The old apprenticeship method of learning trades is almost a thing of the past. Keen competition, the pace of work and piece-work methods in modern industries have practically eliminated the untrained man. The skilled workman no longer has time to teach beginners a trade even if he has the teaching ability. The shop of today is not a school but a place for individual high pace fover the exact number of women meeting bearing more proxies,

Trades must be learned today in polytechnic institutes, technical schools, deny that there are four million | The shares favoring the b city trade schools and in the technical schools of Young Men's Christian Asso- of them. Judging from the fig- issue numbered 1.183.858, out of and down the valley to-a point dations, which are now found in all the larger cities. Schools like these with (full shop equipment, individual teaching, expert instructors and modern methjods teach men the trades in shorter time and in a more thorough manner than did the old apprentice plan.

For the young man of limited means, unable to attend day sessions of such estimate of the adult women in The meeting was called for Aschools, evening courses are now provided. Night school also affords the op-the twelve suffrage states. I portunity for a workman to improve his skill and increase his wage by occupying several nights a week in trade school after the day's work is done. The educational departments of the Young Men's Christian Association aim proper vocation, to train him for that occupation and to help him to secure gible?
