## ALL WE PAVE GREENWOOD STREET?

Proposition Will Come Up Again Tuesday, April 27—Many Reasons Why the Improvement Should Be Made.

One week from Tuesday, April 27, the taxpayers of the Village of Andover will be called upon to decide whether we are to pave Greenwood street from the corner line to Main street, or this Summer.

It is wise to pave the street all within the next ten years surely would be the wisest thing to do now, as the Board of Trustees have been given assurance that a much lower bid will be received for the work if it can be done right away before the machinery and tools of the Greenfield Construction Company are moved away from here, than would be possible otherwise.

Andover has four roads leading out of the village. Two of them are now paved. The Greenwood street road brings more people to the town than all the others together, and it has always been the poorest road.

Something will surely have to be done with the road, and the question is what. The proposition is placed squarely up to the taxpayers. Shall we put the road in permanently and do with it all at once or shall we continue on as we have for the past century expending annually more money on its maintenance than the interest on the money to put in a first class road would be, and then have a mighty poor piece of road for the bargain?

The cost to the village to pave Greenwood street will be about \$100,000. This added to the indebtedness outside of the village plant will leave us owing \$200,000, a mere trifle compared to the indebtedness of neighboring villages.

In order that the taxpayers vote more intelligently upon the proposition we submit a few facts.

The total amount it will cost the person whose assessed valuation is \$1,000.00 will be \$35.50, to spread over a period of twenty years. This includes, both principal and interest on the loan for the full period. The average yearly cost will be \$1.75. In the first years it will cost more than the last years less, as the interest decreases. If your assessment is higher or lower than \$1,000.00 the same proportion will prevail.

The cost of maintaining a good road, and the expense of taking the dirt from the pavement out from Greenwood street will be at least one-half as much as the total cost of the street in twenty years. So the cost of the pavement will not over \$18, or 50 cents a year per thousand dollars valuation. The increase in valuation of property in the village because of the facts that our streets are in good order, will further argue in favor of paving.
