A delicious tureen dinner was enjoyed by all.

This paragraph in "The Civic Bulletin" quoted from the Brewers Journal of Feb. 15, 1944, p. 13. makes a little cheer of light onto a very dark picture of the spree of intemperance sweeping our country. "The shadow of prohibition is to some extent obscuring the sunlight of legalized production and distribution of alcoholic beverages. This is evidenced by the gain in local option elections won by the advocates of prohibition. As pennies add up to dollars, so local option dry gains develop into country-wide, then state-wide dry victories, and all ultimately adds up to national prohibition.

According to the American Issue, the states constituting the "real South" sometimes by sneering atheists and west called "the Bible Belt" would vote dry today if given state-wide elections with the possible exceptions of Florida and Louisiana.

Mr. Miller, the editor and publisher of the Civic Bulletin quotes a wet politician of New York State as follows:

"Dr. Miller, prohibition is on its way back, not so much because of what you dry reformers are doing, but because of what the liquor men themselves are doing. The greedy hoggish liquor men are making prohibition sentiment faster than all your temperance organizations, and for that reason many persons who were formerly wet, when they get another chance to vote on the liquor question will vote dry, and when the nation goes dry again it will stay dry for a long, long time."

Catholic Charities Plan School Building Program

Buffalo Feb. 4.—A ten million dollar Catholic High School Building Program was launched yesterday when the Most Rev. John Francis O'Hara, C. S. C., Bishop of Buffalo, outlined plans before two hundred and fifty parish chairmen representing eight counties of Western New York, in the Hotel Lafayette. Funds for the High School Program will be raised over a period of ten years, through the medium of the annual Catholic Charities Appeal, matched by local parish contributions.

The program, which is the most ambitious undertaking ever contemplated by the Diocese of Buffalo, envisions High schools having a minimum capacity of 400 students, and a maximum capacity of 1,000.

This Capital Fund will amount to approximately five million dollars at the end of ten years. A like amount will be raised by parish groups within the radius to be served by the new schools.

Maximum tuition in the new schools will be $50.00 yearly, and operating deficits will be met by local parishes with some assistance from Central Funds. Location of the new schools will be determined by the pastors and lay groups of local parishes, who will unite to form a High School District. At present it is thought that fifty per cent of the construction and operating costs will be met by the Central Fund, with the remaining 50 per cent by the parishes in the District.

The campaign will meet Catholic Charities budget needs first. Everything over and above subscribed to the Charities will be allocated to the second Cause, which will be known as the Diocesan Fund. From the Diocesan Fund, 80% of the over-subscription will be allocated to the Central Fund for Education, and 20% to carry on the Diocesan projects which were formerly supported by what became known as the Bishop's Fund for the Faith

Scratches, slight burns, white spots and general dullness on varnished and painted surfaces may be reduced or removed by materials commonly found in the home. This is explained in Cornell bulletin E-685, "How to Repair Wood Finishes," which is available free to New York residents who write the Mailing Room, Roberts Hall, Ithaca, N. Y.

Lengths of runways at Army air fields are determined in exact ratio to the altitude of the air field. The higher the altitude above sea level, the more rarified becomes the air with lessened lifting power for planes.
