

W. C. FU.

The Woman's Christian Temperance Union of Andover meets the third Thursday in each month.

The following protest speaks for itself: "I, Ellen F. Adams, of 45 Oxford St., Cambridge, Mass., in casting my vote for school committee, do hereby protest against the unjust discrimination by which, on account of my sex, I am debarred from a voice in the choice of other municipal officers, and from registering my convictions in favor of no-license."

On Feb. 14, Mrs. Amelia Frost, of Littleton, Mass., was ordained to the Congregational ministry. It is said that this is the first time that a woman has been ordained a preacher in the Congregational church in this State.

There were 21 members in the examining council and Mrs. Frost was subjected to a general and rigorous questioning. But she gave satisfactory answers to the most intricate and abstract questions. One gentleman asked Mrs. Frost: "Does the Bible point to women's preaching?" "Apparently so in my case," was the reply.

"But," said the questioner, "I had hoped you would answer by some quotation from the Bible."

Instantly Mrs. Frost replied: "Your sons and daughters shall prophesy."

There was a tremendous applause, and any spirit of opposition to the ordination ended here.

PRINTING BY TELEGRAPH.

Messages Transferred to Paper from the Wires at Any Distance.

The printing telegraph, though a device of comparatively recent development, has been the subject of ceaseless investigation, and practical workers in electricity have directed their whole attention, in some instances, to the transmission of messages and the recording of them in plain Roman characters. A very complimentary notice to a new system has recently appeared in various electrical papers as the most perfect and seemingly only practical system known.

Its advantages are simply those of an electrical typewriter, by means of which the message is printed by the presence of the transmitting operator in page form, and a duplicate of the same printed at all the receiving stations on the line, whether it be a long or short circuit. The benefit of such an apparatus to the press is large and can be readily seen, especially for the distribution of current news in the various news paper offices. A single transmission prints it simultaneously, in page form, ready for the compositor's case in all the newspaper offices of many cities.

It is said to differ materially from every other known means of telegraphy in one essential particular. In it the impulses move the instruments, whereas in other systems the instruments move the impulses—that is to say, the transmitter of the message is caused to run by a separate power. No combination of electrical impulses or currents is employed. An even succession of dots or impulses, which operate the polarized relay armature of the receiving station, places the revolving type wheel in the required position, when the local mechanism causes the letter to be printed.

The apparent impossibility of transmitting printed characters 50 or 1,000 miles over a single wire at once presents itself to the mind, and it is overcome in this system. It is ascertained, in a very simple way. Each letter of the alphabet is represented by a certain number of impulses, which revolve the type wheel to the required position, when the letters are struck by the local matter. Fourteen impulses represent the entire alphabet, making a complete revolution of the type wheel, which may be turned 200 revolutions per minute, thus securing very rapid printing. Its advantage also is that of absolute secrecy as a means of communication. The advantage of the printing telegraph for the transmission of news to news paper offices is unquestionably a subject commanding attention on the part of progressive proprietors. —Paper and Press.

Cure for a Felon.
There is no more painful affliction than a felon.—It and the toothache have a close race for supremacy. A very easy way to cure a felon is to mix equal parts of strong ammonia and water, and hold your finger in it for fifteen minutes. After that withdraw it and tie a piece of cloth completely saturated with the mixture around the felon and keep it there until dry. —New York Journal.

Young Choteau—So you think these shirts will wear well, do you?
Enthusiastic Clerk—Yes, sir; they will wear for months and months.
Choteau—Then I will take just one—Clothes and Furnisher.
