Why Do Women Have the Blues More Than Men?

Are not women naturally as light-hearted, brave, and hope-.ful as men?

Yes; but woman's organism is different from man's.

Women in perfect or good health are rarely victims of this symptom.

Women nearly monopolize the blues, because their peculiar ailments promote them.

When the female organs fail to perform their functions properly, when the dreaded female complaints appear, there is shown nervousness, sleeplessness, faintness, backache, headache, bearing down pains, etc., causing the dreaded "let-me-alone" and "all-gone 'feelings.

When the woman does not understand what the matter is, and her doctor can not or will not tell her, she grows morose and melancholy; that's the blues.

"I am happy to say your Vegetable Compound has cured me.

"My suffering every month was dreadful. The doctor gave me morphine to ease the pain, but nothing to cure me; and I was obliged to spend two or three days in bed. Now I have no pain at all.

"I can work harder, and be on my feet longer, than I have for years. I cannot praise your medicine enough: I am glad to tell every one that I was cured by Lydia E Pinkham's Vegetable Compound. Our druggist says there is a great demand for your medicine here."

Mrs. Newton Cobb, Manchester, Ohio.
