

**November 10, 1916**  
295 YEARS AGO TO-DAY

**THE MAYFLOWER WAS ANCHORED IN CAPE COD HARBOR**

When this good ship finally reached the New World, and before she was able to land her storm-tossed Pilgrims on Plymouth Rock, the first white child in New England was born. These remarkable men and women endured every hardship for the sake of religious liberty and the future welfare of their children. And now are you sacrificing even an occasional pleasure for the sake of those who come after you? Be thrifty, bank a part of your earnings.

This institution is for that purpose.

**Andover State Bank**

**PERSONALS**

Ralph Kemp was in Wellsville Wednesday.

Lloyd Robinson came home from Cornell to vote.

Arthur Wagner was home from Olean Tuesday.

Jerome Dean was a caller in town Saturday night.

Wall Street's money couldn't get across the Mississippi.

Pat Coats, of Wellsville, was a caller in town Thursday.

Mr. and Mrs. D. M. Green were guests of Alfred friends Tuesday.

W. B. Bundy, of Dansville, was a guest of friends in town Tuesday.

Miss Kathryn Gallagher spent Sunday guest of friends in Salamanca.

J. M. Brundage and Edw. Freedland were in Hornell Tuesday evening.

Mrs. Glen Rugar and Mrs. E. C. Langworthy were in Wellsville Monday.

Mrs. Addie Coleman is visiting her daughter, Mrs. Chas. Fay, of Wellsville.

Prof. Wm. Pingree, of Honeoye, N. Y., motored to Andover Tuesday to vote.

Messrs. Chas. Covelland, Leon Muckey, of Wellsville, were callers in town Sunday.

Misses Anna Gallagher and Mary Driscoll were callers in Hornell Sunday night.

Archie Bloss came home Tuesday from Meadville, Pa., where he has been employed.

Claire C. Backus is passing the week at Ithaca and Cornell University with friends.

Capt. J. A. Travis, of Washington, D. C., came to Andover to vote for Hughes & Fairbanks.

her mother's serious illness. She left on train 3 Tuesday night.

A. R. Brillion came home to vote Tuesday.

R. L. O'Donnell has been home from Syracuse this week.

Mr. and Mrs. E. L. Hann, of Norwich, are visiting Andover relatives.

Mrs. T. P. Kelley, of Salamanca has been visiting her mother, Mrs. Ellen Regan, this week.

Mrs. P. C. Berkwater and children returned Tuesday from a visit with Olean relatives.

Rev. Louis H. Buisch, of Wellsville, was in town Thursday and a pleasant caller at the News office.

Rev. and Mrs. Carr and daughter, Gladys, of Olysses, Pa., were guests of Mr. and Mrs. P. M. Swink.

**CONCERNING SUFFRAGE**  
The second case to be tried in Reno, Nevada, with women jurors involved a man charged with assault. He surely was not being tried by a jury of his peers.

In Vermont both politicians and churchmen have lined up back of the woman suffrage movement. The state convention of the Universalists declared that suffrage and sex were not necessarily tied up together; the Republicans endorsed their national platform; and the Democrats demanded that the ballot be placed in the hands of the women on an equal basis with men.

Is anticipation better than participation? This is a perennial subject for debate with the victory going sometimes to one side and sometimes to the other. In California, according to the president of the State Federation of Women's Clubs, Mrs. E. D. Knight, a debate on whether woman suffrage had proved better in experience than in anticipation, would be decided in favor of experience.

To prove it she made in a recent speech the following points: Woman suffrage in California has given men an increased deference toward women; has given weight to her expressed opinions; has aroused in women an active interest in political questions and women have shown a surprising aptitude for the discharge of political duties; it has refined the polls and strengthened the family bond.

The space your store's advertising occupies in this newspaper is the space it occupies in the thoughts of this newspaper's readers.

**RHODE ISLAND.**  
Providence, Nov. 9.—The defeat of United States Senator H. F. Lippitt, Republican, by Peter G. Gerry, Democrat, was the outstanding feature of Tuesday's vote. Gerry's plurality was about 6,800.

Hughes carried the state by 4,709 plurality. Governor R. L. Beekman, Republican, was re-elected by a plurality of about 13,000 over Addison P. Munroe, Democrat.

