YOUR CREDIT at the bank is a part of your wealth. It should be as carefully guarded and protected as your home or your automobile.
 Credit should have been first class but it was not. He did not know a well known business man almost failed some time ago. His his promising strictly. His notes at the bank were allowed to become past due.
 When the bank examiners came to look over the loans made by the bank they found this man's record and advised the banker to "go slow" with that man in the future.
 It pays to take care of your notes promptly when they fall due—either paying them or renewing them if that is the plan agreed upon.
 It is impossible for the banker to work freely with those who are careless on this point.

Just Turn a Faucet
 Not till you get a water system on your farm will you realize how much work it does for you. Just turn a faucet and you have all the water you want—hot or cold, hard or soft.
 It saves work in scrubbing, cooking and washing, because there is no pumping or lugging the water from the spring.
 It saves work in the dairy, in the barn and in the stables.
 And all the water is absolutely fresh—"Direct from the Well." There is no water storage tank and nothing to freeze.
 Call and see us or phone. The cost is reasonable.
