ereasing the length of the electric sperk drawn from the clouds by means made to increase the lightning power from the clouds and upper air. New measurements are also to be made by Mr. Eddy from a base line and two angles of the height reached by the white thunderheads on a hot day. Mr. Eddy believes that the highest pinnacles of those clouds reach an altitude of over nine miles and that the masses consist of snow and ice even on the hottest day, as shown by self recording temperature balloons sent up at Berlin and Paris without The unscientific observer will doubtless wish Mr. Eddy much luck in his investigations and may also wonder
