#### Farmers Are Solidly

Against Taft's Election

They are doing nothing less than to give Mr. Roosevelt as a reference so to speak, for Mr. Taft.

The panic-stricken Taft Managers appreciate that the farmers trust Mr Roosevelt. The farmers know that Mr. Roosevelt is for seople gany County Endeavorers and things American before anybody or anything else. Therefore the Taft managers are striving to convince the famers that Mr. Rosse-Will be Held at Little Gen- velt approved Mr. Taft's Canadian reciprocity. They are sending circulars to the farmers. They are inserting ad-

> vertisements in the newspapers of the farming districts. In those eirculars and advertisements they are quoting a letter which Mr. Roosevelt once wrote Mr. Taft on the subject of Canadian reciprocity when i matter was an idea under consideration, not a fact worked out, The impression they seek to give the farmers and the argument they make to them is that if Mr. Roosevelt indorsed Mr. Taft's resiprocity, as they say he did, it was a good, not a bad measure. Mr. Taft therefore should not be treated by the farmers, they say, as if he

> had sought to do them harm. Because what he did was with Mr. Roosevelt's approval, they say the farmers should treat Mr. Taft as if he had striven to do them benefit. But that pleading of the Taft circulars and advertisements . [s cross misrepresentation. It is virtually bare-faced forgery.

Mr. Roosevelt never indorsed the reciprocity that Congress passedand President Taft signed. When, before anything had been done in the matter, the President mentioned the subject to the ex-President as a mere plan, Mr. Rocsevelt approved the general idea as it was intimaed to him by Mr. Taft. And the general idea suggested by Mr. Taft to Mr. Roosevelt was

reciprocity to treat all Americans fairly. The American farmer near the Canadian line was to get no more and he was to get no less from reciprocity than the American manufacturer. The American user of materials was to divide with the American producer of them share ard share alike. Nobedy in this country was to give up any more, measured ag-

country was to get more than was fair for him to get. Nobody was to le sacrificed. Nobody was to be favored over others. It was to be a square deal for everybody. That was the reciprocity idea approved by Mr. Roosevelt before the

ainst others, than was fair for him to give up. Nobody in this

measure was anything but a suggestion. But when Mr. Taft and his advisers got through with their work sprang it upon the American people as a specific act it was some thing entirely different from what had been submitted to Mr. Roosevelt as a general idea. It was putting the whole load on the farmers. It was making a goat of every American farmer near the Canadian line. It was trying to force him to sell in a Free Trade market. It was leaving him to buy in the same old Protection market. It was play-

manufacturing favorites. The manufacturers who had the ear of the Ways and Means Committee and of the President were taken care of just as before. Just as at the time of the Payne-Aldrich revision God save the mark!—the manufacturer was to buy cheap and to sell dear. But, handed over to the mercy of the Canadians, the American farmer along the Dominion border was to sell cheap and buy dear.

Mr. Taft worked out against the farmer as a fact Mr. Roosevelt did not approve. He has condemned it unsparingly. After what he has said against the reciprocity which Mr. Taft that Mr. Rooseveit ever tolerated or ever would tolerate such a measure

Only recklessly desperate as well as grossly unscrupulous politicians would try to get farmers' votes for Taft upon such fraudulent hood: Evangelism, Representa. But try as he will, Mr. Taft will not get those votes of the farmer on
