said the other day in our store that he had not seen so fine a stock of garments as ours outside of the largest cities.

Our success in this department is not accidental but is the result oi 18 years careful study of the requirements of our trade.

In view of the great diversity of styles shown, both in ladies and children's garments you need not be confronted on the street at almost every turn by a lady wearing a garment the exact counterpart of vour own. This is a point very much appreciated by most of our lady customers.

Cloak weather thus far has been scarce, nevertheless our trade has been quite steady and satisfactory. We expect a perfect avalanch in this department as soon as the real cold days begin,

Necessary alterations made in cloaks and suits while you wait.
