4.000 PEOPLE SAVED

When you read that the death ate for New York State dropped rom 15.0 in 1913 to 14.6/in 1914, it does not mean much; but when these figures are translated into ommon language they mean that

common tanguage they mean that 3950 lives were saved within the year, which means a great deal. Death rates are calculated as so many deaths for every thou-sand people, A death rate of 15.0 sand people. A death rate of 15.0 means that opt of every thousand people in the State fifteen died fusing the Acar, or out of every ten thousand people one hundred and fifty died, or out of the actual population of the State, which is nearly ten millions, nearly described by one hundred and fifty thoughts. which is nearly ten millions, nearly one hundred and fifty thout the state machines will lose their anland people died. A death rate of
14.6 means that out of every ten
housand people only one
hundred and forty-six died, and
the
difference between a rate of 15.0
und a rate of 14.6 corresponds to
undered of coeasions when they
and a very weak man in the doverto kaving of four lives in each ten

to a saving of 3960 lives.

The arithmetic is rathed dullbut that nearly 4,000 people are
alive and well who would be in
their graves if the death rate had been the sable in 1914 as in 1915
is something well worth thinking
of. All over the State, in city
und country, in store and factory, on the farms and in the
schools and in the cradles, are
men and women and children
and little babies, nearly 4100 or
them in aft, who owe their lives
and their happiness to this reduction in the death rate. They do
not know it. No one knows who
they are. You who are reading
this paper this minute may be one
of them.

Of course this reduction in the
death rate has not all been
complished by the State ad
local. Departments of Health.
There is a general improvemen
in living conditions which
contributes to it. There is a general
con

There is a general improvement in living conditions which contributes to it. There is a general advance in education and intelligence which contributes to it. The principal factor, however, is the application of the sciences of santitation and preventive medicine and hygiene; the improvement of water supplies and nilk supplies; the control of communicable discases, and above all, the teaching and preaching of the laws of healthy living a whigh is to-day one of the most important of all the duties of the Health Departing work its general principle has been in the proposal that have stood for the state wouldn't have stood for the teaching and preaching of the laws of healthy living a whigh is to-day one of the most important of all the duties of the Health Departing work its general principle has been supplied to the state wouldn't have stood for the state wouldn't have stood for

State within the Next Five Years With the support of the people this ideal can be attained.

2,500,000 MOTOR CARS IN 1916

That on January 1st, 1916, there will be two and one-half multion automobiles in the United States, appears a somewnat wite prediction, when it is considered that there are only about 600,000 automobiles in the whole world. outside of this country. Figures collected from the various states of the Union show that on Feb-ruary 1st, 1915, the number of registered cars exceed 1,900,000 and the growth in the last 13 months has been equal to not less than 600,000 per year. As the than occording the in-rate of increase during the in-dividual months has been much greater toward the end of 1914 than in the early part of that than in the early part of that year, it seems certain that fully continu 600,000 cars will be added be-tween February1st, and Decem-ber 31st, 1915.—Scientific Amer-

Alfred Grange and Almond Grange won Firsts in their re-spective classes. Andover Grange

made an excellent exhibit.

THE NEW STATE **CONSTITUTION-**

Is New York to Be a Short Ballot State?

In 1916 the voters of this state will go to the polls for the regular state election and will find on their ballots the names of candidates for Governor. Lleutenant-Govern Senato Assemblyman—and that's all so far

a saving of four lives in each ten thousand of the population or for the total population of 9.899,761 the total population of 9.899,761 to a saving of 3960 lives.

The arithmetic is rather dull—that nearly 4.000 people are alive and well who would be in alive and well who would be in the extent that the attention of the tothe extent that the attention of the other strength of the strength of th

cases, and above all, the teaching and preaching of the laws of healthy hving which is to-day one of the most important of all the duties of the Health Department.

While New York State may be congratulated on its death rate of 14-6 for 1914, the lowest recorded in its history; there is much yet to be done particularly outside of New York City. The rate for New York City has been for two years less than 14 per 1000 and that for the rest of the State is still over 15.

The New York State Department of Health will not be satisfied until the death rate outside of New York City is as low or lower than that for the crowded enty itself. Its motto is Public Health is Purchasable: 25,000 lives can be saved in New York State begins of the second of the people with the support of the people.

be proved to be, the big point is—will the Short Ballot take power from the people?

Woodrow Wilson, who founded the Short Ballot movement and is President of the National Short Ballot Organization, says: "I believe the Short Ballot have been been supported by the Ballot of the restoration of popular government in this country!" Instead of taking jower away from, it will restore power To the people, in his estimation. Roosevelt and Taft make similar statements (which indicates, by the way, now wholly non-partisan the movement is!) The whole Short Ballot philosophy it is—is based on the content on the to have a multitude of little elective offices is not as democratic as it looks but on the contrary actually is undemocratic. Their slogan is "The look ballot is the politicians" ballot, the short Ballot is the popules hallot."

[This is the first of, a series of nine ar-Short Ballot movement and is Presi dent of the National Short Ballot Or ganization, says: "I believe the Shor
