To Ouré Female Ills—Some True Reasons Why Mrs. Pinkham is More Successful Than the Family Doctors.

A woman is sick; some disease peculiar to her her is fast developing in her system. She goes to her family physician and tells him a story, but not the whole story. She holdssomething back, loses her head,

becomes agitated, forgets what she wants to say, and finally conceals what she ought to have told, and thus completely

There Is a Class of Pospie

the doctor fails to cure the disease? Still, we cannot blame the woman, for it is very embarrassing to detail some of the symptoms of her suffering, even to her family physician.

It was for this reason that years ago Mrs. Lydia E. Pinkham, at Lynn, Mass., determined to step in and help her sex. Having had considerable experience in treating female ills with her Vegetable Compound, she en-

conraged the women of America to write to her for advice in regard to their complaints, and, being a woman, it was easy for her siling sisters to pour into her ears every detail of their suffering. In this way she was able to do for them what the physicians were unable

to do, simply because she had the proper information to work upon, and from the little group of women who sought her advice years ago a great army of her fellow-beings are to-day constantly applying for advice and relief, and the fact that more than one hundred thousand of them have been successfully treated by Mrs. Pinkham during the last year is indicative of the grand results which are produced by her unequaled experience and

No physician in the world has had such a training, or has such an amount of information at hand to assist in the treatment of all kinds of female illafrom the simplest local irritation to the most complicated diseases of the womb. This, therefore, is the reason why Mrs. Pinkham, in her laboratory Switzerland, though she spends only | breast and bow, which is, both grace- his head resting on his arms on the pliments galore for having killed one Lynn, Mass., is able to do more for the ailing-women of America than the great drum in front of him, down along of the biggest bears ever slain in the family physician. Any woman, therefore, is responsible for her own suffering In Burma, when a man meets a the whole length of the wagon to the Dead River region of Maine. The who will not take the trouble to write to Mrs. Pinkham for advice.

The testimonials which we are constantly publishing from grateful women establish beyond a doubt the power of Lydia E. Pinkham's Vegetable Compound to conquer female diseases.
