We publish this week a synopsis of the Raines bill, which it is expected will become a law within a few days. There is a great difference of opinion as to the merits of the bill, but it is conceded by all that its provisions are very strict and that it will cut down the number of saloons now in existence. The penalties for violation are high and doubtless a person will think twice before wilfully violating any of the provisions. Probably it will take a more or less extended trial of the measure to enable the public to give an intelligent opinion as to its merits. In the meantime, it strikes us that there are more good points than bad ones in the bill, and that it will, if properly enforced, materially decrease, if not wholly abolish, the illegal sale of liquor, and also that the baneful results of legal selling will be greatly lessened.
