Reclamation of Arid Lands. mines at 10 a.m. to-morrow and go The annual reports both of the secre- down. tary of the interior and the secretary of agriculture touch upon the question | of irrigation, which is likely to receive ; attention at the hands of the present congress. According to the report of European trees, oak, horse-chestnut. Secretary Hitchcock, there are 914. etc., are just coming out; sheep shear-1 096,974 acres of public lands unreserv | ing is under way; in fact, it is like a ed and unappropriated, of which 367. New York May. 983,506 are in Alaska. Much of the remainder is arid land which requires l irrigation in order to become useful.

The secretary is a very earnest advecate of national aid to irrigation, de claring that there is no question of greater importance now before the peaple of the United States. He recom are known to be such that beneficiat results will follow. It is suggested that the following localities be considered first, surveys, plans and estimates ) having already been prepared:

of agriculture is in harmony with the of his death till after interment and secretary of the interior on this important question and in his report says: secure the largest development of western agri-

Second.-That reservoirs located in the channels the desert act and by requiring c tively few localities where homes can be made. By irrigation properly conducted these great arid tracts can i transferred into homesteads and flourishing communities, thus adding vastly
