James R. Francisco, who died in Fremont, Ohio, the other day, was one of the oldest engineers in this country. He ran the John Bull engine which was brought from England in 1836 and was put on the Camden and Amboy Bailway to take the place of horses that had formerly hauled the cars. That famous engine was exhibited at the World's Fair.

H. Helm Clayton, the observer in charge of the Blue Hill (Mass.) Meteorological Observatory, and his - assistant, recently performed a novel feet above the ground at the rate of 47.7 miles an hour.