**SOUTH DAKOTA.**  
Sioux Falls, S. D., Nov. 9.—The woman suffrage amendment which early returns had indicated would carry in South Dakota by a small majority, is being out as late returns come in. In approximately one-half of the 1,728 precincts of the state the vote stands: For 3,872; against 5,870. Vanhook, Campbell and Lincoln counties returned heavy adverse votes.

**WHEN THE SEA RAGES.**

Storm Waves That Heap Up Into Real Mountains of Solid Water.

Unless you have been in a storm at sea—or, rather, out in the ocean—it is impossible to imagine the strength of the enormous rollers. These green hills of water, created with snowy foam, are sometimes forty feet high, and the distance between one crest and the next as much as a quarter of a mile. Such waves travel at a speed of between thirty and forty miles an hour.

These huge ocean waves, disporting themselves on top of water two or three miles deep, are not dangerous unless a ship be driven into them. It is when they come crashing into shoal water that they pile themselves up into real mountains and achieve such extraordinary feats of power.

Near the Eddystone lighthouse the sea is 200 fathoms or 1,200 feet deep. Within a little distance this decreases to thirty fathoms. Here storm waves heap up into real mountains of solid water fully 100 feet in height.

In a westerly gale the Atlantic breaks with incredible force on the huge, bare cliffs of the Irish coast. Here Lord Dunraven has actually measured wave crests which struck the rocks 150 feet above sea level.

Yet even this is child's play compared with what happens in the Mariana islands. Here is a giant pillar of rock known as Lot's Wife. It stands 350 feet clear above the surface of the ocean, yet in storms the spray drenches it to its topmost pinnacle.

One of the worst hurricanes of which we have any record was that which swept Karatonga, in the Pacific ocean, in the year 1846. Believe it or not, a vessel from Tahiti was lifted by the great wave, carried over the tops of the palm trees and dropped far inland. The captain, who survived, deposed on oath that he felt the tree tops grating against the schooner's timbers as she was swept along on the crest of this monstrous roller!

The greatest of ordinary wind waves are seen in the "roaring forties," south of Cape Horn. They rise to forty-six feet. The Bay of Biscay deserves its bad name, for there waves thirty-six feet high have been measured. In the North sea waves do not exceed fourteen feet, but they are steep and very dangerous, while in the Mediterranean fifteen feet seems to be the limit.—London Answers.

**Speed of the Teal.**  
Give a bluewing teal a forty mile breeze behind him, have the little rascal dropping down with it, and he comes so fast as to be simply unhittable. Some writers have claimed a speed for him of 150 miles an hour, or 220 feet a second. The capvaack, redhead and blue-bill have a way of driving before a gale, too, that will be found fast enough in all conscience. Much of the fascination of wing shooting comes from the fact that shots will always be afforded quite beyond the skill of mortal man.—Outing Magazine.

**A Fish Out of Water.**  
Many people think that fish when taken out of the water die because air has a fatal effect on them. The real reason, however, is that their delicate gill filaments or membranes become dry and stick together, so that no air can pass between them. Thus they lose the power to imbibe necessary oxygen, and the circulation of their blood stops. The painful gasping of a fish out of water is nature's effort to free the passage through the filaments.

**Spider Thread Clothes.**  
Numerous attempts have been made to utilize spider threads for cloth to make clothes, etc. All have been so far doomed to failure—anyhow, as a financial proposition. It is related that Louis XIV. had a dress made from spider's web which was so fragile that he became disgusted with it. The entomologist D'Orbigny had made for himself a pair of trousers from the webs of tropical spiders, which lasted for a long time.

**Attracts Attention.**  
A man may sing to himself, whistle to himself and cuss to himself, and nobody pauses long enough to give him a second glance. But let him talk to himself and the whole town thinks that he is whizzing around the brim and wonders why some kindly disposed relative doesn't stack him up against a lunacy commission.

**A Slight Matter.**  
"I don't see you at Miss Golder's receptions any more, old man."  
"No; she and I had a little difference of opinion."  
"Nothing serious, I hope."  
"Oh, no; only I thought I was the man she ought to marry and she thought I wasn't."—Boston Transcript.
