yield a dress, a girl's coat or skirt, or a child's snow suit.

Remodeling and use of fabrics on hand lessens the demands on the machinery of production, used for armed forces. Every garment of good material that is made over helps to win the war.

Wife: "Some of the men whom I refused when I married you are richer than you are now."
Husband: "That's why."

BIRTHS

Nov. 18.—To Mr. and Mrs. Carl Schneider of Friendship, a son.

Nov. 20.—To Mr. and Mrs. Delbert LaFever of West Clarksville, a son.

Nov. 19.—To Mr. and Mrs. George Eaton of Bolivar, a son.

Nov. 26. — To Mr. and Mrs. George Goff of Bolivar, a son.

Nov. 26.—To Mr. and Mrs. Winifred Senger of Wellsville, a daughter.

Nov. 29.—To Mr. and Mrs. Karl Rogers of Scio, a daughter.

Nov. 29.—To Mr. and Mrs. Lawrence Mansfield of Wellsville, a son.

Nov. 29.—To Mr. and Mrs. Milford Robinson of Wellsville, a son.

Dec. 1.—To Mr. and Mrs. Bernard Colebert of Wellsville, a daughter.

MARRIAGES

Nov 18.—Miss Lola Webster of Ceres and Gerald L. Robbins of Bolivaar.

No. 21.—Miss Margaret Middaugh and Gaylord Austin Ph. M. 2 c, both of Friendship.

Nov. 18.—Miss Maggie M. Eymer of Belmont and Harry Pendleton of Wellsville.

Nov. 26.—Miss Ruth MacAlpine of Bolivar and Frances Watters of Syracuse.

Nov. 26.—Miss June Cook and William J. Carpenter, both of Wellsville.

DEATHS

Mrs. Jeanette Clark, 92, former Wellsville resident, at the home of her daughter in Rochester, Nov. 30.

Fred Pero, 78, of Cuba, Nov. 20. Three brothers, one of whom, Rev. W. C. Pero was a recent pastor of the Andover Methodist church, and a sister survive.

Millis L. Fox, 92, of Canéodea, Nov. 19. A son survives.

Lee Bessy, 63, of Wellsville, Nov. 24. A sister survives.

Arthur Bierman, 64, of Stanards, Nov. 26. His wife and a son survive.

Paul D. Shine, 36, of Wellsville, Nov. 28. His father, five sisters and four brothers survive.

6—What city is southernmost in the U. S.?

7—What African town is named for an American President?

8—What country is the Holy Land of three religions?

9—What insects make paper?

10—Where can you find water five times as salty as the ocean?

Hm!

The visitor going around the penal establishment came upon a celebrated convict making sacks.

"Good afternoon," said the visitor. "Sewing?"

"No," was the reply. "Reaping."

IT NEVER FAILS
