Herrick Johnson, of Chicago, save "Low license asks for your son, high license for your daughter."

A teacher was giving a lesson on the effect of tobacco to a class of boys and she noticed that they were unre inced by her statement. Finally one small boy said, doggedly, "If we have a toothache, we have to use tabacco to stop the pain;" and all the other boys gave a ready assent to this state-ment. The teacher was puzzled for a moment and then she said, "Tom my, if your sister has a toothache do you think it would be necessary for her to use bobacce?" and the prompt reply was, "Oh no: she ought to go to the dentist." The watch word of the W. C. T. U. is, "A white life for two," and the more clearly our boys learn that what is degrading for their sisters is degrading to them as well. sisters is degrading to them as well, the better hope there will be for the coming generation.

Druggist F. W. Cole, of Fillmore, has in his store a wooden image, about one foot in height, supposed to be some centuries, if not indeed thousands of years, old. It was stolen from some heathen temple in India by a sea captain and given to the late Dr. Andrew Smith, while he was in New York assisting his brother, Dr. William M. Smith, while health officer of the port. It is a very strange looking affair, and supposed to have been an object of worship.

A remarkable discovery, which it is said, bids fair to revolutionize the oil Joseph Bahney of Olean. It is a chemical process of treating the crude petro-leum which neutralizes the gases and renders it absolutely fire proof up to a emperature of at least 150 degrees Petroleum treated by this process is claimed to be free from liability to ex-plode, and it will doubtless also make it necessary for the servant girl to get her kindling wood somewhere else than from the oil can.
