## BANKERS URGED TO CO-OPERATE WITH FARMERS

ESSENTIAL MATERIAL HAS ENTERED  
THE BANK VAULTS OF  
THE NATION.

The Bank a Financial Power House  
to the Community.

By Peter Radford.

One of the greatest opportunities in the business life of the nation lies in practical co-operation of the country banks with the farmer in building agriculture and the adventure is laden with greater possibilities than any forward movement now before the American public.

A few bankers have loaned money to farmers at a low rate of interest, and oftentimes without compensation, to buy blooded livestock, build silos, fertilize the land, secure better seed, hold their products for a better market price, etc. The banker in contributing toward improving the grade of livestock; the quality of the seed and the fertility of the soil, plants in the agricultural life of the community a fountain of profit, that, like Tennyson's brook, runs on and on forever. Community Progress a Bank Asset.

The time was when money loaned on such a basis would severely test the sanity of the banker; such transactions would pain the directors like a blow in the face. A customer who would dare to cast bread upon waters that did not return buttered side up in time for annual dividends would have to give way to a more capable man. This does not necessarily mean that the bankers are getting any better or that the milk of human kindness is being imbibed more freely by our financiers. It indicates that the bankers are getting wiser, becoming more able financiers and the banking industry more competent. The vision of the builder is crowding out the spirit of the pawnbroker. A light has been turned on a new world of investment and no usurer ever received as large returns on the investment as these progressive bankers, who made loans to uplift industry. The bankers have always been liberal city builders, but they are now building agriculture.

A Dollar With a Soul.

It is refreshing in this strenuous commercial life to find so many dollars with souls. When a dollar is approached to perform a task that does not directly yield the highest rate of interest, we usually hear the rustle of the eagle's wings as it soars upward; when a dollar is requested to return at the option of the borrower it usually appeals to the Goddess of Liberty for its contractual rights; when a dollar is asked to expand in volume to suit the requirements of industry, it usually talks solemnly of its redeemer, but soul material has entered into the vaults of our banks and rate, time and volume have a new basis of reckoning in so far as the ability of some of the bankers permit them to co-operate in promoting the business of farming.

God Almighty's Noblemen.

These bankers are God Almighty's noblemen. Heaven lent earth the spirit of these men and the angels will help them roll in place the cornerstones of empires. They are not philanthropists; they are wise bankers. The spirit of the builder has given them a new vision, and wisdom has visited upon them business foresight.

The cackle of the hen, the low of kine and the rustle of growing crops echo in every bank vault in the nation and the shrewd banker knows that he can more effectively increase his deposits by putting blue blood in the veins of livestock; quality in the yield of the soil and value into agricultural products, than by business handshakes, overdrafts and gaudy calendars.

Taking the community into partnership with the bank, opening up a ledger account with progress, making thrift and enterprise stockholders and the prosperity of the country an asset to the bank, put behind it stability far more desirable than a letterhead bearing the names of all the distinguished citizens of the community. The bank is the financial power house of the community and blessed is the locality that has an up-to-date banker.

### POLITICAL PRAYER MEETINGS

It is a sad day for Christianity when the church bells call the communicants together for a political prayer meeting. Such gatherings mark the high tide of religious political fanaticism, put bitterness into the lives of men; fan the flames of class hatred and destroy Christian influence in the community. The spirit actuating such meetings is anarchistic, un-Christian and dangerous to both church and state.

The success of the nation is in the hands of the farmer.

Work for the best and the best will rise up and reward you.

Tenant farming is just one thing after another without a pay day.

### Streets of London.

There is not a single man living who knows all London, who has been through every street or into every crescent, square and terrace. This seems a hard saying, and it is one which visitors from abroad or the colonies find it impossible to believe, but nevertheless it is absolutely and incontrovertibly true. Let any one take a map of London and try to mark in red ink all the streets which he can honestly say he has visited and he will have to confess that he knows but little of the metropolis of the world and that the red-marked streets are but as nothing compared with those which he has had to leave untouched.—London Globe.

### An Injudicious Text.

A church was a considerable time without a pastor. A great number of persons of varied talents preached to them with a view to obtaining the post. A very ambitious young man was asked to supply them for a Sabbath. All went well until he gave out the text, "See that ye refuse not him that speaketh." Imagine the consternation the people experienced when he read out the text in a lofty and commanding manner. He was unaware of the feeling he created. The people did the opposite from the text. The young man was not called.

### A Cynical Clerk.

The office boy in a law office of this town himself hopes to be a lawyer some day. He has begun his studies already by asking questions of the clerks whenever he hears a legal term as to which he desires information.

The other day he approached one of the clerks with this question: "What do they mean by a contingent fee?"

"It's like this," explained the clerk. "If you lose the case your lawyer gets nothing. If you win you get nothing."—New York Times.

### The Fire Tree.

The fire tree, so called on account of its fiery red blossom, grows in the warmer parts of Asia and in the Philippine Islands. During the month of July the country is enlivened with scarlet foliage of the intensest description. The blossoms retain their color for about a month, when they fade away, and the fire tree is once more only a green leaved member of the mimosa family.
