### A Dog's Cute Trick.

At the last meeting of the Society for the Study of Comparative Psychology, Mr. Anderson gave some of his personal experiences in connection with the lower animals, among others a rather interesting one concerning a dog in his possession. The dog had conceived a great liking for one of the members of the household, and nothing pleased him better than being allowed to rest at the door of his room. The room was situated at the end of a hallway, which was covered by oilcloth, consequently any person immediately below could hear the dog when his claws came in contact with the glazed surface. One day the dog, as usual, had taken up his place at the bedroom door, but was sent down stairs. In a little while he was heard again crossing the oilcloth up stair. Before removing he was this time given a good scolding, and it was easily seen from his looks that he was ashamed of himself. One of the members of the household went into an opposite room, leaving the door slightly open, and awaited developments. In a short time the dog was seen approaching, walking with a peculiar gait; the whole weight of his body was placed on the ball of his foot, and it was impossible to hear his claws touch the oilcloth. Have we not got here a perfect case of reasoning, somewhat as follows: "If I can only succeed in massine this oilcloth. # Wild Ponies of Sable Island.

Sable Island is famous throughout the Canadian maritime provinces for its race of wild ponies. The little creatures were originally placed upon the island in order that they might furnish food for shipwrecked mariners frequently cast away there. The coarse salt grass of the island is cured and stacked in summer time, and upon this the ponies feed all winter. It is said that they eat their way deep into the stacks and thus find their only shelter from the storms. There is a tradition current that they even eat fish cast upon the shore. Considerable droves of the ponies are taken to the mainland in early autumn and they are sold in the Halfax market.—[Chicago Herald. Sable Island is famous throughout
