GERMAN SOCIALISTS

Suitable Halls in Gotha Denied Them for Their Congress.

TO MEET AT SIEBLICHEN ON OCT. 11

Emperor William's Brewing Ministerial Crisis—German Catholics Warned Against Emigrating to the United States.

Berlin, Aug. 31.—It is now announced that the annual congress of the German socialists will be convened at Sieblichen, near Gotha, on Oct. 11. It was originally intended to hold the congress in the city of Gotha, but this was found impossible, for the reason that the executive committee of the socialists were refused the occupancy of any hall in that city capable of containing the number of persons who would be present as delegates.

The temporary silence of the German newspapers in regard to the ministerial crisis does not imply that the emperor has arranged with Prince Hohenlohe that the latter shall retain the chancellorship, nor does the announcement of the Reichsanzeiger, the official gazette, that a bill for the reform of the military judicial procedure is to be considered by the bundesrath, avert the resignation of the chancellor or remove the probability of a conflict between the kaiser and the reichstag.

There are court whispers that the Empress Frederick has written to the kaiser rebuking him for ignoring the visit to Germany of the Duke and Duchess of Sparta, the latter the emperor's sister, who have recently been staying with the latter's mother, Empress Frederick at Kronberg.

INTEREST TO THE FARMERS.

Cholera—Beekeeping for the Farmer.

BECKKEEPING

My observation is that one never thing he does nor man or woman who has bees had better let them alone. It seems to me a few stands of bees had to buy a new and did not get any fit derived from the includes politicians raged hotly as to fruit blossoms were better than any doubtless winter honey is a secondarily. In any event get dusty bees. It generally accepted will not do to rely on occupation unless connection with some farmer who likes to have an excellent carefully managed, as well as a promoter I say get two bees from some other in an eight coveiled hive, get a book on apiculture respect, experienced quite as negligent is, in furnishing shades has been conclusive onies in shade don't make the most of farmer.

MARKING OF PEARS.

Some varieties of pears are now subject to cracking of the fruit soon after turning black. The value of the fruit is sometimes cut off, but the fruit lacks the fine quality of the skin had the White Doyenne pear. The White Doyenne pear also under its old-fashioned name, is most subject to cracking. Its growing has been discontinued in some sections. But the disease is a scourge with Bordeaux and has been found a preventive. The cracking begins about the time the fruit is beginning to ripen. It may be a deficiency of potash in the fruit seeds and ripen. Many fungus diseases are due to this cause, and a liberal supply of potash to prevent them is the best remedy. But wherever the present it should be detected by the Bordeaux mixture, and then liberally supplied with potash to prevent its recurrence.

HOW WHEN FEED FOWL.

Birds in their food slowly and as it is well that fowls eat some way. It is to have food before they give, excepting soft food given in troughs, if their grain ration leaves, or in light so animal and green they can pick at them they want at leisure. The V-shaped trough fencing is all the necessary to feed lumber it can be clean.

As to when to feed.

Some claim that a bird should be fed three times a day, that twice a day classes admit that it is best before roosting. Chickens ought to be fed two hours at first. Feedings may be left are three months old, adults it is about three times there is overfeeding than will especially if on the ration is really more underfeeding, as the chance to more or less short feed. To feed amount is more number of times at given.

Feed a variety of grain and animal food.

Because this is the small flock is kept table scraps, account "best egg records" a small number of hundreds in theory it is increased just as most cases this does because the same variety is given. There answer to what shall is out of rations. Fe least utility, quality of two elements open up the ingenuity, though of the feeder.—Farm side.

FARM AND GARDEN.

There is a growing bred stock. It is best to have the best. On cultivated farms land is dear. It is more able to grow lambs or mutton.

A plantation of pine of the farm as will make a shade for the flock be invaluable.

Good grade stock and is of superior quality price for the farm feed the breeding and feed.

Colonel Woods says, and the "low" the must trust primarily through any and all. It does not pay to off the farm when it the price in commerce reduce the fertility of feed the crops to stock.
