Butter Set-Aside Increased For April, May

The War Food Administration has fixed the butter set-aside quota (amount of butter put aside for government purchase) for April at 40 per cent of production, and for May at 55 per cent of production. Previously, during February and March, the set-aside percentages were 20 and 25 per cent, respectively.

Efforts are being made to maintain butter production and to keep the available civilian supplies flowing into trade channels on a fairly even monthly basis. During April and May quantities of creamery butter for civilians will be about 80,000,000 pounds as compared with an average of about 82,000,000 pounds during February and March.

WITH THE FIFTH ARMY, ITALY—Pvt. William F. Marvin, cannoneer, son of Mrs. Myrtle Reinard of Andover, is a member of the 910th Field Artillery Battalion, which recently has been throwing 105-millimeter punches from its howitzers at Germans defending the last ridges before the Po Valley in Italy.

The 910th, which recently fought through its 209th combat day as a unit of the Fifth Army, fired 7400 shells at the Gustav Line in the first 24 hours of the offensive launched last May, decimated a force of 100 German infantrymen digging in along the Arno River, pumped 24,000 rounds of fire into the Gothic Line in ten days, effectively shelled enemy troops only 75 yards from the battalion's observer and so thoroughly shattered an enemy strongpoint near the present front that friendly infantry were able to take the position without sustaining a casualty.

The 910th, a unit of the 85th "Custer" Division, normally is teamed up with the 339th "Polar Bear" Regiment.

The battalion came overseas in January, 1944, landed in North Africa and joined the Fifth Army in Italy in March.

No Restriction on Rotenone Content of 1945 Insecticides

Rotenone supplies for the current crop year (October 1944 thru September 1945) will be approximately the same as for the previous year, WPB says. Shipping facilities for importing the unprocessed rotenone from South America will constitute a problem. However, supplies of rotenone for essential commercial, farm, home and victory garden insecticide requirements are expected to be favorable, according to WPB.
