## BUSINESS MENTRY TO AVERT STRIKE

Ask Congress to Direct U. S. Inquiry into R. R. Wages.

### FOR PEACEFUL SETTLEMENT

Members of United States Chamber of Commerce Vote Overwhelmingly in Favor of Letting Interstate Commerce Commission Adjust Controversy.

Washington.—In order to ascertain the position of the business men of the nation on the controversy between the railroads of the country and the unions of train service employees, which was precipitated by the demand of the latter for an increase in wages that would amount to \$100,000,000 a year, the United States Chamber of Commerce recently submitted the matter to a vote of all its members. They were asked to express their opinion as to whether the dispute should be allowed to take its course with the possibility of a great strike that would tie up all the transportation lines throughout the country and paralyze all business, or whether they would favor the adoption of a joint resolution by the two branches of congress directing the Interstate Commerce Commission to investigate and pass upon the matter.

The vote received was a very large one and represented business organizations in every part of the country. The result was overwhelmingly in favor of placing the matter in the hands of the Interstate Commerce Commission, 8844 votes being cast in favor of this course and only 284 against it. The result showed clearly that the business interests of the country are unalterably against permitting the transportation lines to be tied up by a national railroad strike that would paralyze the commerce of the country and inflict enormous losses on all classes of citizens.

Chairman Wheeler of the Committee in charge of the matter for the Chamber of Commerce appeared before the representatives of the railroads and their employees at their conference in New York in June. He announced the result of the Committee's inquiry among the business men of the country and urged both parties to the dispute to get together and adopt the course suggested. As a result the committee of managers representing the railroads submitted a proposal that the whole subject be placed before the Interstate Commerce Commission as requested by the representatives of the business interests.

As an alternative they offered to submit the demands to arbitration under the Federal law. Both offers were refused by the union leaders, who announced that they would go back to their unions and get authority to declare a strike. This they have since been doing.

Meanwhile a resolution has been introduced in congress directing the Interstate Commerce Commission to make an investigation of railroad wages. This resolution is now awaiting action. It is believed here that if nothing further is done by Congress or by the parties to the wage dispute to bring about a peaceful settlement the business interests of the country, through the United States Chamber of Commerce, or some other organization, will appeal to the Government to take some direct and decisive action to prevent the destruction of national prosperity by a strike on all the railroad lines.
