114-118 Main Street

Hornell, New York

HIS WEEK marked the arrival of one of A. the largest shipments of Fine Woolens that this store has received in years. It promises to be a big Wool Season. A very large part of the season's gowns will be made of this material. We contracted early last Spring with two big mills we represent for shipment at this date. They have just arrived and comprise the best assortment, the best values we have offered in years. You will find no dirth of color variety in this lot especially in clear brilliantly dyed Blues. Serges of all description will of course comprise the bulk of Fall selling, but Gabardines, Poplins, Alma Royals, and other weaves are as popular as ever.

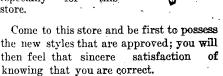

GARFIELD and the FORSTMANN, HUFFMANN Mills are acknowledged leaders in this country in manufacture of Fine Woolens. Their products surpass in textile excellence, in brilliance of dye, and in sound wearing qualities. We represent these two famous lines for this section. Note display in our East window: Come in and look them over.

ADVANCE STYLES

Of Approved Correctness

There is great satisfaction to all women to have the new styles first, especially when it is known that these same styles have had the approval of the world's leading fashion authorities.

Our buyer has just returned from New York city bringing with him models in Suits, Coats and Blouses that are the very first of the approved styles to be seen in this city. - All of these models are individual and made especially for this this

The Store That Brings New York to You.

Our Milliners Have Just Returned From New York

Where they have made an exhaustive study of the coming Fall and Winter Millinery styles.

Veivet and hatter's plush are the materials that have the vogue for the early Fall Hats, and will undoubtedly persist through the Winter. The distinctiveness of our Hattitheofore is to be Hats therefore is to be found, not so much in the materials, but in the subtle charm of their shaping and trimming—conceits sedate to saucy, small to large, turban to tailored effect. Which shall yours be?

We invite you to come in and try on some of the many Fall and Winter Hats we are now showing.

WHEN THE SEA RAGES.

Storm Waves That Heap Up Into Real Mountains of Solid Water.

Unless you have been in a storm ses or, rather, out in the ocean -it is impossible to imagine the strength of the enormous rollers.

These green hills of water, crested with snowy foam, are sometimes forty feet high, and the distance between one crest and the next as much as a quarter of a mile. Such waves travel at a speed of between thirty and forty miles an hour.

These huge ocean waves, disporting themselves on top of water two or three miles deep, are not danger-ous unless a ship be driven into them. It is when they come crashing into shoal water that they pile themselves up into real mountains and achieve such extraordinary feats of power.
Near the Eddystone lighthouse

the sea is 200 fathoms or 1,200 feet deep. Within a little distance this decreases to thirty fathoms. Here storm waves heap up into real mountains of solid water fully 100 feet in height.

In a westerly gale the Atlantic breaks with incredible force on the huge, bare cliffs of the Irish coast. Here Lord Dunraver has actually measured wave crests which struck the rocks 150 feet above sea level. Yet even this is child's play com-

pared with what happens in the Mariana islands. Here is a giant pillar of rock known as Lot's Wife. It stands 350 feet clear above the surface of the ocean, yet in storms the spray drenches it to its topmost

One of the worst hurricanes of which swept Karatonga, in the Pa-cific ocean, in the year 1846. Be-lieve it or not, a vessel from Tahiti was lifted by the great wave, carried over the tops of the palm trees and dropped far inland. The captain, who survived, deposed on oath that he felt the tree tops grating against the schooner's timbers as she was swept along on the crest of this monstrous roller! The greatest of ordinary wind

waves are seen in the "roaring forties," south of Cape Horn. They rise to forty-six feet. The Bay of Biscay deserves its bad name, for there waves thirty-six feet high have been measured. In the North sea waves do not exceed fourteen feet, but they are steep and very dangerous, while in the Mediterranean fifteen feet seems to be the limit.-London Answers.

- Long and Short Miles

A mile is equivalent in England and the United States to 5,280 feet. The distance varies greatly in other countries. Its length in yards is: In Norway, 12,187; Brunswick, 11,-816; Sweden, 11,660; Hungary, 9,139; Switzerland, 8.548; Austria, 8,297; Prussia, 8,238; Poland, 8,297; Prussia, 8,238; Poland, 8,100; Italy, 2,025; England and the United States, 1,760; Spain, 1,522; Ketherlands, 1,094. The geographical or nautical mile is 6,080.27 feet.

Scott's is strengthening thousands and mothers—and will help you. No slocked.

Scott & Bowne. Bloomfield. N. J.

By "usury" the ancient teachers meant any interest that was exacted by the lender of money from the borrower solely as the price of the loan. Those who lent money at 3 per cent, or even 1 per cent, committing usury quite as really as those who lent it at 40 per cent. The old time prejudice against interest was based on the theory, at one time quite universal. that one time quite universal, that "money is sterile by nature" and that, therefore, to exact profit from that, therefore, to exact profit from it is both absurd and unjust. For centuries pretty nearly all the au-thorities in church and state were committed to such idea, and it was not until quite recent times that the old error was exploded.

Boys as Soldiers.

It is the boys of a country who do its fighting. They make the best soldiers. They have the resiliency, the recuperative power of youth. War to them is a romance. They do_not_think of_consequences a older men do. It is youth that makes the reckless charges, the dar-It is youth that One of the worst hurricanes of which we have any record was that lorn hopes. When the war is over which swept Karatonga, in the Pacific ocean, in the year 1846. Belaye if or not a wessel from Tahiti News-Bee.

Lucius Emilius Paulus, a Roman consul, being about to divorce his wife, suffered the remonstrances and reproaches of his followers, who asked: "Is she not chaste? Is she not beautiful?"

not beautiful?"

For answer Lucius took off his shoe, saying: "See this shoe? It is well formed, is it not? It is handsome, is it not? My friends, no one knows where that shoe pinches save he who wears it."
