INCITED TO RIOT.

Huns Claim to Have Been Led Into the Strike.

BUSINESS SITUATION

The General Trade Outlook Fairly Encouraging.

New England Shoe Factories Running on Part Time—Favorable Reports From Philadelphia and Pittsburgh—Bank Clearings for the Week Were \$950,000,000.

NEW YORK, April 7.—Special telegrams received by Bradstreet this week from important distributing centers report general trade quite irregular, previous gains having been followed by shrinkages in many instances.

Baltimore jobbers have been pleasantly disappointed by the unexpected freedom with which North Carolina and Virginia merchants have made purchases, sales of dry goods, millinery and notions having been heavier than anticipated.

The industrial feature of the week is found in thirty-one strikes throughout the country, involving 40,000 employees, principally among building trades at New York and Chicago, textile industries at Paterson and New York, coal miners and coke operatives in western Pennsylvania and further west.

Bank clearings this week aggregate about \$950,000,000, 28 per cent. less than in the like week last year. Further advances in wheat are due to scares based on fears of crop damage.

The delay of expected revival in trade at Cincinnati, Cleveland, Detroit and Louisville has had a depressing influence and is aided by unseasonable weather; but business is reported fair at Indianapolis, and the expectation is for a good spring trade.
