XXIX, NO. 26.

FOR WEEK ENDING JUNE 25, 1915

TERMS: One Dollar the Year, Five Cents the Copy.

RY SWINGS TO SECOND PLACE

Team Secures a Lease on Place by Winning From Mill. South Hill Easy

Team of Knife Shop Boys

Town Team settled all the points about first place in the schedule, by winning the Silk Mill by a 15 to 0. This puts the team so far ahead that no team can catch her. The game was a good one up to the eighth inning, when the weakened and the Town team took charge of affairs for the rest of the game. The Silk Mill bases full several times and chances to score but didn't get a man across without breaking right.

South Hill and Cutlery was cut down to a seven game because of the late start. South Hill started with 2 scores in the first half just as if they were ahead. But the Cutlery team, being thirsty and following five runs across.

DAVID S. CLAIR

David S. Clair died at the home of his daughter, Mrs. Eli Gleason of Wellsville, Friday evening, June 18th. Mr. Clair was born in Andover July 9th, 1835, son of Paris Clair. He is survived by six children, one sister, Mrs. Fred Bissell of Inavale, and a brother, Chester Clair of Andover.

Interment was at the Yorks Corners cemetery.

HIGLEY-LANGWORTHY

A very pretty wedding occurred at the home of Mrs. A. W. Langworthy in East Valley, June 23rd, when her niece, Grace Witter Higley, was joined in bands matrimonial to Lynn L. Langworthy, of Alfred. The ring service was employed, and the ceremony which made the happy couple one was performed by Rev. W. L. Burdick of Alfred.

The bride was gowned in white and carried yellow and white roses, these colors also prevailing throughout, and the decorations were tastefully carried out. None but immediate relatives were present.

Mr. and Mrs. Langworthy will be at home to their friends at Winding Brook farm, after July 5th.

MORE PARAMOUNT PICTURE

The appreciation shown for Famous Actors in Famous Plays has caused Home Enterprises Co. to continue them next week. On Wednesday evening, June 30th, Max Egan will be seen in his great Broadway Success "What's His Name." George Barr McCutcheon's rollicking comedy in five acts.

Of course everybody is going to see Maelyn Arbuckle in "The County Chairman" tomorrow (Saturday) night.

Last week to buy Millinery below cost at the McManus Millinery.

Summary

Stolen Bases: Robinson, C. Forness, Emery 2, Scott 2, D. Williams 4, W. Farley, R. Williams 3, Kaufman 5, Lauterborn 3, Hibbard 4, J. Farley 2, Witter 3. Home Runs; Kaufman. Two Base Hits; F. Emery, Lauterborn. Struckout by Truelove 6, by D. Forness 7, by J. Forness 1. Base on Balls: off Truelove 1, off D. Forness 4, off J. Forness 2.

Hit by Pitched Ball: Forness (Hibbard, Kaufman).

Umpires: Brainard, Bassett. Standing of the League

	W.	L.	PC.
Town Team	6	1	857
Cutlery	4	4	500
Silk Mill	2	4	333-1-3
South Hill	2	5	286

Next Saturday is the last of this part of the League. The Cutlery is going to cross bats with the Town Team and they are claiming loud and strong a victory all ready. It will be settled at 4 o'clock Saturday afternoon.

The Silk Mill plays South Hill at 2 o'clock. Then the Silk Mill Team has two games yet to play in order to finish out their schedule one with South Hill and one with the Town Team. These will undoubtedly be played a week from Saturday.

THE HOLSTEINS ARE DEFENDED

A Few Facts Taken From Authentic and Official Tests That Show How Holsteins Art Hit.

In reading an article published in the News last week: "Holsteins are Most Affected," I notice the writer has said nothing whatever about the over-production of milk that the Holstein-Friesian cows gives over other breeds. In figuring a dairyman's milk returns, there are two facts to be recorded: number of pounds of milk times percentage of fat. Why has the writer in last week's News condemned the Holstein cow just on account of a lower percentage of fat?

Which cow would be more profitable a Holstein cow that will give eighty pounds of 3.5 per cent milk per day of a Jersey cow that will give forty pounds of 4.5 per cent milk per day?

