PUBLISHED WEEKLY BY J. HARVEY BACKUS & SON

Our Keynote: "If There Is Not a Way, Cut a Way,"

ANDOVER, N. Y. ..... MARCH 17, 1922

Entered as second-class mail matter under act of Congress, at the Post-effice at Andover, N. Y.

#### MORE WORK THAN PAY

IT is doubtful if the average citizen realizes the amount of time devoted to the public welfare by town officials and members of the governing bodies.

They can never consider their time their own.

Scarcely a day passes but what some citizen approaches them with some request or suggestion relative to community affairs. Each of these must be carefully considered from all angles, and the good points weighed against the bad ones.

This requires much time and thot, all of which is taken from their private business affairs.

Why, then, do they do these things?

You love and take a pride in the little child in your home, and spend endless hours and days in training it, to the end that it may grow to maturity a credit to itself as well as to you.

Much the same reason actuates the average village official. It is his town, his home, and he wants to see it become a credit to the citizenship of the community.

The hours he spends in bringing about this result are not considered. It is the result itself that counts.

To bad we can not all be of the official class, It would be better for the home town.

# MAKING DOLLARS WORK

THE evolution from the old time real estate mortgage to the present system of issuing interest bearing bonds when a loan of any size is negotiated marks a distinct milestone in the history of the expansion and development of this country.

Bonds are in themselves mortgages, and possess all It is possessed of legs and wings an of the protecting clauses for investers that are found in the straight real estate-mortgage.

Generally a bank or a bond house buys up the entire ssue of a bond loan and sells it to the public in separate bonds of various denominations. Those of \$100, \$500 and \$1,000 are the most popular.

The possibility of investing a hundred dollars at time in a bond bearing six or seven per cent. interest offers a splendid opportunity to young people to begin life in the right way-by regularly investing their savings in small sums at a profitable rate of interest.

Again, it has a tendency to bring out the hidden wealth of the country from the old stockings and stove pipes and tin cans and put it to work in manufacturing and commercial enterprises that all go toward increasing the prosperity of the country.

But beware how you buy bonds from a stranger. The safe way is to go straight to your local banker and buy from him. He knows the bonds that are safe and those that are best to let alone.

It is his business to know, and his judgment may be relied upon with perfect safety.

## WHY NOT THE BETTER WAY?

SOME good people think we should prevent any more foreigners from coming to this country — that we should restrict all further immigration.

But why? We have millions and millions of undeveloped land waiting for the plow, and many other millions that are only partially developed. All should be under cultivation.

A good way would be to admit only those foreigners who can furnish a clean record before they sail. Then compel them to obey every law of our land, and the moment they are convicted of crime, or of stirring up strife, or of criticising our form of government, ship them

back to the countries from whence they came.

A firm, impartial enforcement of law is what we re-

The Asiatic question, tho, might be treated from a different point of view.

Winter is on its last legs and they March came in as usual, but the

are beginning to wabble.

Failure never bothers the man who doesn't recognize its existence.

Many a man who is brave enough to fight a buzz saw will duck a roll- out friends, but everybody knows ing-pin.

Of course there is one excuse for not jailing-our growing crop of

WHEN A FELLOW KNOWS IT ALL

THERE are but few country towns in existence but what have some ne or more persons who "know it That is, they fondly imagine hey know it all and most people give credit for being better po on everything and everybody than their neighbors are.

But are they?

The fellow who is a "know it all" is almost generally a free talker. He rades information for information gossip for gossip, and scandal for scandal.

Thus it is that he is often able to impart certain unimportant informa tion to his associates in a "strictly pression that he has been in close touch with the powers that be.

But when you sift it down he has imply passed along, with embellishments of his own, information that is more or less of a public nature, and which would have reached the public in the usual routine in the course of a few days.

As a matter of fact, the Know-it All man seldom knows in advance of the really important affairs of life or of the commercial world, for no one cares to impart such information to the one who knows it all and ells all he knows.

Do not tie to the man who know t all, for in all probability he know

of vital interest - may even be of in our personal habits, allow the beauty of well kept front yards to become marred by an accumulation of trash along the back fence.

Dirty and filthy alleys and side streets are an eyesore to any com-

nenace to health. There is not a thing to be said in

their behalf, but much to be said against them.

Why have them in this town?

FEW years ago farmers tightene A their grasp on the lines of their teams and cast hostile gli passing automobiles.

A few of them spilled tacks in the roads for cars to run over.

Most of them contented themselves with cussing the motorists after getting their teams under control or picking themselves up out of

a ditch.
