NON-POOLERS AIDED BY DISTRIBUTORS

The "Pooling" of "Non-Poolers" is for the Purpose of Embarrassing the "Poolers"

The announcement by Sheffield Farms Company that it is organizing a milk producers' association, composed exclusively of "non-poolers" selling milk to that company, did not cause a single ripple at the headquarters of the Dairymen's League, Co-Operative Association, Inc., Utica, N. Y. The distributing company launched the "non-poolers" association at the New York Athletic Club, New York City, with 125 delegates, said to represent 4,000 farmers.

Officers of the Co-Operative Association say they realize the purpose of Sheffield's in "pooling" their "non-poolers" against the "poolers" is to embarrass the "poolers" organization. —They say they do not believe any group of farmers, "non-poolers" or otherwise, will ever accomplish much for the good of farmers with dealers making rules for and running the organization.

The Co-Operative Association officers frankly state their belief that an organization of 4,000 Sheffield farmers could have little or no effect in trying to stay the progress of a group of 90,000 farmers. However, they do say that if all farmers stood together for farmers in the operation of the plan for collective marketing, the day will come sooner when the dairy industry will be placed on a stabilized basis; with guarantees of fair and reasonable prices to producers.

Sheffield Farms Company recently distributed among farmers a financial statement purporting to show that Sheffield "poolers" lost an average of \$353 per 100 pounds for milk in the

last eleven months. This "loss," in terms of money, was placed at \$1,062,986.27.

It was pointed out at the Utica headquarters that Sheffield's described deductions for certificates of indebtedness as "losses," whereas as a matter of fact, the certificates are gilt edged securities, bearing 6 per cent interest, backed by 70,000 farmers. There are few bonds in the land more attractive than these certificates.

Sheffield's gave the "pool" price as the base price, which is true, but they did not say, which is equally true, that had there been no "pool" price, the price of milk would have been based on butter and cheese. The "pool" took care of Sheffield's surplus and therefore enabled them to pay the "non-poolers" higher prices than would have been otherwise possible.

"Poolers" see in the Sheffield's effort to direct the destinies of an association of farmers a clear cut plan to divide farmers against themselves. The objective, they say, is a return to conditions of past years when Sheffield was able to tell the farmer what he could receive for his milk.

Agrigraphs

Good fences make good neighbors. —Robert Frost.

Uncle Ab says: "The man who seeks ways not to do things is always left behind by the one who wants to do 'em."

Getting a deep mellow seed bed ready for corn is the equivalent of good early cultivation—except that if it's neglected cultivation later won't entirely fix it.

Breaking a harness right in the midst of spring work is exasperating; maybe the new bulletin on harness repairing from the State Agricultural College at Ithaca will help you fix it quickly. Better send for it to-day.—ask for F. 160.

In most homes coffee is an important item in the family breakfast. If that isn't good, the breakfast isn't satisfactory. Heart's Delight costs no more than inferior coffee. We guarantee satisfaction.