Figuring the milk on the butter fat basis at three cents a point, the Holstein cow's milk would be worth \$1.05 per hundred. Giving eighty pounds per day production would be worth 84 cents per day. The Jersey cow's milk would be worth \$1.35 per hundred. Giving forty pounds per day production would be worth 54 cents per day. This shows the Holstein cow 30 cents a day the more profitable to the dairyman. For six months the Holstein cow would produce \$54.00 more than the Jersey, allowing that the latter will milk as persistent as the Holstein.

It has been proven, however, that the Holstein cow is a much more persistent milker than any of the other breeds. She holds all the milk and butter records from one day to 365 days.

Finden Holinger Payne, No. 144551 holds the world's record for butter production, having produced 24672.8 pounds of milk from which 1116.05 pounds of butter fat was produced, showing an average percent of butter fat of 4.23 pounds, at three years old.

K. P. Pontiac Lass, holds all worlds records from seven to 100 days in butter production. Record: seven days, 44.18 pounds; 30 days, 171.50; 60 days, 308.81; 90 days, 426.68; 100 days, 465.16.

The way the facts read to most dairymen is that the large dealers are trying, by combining, to buy cream at milk prices. New York State laws say milk shall test three percent butter fat. But the dealers have raised the

standard to 3.8 percent, and discount for every point under. As the Holstein cow does not test quite as highly as the other breeds they have made a false charge against them. If they wanted to be real fair why did the writer in last week's News say nothing about the Holstein's ability to give more milk? Why does the milk dealer discount three cents a point for milk testing under 3.8 per cent and not add 3c a point for milk running over 3.8 percent? It is a poor rule that does not work both ways.

The writer has a considerable say about Holstein milk testing only 2.8 percent. The facts are that Mr. Gardner in his annual report at the Holstein-Friesian Association of America, as Superintendent of Advanced Registers for the fiscal year ending April 30, 1915, reported that a herd of 10,743 animals were tested of which over one half were heifers with first and second calves, produced within a period of seven consecutive days \$471,601.60 pounds of milk, containing 155,489.89 pounds of butter fat, showing an average percent of fat of 3.56. The average production of each animal was 406.9 pounds of milk containing 14,474 pounds of butter fat, equal to 58.1 pounds of butter, or nearly 28 quarts of milk per day and 16.89 pounds of commercial butter per week.

Does this look like 2.8 percent butter fat? After looking over Mr. Gardner's report is it any wonder that dairymen are willing to pay such large sums for the black and white cow?

I recently attended a public sale at Cazenovia, N. Y., and saw 200 animals sold for \$88,500 which would be an average of \$442.50 per animal. Two cows sold for \$7,050.00. And this sale took place within fifteen miles of Andover, where last week's writer says is the seat of downfall of the Holstein business. Do these prices look like it?

Stick by the black and white cow and she will not fail you for milk or for butter, and will sell more readily and for 33-1-3 percent more than any other kind. E. E. CRANDALL.

Grange Contest

Whitney Crossings, N. Y. '15

By the contest of the school-children for the prizes offered by the Pomona Grange for the destruction of the egg of the tent-caterpillar moth closed May tenth, with the following results:

First Prize, \$8, was awarded to District No. 7, Angelica. Second Prize, \$6, won by District No. 4, Almond. Third Prize, \$4, won by District No. 6, West Almond, and Fourth Prize, \$2, fell to District No. 3, Almond.

Complete Summary as follows:

District	No. of Pupils	No. of egg clusters destroyed	Average
Dist. No. 7, Angelica	11	27689	2518.
" " 4, Almond	9	17474	1943.
" " 6, West Almond	2	2273	1166.5
" " 3, Almond	29	31952	1102.
" " 8, Burns	6	6441	1074.
" " 8, Almond	15	15281	1019.
" " 5, Angelica	9	8925	991.
" " 6, Birdsall	7	5895	842.
" " 7, Burns	4	2411	603.
" " 2, Birdsall	5	5524	584. (?)
" " 5, Almond	14	7445	537.
" " 5, Birdsall	15	7766	517.
" " 3, Burns 14	14	6800	486.
" " 8, Angelica	8	3515	439.
" " 1, Birdsall	18	7405	411.
" " 10, Grove	2	680	340.
" " 2, Grove	6	1296	213. (?)
" " 2, Almond	15	2740	182.
" " (?) 2, Clarksville	15	2441	162.
" " 6, Burns	22	2016	91.

The Pomona Grange has decided to continue the contest under the same conditions for the next year.

