Spread the good cheer to oth GOOD ROADS-No other thing is quite so essential to the success and development of a community as good roads. No other element of success is so easy to attain where all of the people have the will and the determination to do. Good roads mean everything to us, collective and individually, and we need good roads and better roads, and we should go after them and

> GOOD FARMS-Good roads are productive of good farms, and prosperous farmers are the foundation and framework of every community. Without good roads the farmer is retarded and handicapped, his earning capacity is reduced, his opportunity for improvement and expansion is lessened, his working cap-Ital is impaired, his profits are eliminated and his future is cloudy and obscure. But good roads make good farms, and we want every farm in this community to be even better than good. Build the roads and the farms.

GOOD BUSINESS-We can have it if we pay proper attention to our schools and our churches, and our houses and barns and stores, and shops, and roads and farms, and all of / the thousand and one other elements that have a place in the making of a prosperous commercial center. We want it and welf can get it if we go after it with the spirit and determination t These are the days when the succeed, but we must go as a community unit and not as one or political orator loves all the two isolated individuals, who volunteer for better business.

GOOD PEOPLE-But the success of all depends wholly upon the times the public will not believe If they are "good people" other things will be proportionately it when the cuss really does good. Our people are good people, but we could be even better than we are, and our success would enhance in proportion to our qualities and our efforts. Good people are desirable, but better is so grauchy he'd growl about ones are prized in the sea of life. Let's all be prizes. Bood Bye-
