In the shadow of the perfect security in which Leland had placed her, Clara Denon could not but be pleased in the company of the most distinguished man she had ever met, and who had, like herself, the taste for art, music and high culture. Thus these innocent relations with a young man whose reputation was rather equivocal could not tat awaken in the heart of Clara a sentiment, or rather an illusion, which the most pradish could not condem.

Libettines offer to vulgar women an attraction which surprises, but which prings from a very blamable curiosity. To a woman of society they offer another, more noble yet not less dan erous—it is the attraction of reforming them. It is fare that virtuous women do not fall into the error of believing that it is for virtue's sake alone they love them.

Buch in brief, were the secret sympathies whose slight tendrils intertwined, blessomed and flowered little by little in this soul, as tender as it was pure.

Warren Leland vaguely foresaw all this; that which he had not foreseen was that he himself would be sought in his own sare, and would be sincered in the roles. fected By the Ford Disaster.

WASHINGTON, June 19.—Prof. T. C. Mendenhall, of the Coast and Geodetic Survey, on the part of the United States,

Mendenhall, of the Coast and Geodetic Survey, on the part of the United States, and Commissioner King on the part of Great Britain, will shortly leave Washington to determine the vexed question as to which country is the legal owner of Pope's Folly Island, near the waters of the boundary line between the United States and Canada off the coast of Maine. The possession of this island has been in dispute for the the last cantury, but is now in a fair way to settlement. The discovery has just been made by Prof. Mendenhall that the first chart issued by Great Britain, showing the boundary lines between the United States and Canaday, gives the former country the island, but a subsequent chart includer at in Canadian territory. The island is not so valuable in time of peace, but in case of war would be a decaded edvantage to the country possessing it.

In view of his latest discovery, that the island, according to the chart of Great Britain, was concepted to the United States, the professor believes that he will have no trouble in settling the vexed question in favor of the United States. With this questioned settled, the only important one pending between the United States and Great Britain is the determination and marking of the boundary line between Alaska and the British possession.

AUTO MOBILE TORPEDOES Naval Officers to Be Thoroughly In-structed in Their Use.

Washington, June 19.—Carrying out the auggestion made by Commodore Samp-son, Chief of the Naval Bureau of Ord-nance, the Acting Secretary of the Navy, has decided to cause all Naval officers who are likely to occupy executive positions aboard ship, to receive a course of instrction in the assembling and use of the

tion in the assembling and use of the Auto-Mobile torpedoes which will soon be supplied to such of the vessels of the new Navy as are equipped for their use. In view of the limited accommodations of the inspection stations and the needs of the service, the details will be made up of only six officers at one time and each detail will spend ten days in the vicinity of the torpedo station at Newport.

Two or three days of this time will be spent at the attation proper in receiving instruction in assembling the mechanism of the torpedoes, two or three days will be spent at Riverton in experiments with the Howell torpedo and two or three days at Peconia iff instruction in the use of the Whitehead torpedo.

As soon as the detail of officers have undergone a ten days' course, they will be relieved by another detail and this order will be kept up until the uninior officers of tho Navy ate thoroughly familiar with the manipulation of this weapon.

Home Rula Prospects Bright. London, June 18.—The members of the Irish Parliamentary party have become so incensed at the tactics employed by the op-position to delay the Home Rule bill that the government must now face open re volt by the Irish members or expedite the bill and cease accepting offensive opposit-

bill and cease accepting offensive opposition amendments.

It may be pointed out that the obstructive policy followed by the Conservatives and Liberal Unionists is identical with that followed by the Irishmen when they were in opposition, and that the then government found the policy of obstruction equally as aggravating as the Irish members now find it. Murmuring of discontent have been heard during the past week, while debate on several clauses of the bill was going on and since the opposition propose to take. up more valuable time in debate during the coming week the Irish members think it time for the government to call, a halt in the consideration and to push the bill to its flual passage.
