An Impression

On a blotter is a queer affair. Take pen, ink, paper and sit down to a table and write a letter. Take a clean blotter carefully blot the letter, stand in front of a looking glass and hold your blotter so you can read it, and you'll see a perfect impression of your letter. While you stand in front of the glass, see if you don't get another impression—an impression that your coat is shabby, or your collar a frayed rag, or your pants decorated with a fringe lambrequin, or your tie worn off, or something wrong somewhere that a trip down here with a small bit of cash will readily remedy. Of course your underwear will be out of sight in front of the glass, but you can tell whether it's good enough or not to last the year out.

The Law Compels You to Wear Pants.

DYNAMITERS AT WORK.

There's Nothing New Under the Sun, but this Experience is New to Andover People.

Nihilists and anarchists have startled the people by their bold plots and wicked deeds in various parts of the world, but it has never been expected that the deadly dynamite would be used with evil intent in so quiet and peaceable a village as Andover. However, it is the unexpected that always happens, and this place has had an experience during the past week which goes to prove the truth of the adage.

Last Thursday morning, shortly before three o'clock, many people in this place were awakened by a loud report, which indicated that an explosion of some powerful substance had taken place, apparently in the heart of the village. Those who heard the report attributed it to various causes, from the discharge of a cannon to the blowing open of some safe. In fact almost every possible conclusion was arrived at except the right one. A few citizens hastily dressed and appeared on the streets in search of the cause of the disturbance, but nothing suspicious was seen.

In the morning it was learned that the explosion occurred under the large building on First street owned by Charles Cochrane, and used by him as a store-house. The explosive substance had been placed under the building and the concussion tore up the floor and splintered things generally, but no great amount of damage was done.

The same day a stick of unexploded dynamite was found at the new house owned by L. C. VanFleet on the hill east of the village. It had been placed on the frame of a cellar window, outside of the glass. The theory which was arrived at respecting this, (and doubtless the correct one) was that the dynamite had been put there with the intention of doing damage, but that the cap had failed to explode the charge. There were evidences that a fuse had been lighted.

It was also ascertained that Tuesday night a charge of dynamite had been exploded under the barn owned by H. P. Bundy, who lives over a mile north of this village. Some damage had been done to the timbers of the barn, but, as in the case of Mr. Cochrane's store house, the damage was slight. Mr. Bundy had kept the matter quiet, and the fact that he had been visited by dynamiters was known only to a few persons until after the other facts related above had become current. It is needless to say that much excitement was created by this unlooked for breach of the peace, and many guesses were made as to who the parties might be, without, however, any evidence on which to base an opinion. Of course a constant lookout is kept for evidence which shall lead to the apprehension of the guilty parties, but as yet no arrests have been made.

Sent to Jail for Selling Liquor.

D. Daily, who was arrested for violation of the excise law, last Saturday appeared before Justice H. P. Bundy and pleaded guilty to the charge. The Justice sentenced him to six months in the county jail, and Deputy Sheriff Slocum took him to Belmont the same day, where he was met by the Sheriff and taken to Angelica to serve out his sentence.

Supervisors' Doings.

At the session of the Board of Supervisors last week a resolution was adopted instructing the District Attorney to collect from the towns having license all the excise money received since 1891, and that the same be paid into the county treasury. It seems there is a conflict in two laws relating to the use to be made of excise money, one law providing that it may be used in the town where collected, the other law providing that it shall go to the county. The town of Wellsville is interested in this matter to the extent of about \$2,100, and it is said several towns where license money has been collected will contest the matter. Andover collected in the neighborhood of \$300 for license in 1892, and under the resolution adopted by the Board this town will be called upon to turn that amount into the county treasury.

The Board adopted a resolution abolishing the office of Keeper of the County House, and making the salary of the Superintendent of the Poor \$1,000 a year, with \$500 additional for expenses. This new arrangement to take place Jan. 1, 1895. There was quite a difference of opinion among the Supervisors as to the advisability of passing this resolution, and the vote stood 15 to 12.

Friday the Jail Building Committee, Henry A. Holden, T. N. Boyd and M. E. Horner, made a report. The report was accepted, the jail building approved, and a resolution passed laying a tax of \$15,000 on the county. The Clerk was instructed to draw an order in favor of the Van Dorn Iron Works Co., for \$14,800. The new jail will not be occupied until the first of next January.
