The cold winter is rapidly approaching. You will need those broken windows repaired. You will find the size you need at D. B. Spaulding's, for he can furnish anything from 6x8 to 24x48.

Geo. L. Tucker, Jr. received a despatch from Levaan last Friday stating that a son was born to him that morning. Mr. Tucker leaves for there in a few days to get acquainted with the little fellow.—Belmont Dispatch.

James Hammond raised a pumpkin that weighs sixty-two pounds. He ought to take it to the world's fair, or bring the fair to see the pumpkin.

Dennie Doran brought us an ear of corn the other day containing about half-a-dozen different kinds of corn. The colors range from jet black to white.

Some have the idea that the Wall Papers on sale at D. B. Spaulding's at cost, with borders thrown in, are all old stock. Those who have examined them think differently. You will find the newest designs and tints. These are rapidly disappearing. Come and examine; you will find just what you want.

I will have my cider mill in operation on and after November 1st.

C. L. UPDYKE.

A movement is on foot to form a county publishers' association. It is high time such an association was formed, and the publishers of the county should all join. The Cuba Patriot last week asked to hear from the different county papers on the subject. You may put the News down as heartily in favor of the project.

On November 1st the firm of C. E. Brown & Son, dealers in General Merchandise, at Independence, will adopt the cash system of trade, having decided that their customers as well as themselves will receive benefits that could not exist under the credit system. This firm handles large quantities of various lines of merchandise, and the members of the firm always strive to give their customers the best possible bargains. They take all kinds of country produce in exchange for goods.

The Michigan Stove Company has sent us a neat pocket match safe made of Aluminum, the new metal which is just now attracting so much attention. Aluminum is lighter than wood and stronger than steel. The Michigan Stove Company, manufacturers of the renowned "Garland" Stoves and ranges, are now using Aluminum in their stove castings, and are the only firm using it for this purpose. The mixture makes strong castings, prevents cracking and is a benefit to the iron in every way. An increased demand for "Garland" stoves and ranges is sure to be the result. Mr. E. J. Atwood sells these goods in Andover, and we think the claims made for the high quality of the goods are worth investigating by those who need new stoves.

A GOOD OIL WELL.

The Hyland Well the Best Yet Drilled in this Territory.

The Mutual Company's latest well on the Hyland farm, two and one-half miles south-east of this village, continues to show large quantities of oil, and flows occasionally, although the pressure of gas is not strong enough to give entirely satisfactory results in this respect. A 250-barrel tank has been placed near the well and the oil is now being saved. This well is without doubt the best producer of oil that has been drilled in this territory, and is what is termed a good paying well.

The Mutual company's drilling well on the Flynn farm in Greenwood is down over 400 feet.

Why Not?

will be paid for a recipe enabling us to make WOLFF'S ACME BLACKING at such a price that the retailer can profitably sell it at 10c a bottle. At present the retail price is 20c.

This offer is open until January 1st, 1892. For particulars address the undersigned.

ACME BLACKING is made of pure alcohol, other liquid dressings are made of water. Water costs nothing. Alcohol is dear. Who can show us how to make it without alcohol so that we can make ACME BLACKING as cheap as water dressing, or put it in fancy packages like many of the water dressings, and then charge for the outside appearance instead of charging for the contents of the bottle?
