The Pill that Will.

"The pill that will," implies the pills that won't. Their name is legion. The name of "the pill that will" is Ayer's Cathartic Pill. It is a pill to rely on. Properly used it will cure constipation, biliousness, sick headache, and the other ills that result from torpid liver. Ayer's pills are not designed to spur the liver into a momentary activity, leaving it in yet more incapable condition after the immediate effect is past. They are compounded with the purpose of toning up the entire system, removing the obstructing conditions, and putting the liver into proper relations with the rest of the organs for natural co-operation. The record of Ayer's Pills during the half century they have been in public use establishes their great and permanent value in all liver affections.

Ayer's Cathartic Pills.