HIGH SCHOOL COMMENCEMENT

A Class of Nine Graduates From the Andover School This Year, Six Girls and Three Boys. Class Reception.

The Commencement of the Andover High School began Sunday evening, with the Baccalaureate sermon, which was delivered by Rev. V. L. Eggleston in the Methodist Episcopal church. The church was beautifully decorated with the class colors, purple and gold, and the sermon was highly commended by all who heard it. Mr. Eggleston's remarks to the graduates will be found below.

The Commencement exercises were held Monday night in the Auditorium, where the following program was very cleverly rendered.

- Music
- Satutory
- Adah Bell Bassett, Pres.
- Piano Solo Bertha Livermore
- Oration Clarence Hardy
- Vocal Solo Nellie Walsh
- Class Prophecy Paul DeRemar
- Vocal Solo Regina Raufenbarth
- Class Poem Bernice Mead
- Music Orchestra
- Class Will Esther Baker
- Valedictory Lenora Dean
- Presentation of Diplomas Orchestra
- Music

In presenting the diplomas Principal Sterner gave the graduates some very valuable advice in regard to the ways of life.

After the graduating exercises the Junior Class gave a reception for the Seniors at the home of their President, Miss Marjorie Borden. All report a pleasant evening.

The Graduating Class of 1915 are Adah Bell Bassett, President; Bertha Livermore, Regina Raufenbarth, Bernice Mead, Esther Baker, Lenora Dean, Clarence Hardy, Paul DeRemar and Howard Mann.

Following are the good words of advice given by Rev. V. L. Eggleston at the close of the Baccalaureate sermon Sunday night:

Young ladies and gentlemen of the Graduating Class:

It is certainly with a feeling of deep appreciation of the honor conferred upon me by the Senior Class that I address you on this occasion. I shall strive to give you a few words of congratulation and advice. The dream of youth is about to close. Some of you will go forth into the world with a diploma upon which will be stamped the great seal of the University of the State of New York. It should be a source of joy and gratulation mingled with bloom, Multitudes came to see seriousness. Clouds of reflection; them and shouted, "The Snow-force themselves upon the mind, Flower!" And by them we are for you are about to break ties, reminded of those whom the almost as sacred as the family relation. What shall I say to you? You ought to be true men and women, noble, high-minded,

God-fearing, in a word as far as possible, perfect men and women. There is a beautiful legend I have read in that old book called the Bible. Two angels at the base of an oriental mountain were conferring about the rebuilding of a great city; they were seeking for some one capable of assuming leadership. A young man of energy and culture was passing by. He was quickly chosen, and one angel said to the other, "Run speak to this young man. Instruct him about the building of a city; he is just before each one of you. It is the building of your own character and settling your own destiny. The instruction is needed at once; a little later and my counsel will do no good. It must be given before you leave the halls of our Alma Mater. Class of 1915, consider with me the importance of the work you are now entering upon. It is character building; you are to be the architects. You will gather the material and place every brick and timber in the soul structure which is going up under your superintendence. You may, you must succeed in laying the foundation and building a strong and beautiful character, embellished with precious thoughts and glittering gems that shall stand out before the vision of men and angels, a veritable immortelle.

Do not say, "I have no chance, but remember Isaac Newton, the greatest astronomer of his age—office peddling cabbages in the street; Martin Luther singing on the public square for any pennies he might pick up; John Bunyan mending old kettles to secure his bread and butter; and Peter Cooper who worked for twenty-five cents per day in a glue factory, living long enough to give \$500,000 for the education of the poor sons and daughters of America.

There is for every member of this class a great financial, or literary, or moral, or religious, or social success, if you only know how to go out and take it. Get ready to take it. The mightier the opposition the grander the triumph.

There is a native flower in Siberia that blooms only in January, the severest month in that cold, stormy climate. It is a star-shaped flower covered with glistening specks which look like diamonds. A Russian took some of the seeds of that flower to St. Petersburg and planted them; they grew and on the coldest day of January pushed back the snow and ice and burst into full joy and gratulation mingled with bloom. Multitudes came to see seriousness. Clouds of reflection; them and shouted, "The Snow-force themselves upon the mind, Flower!" And by them we are for you are about to break ties, reminded of those whom the almost as sacred as the family relation. What shall I say to you? You ought to be true men and women, noble, high-minded,
