

Does This Prove it?

EVERY DAY OF THE WEEK there are nine dollars in bank checks used to every dollar of actual cash that changes hands. The reason for this is not hard to find. When bank checks are used they represent money that remains safely in the bank. The risk is eliminated. Checks are also far more convenient and business-like. Every cancelled check is a valuable record of the transaction—a perfect receipt for payment and proof in case any question ever comes up concerning it. The checking system is most popular because it is the best method ever devised for handling money. Don't be satisfied with bad business methods. Come in and talk it over.
