Every Farm Home Needs a Bath Room

It greatly reduces the housewife's work, particularly in taking care of the children. And it adds much to the comfort and convenience of every member of the family from grandmother to the baby.

A MILWAUKEE AIR POWER WATER SYSTEM makes a bath room possible in any farm home by supplying an abundance of hot and cold water—both hard or soft if desired.

This is a "Direct from the Well" system. There is no water storage tank. Every drop of the well or spring water is absolutely fresh and fit to drink. The pumps are simple and all the machinery thoroughly reliable.

The cost of an outfit for your place will be reasonable. Come in and see us, or phone about it.
